

## Haywards Heath Neighbourhood Plan

### Habitats Regulations Assessment Screening Report

Produced for Regulation 19 of the Neighbourhood Planning (General) Regulations 2012

5<sup>th</sup> December 2016

#### 1.0 Introduction

- 1.1 This Habitats Regulations Assessment (HRA) screening report has been undertaken by Mid Sussex District Council in respect of the Haywards Heath Neighbourhood Plan which has been produced by Haywards Heath Town Council in accordance with the Neighbourhood Planning (General) Regulations 2012. This HRA screening report accompanies the Haywards Heath Neighbourhood Plan produced for Regulation 19 of the Neighbourhood Planning (General) Regulations 2012. A previous screening was undertaken during the consultation stages of the Haywards Heath Neighbourhood Plan prior to its independent examination. This screening report for Regulation 19 has been undertaken to ensure that the modifications recommended by the examiner have been taken into account and are fully compliant with legislation.
- 1.2 The Haywards Heath Neighbourhood Plan has been produced to guide development within the parish up to 2031. The Neighbourhood Plan sets out a vision for Haywards Heath:
- ‘The HHTC vision for Haywards Heath is to achieve:-
- A healthy, family focused and safe town,
  - A strong community spirit embracing both young and older people,
  - Supporting a vibrant economy,
  - Having excellent public services,
  - High quality public spaces with the countryside on its doorstep’
- (Haywards Heath Neighbourhood Plan, December 2016: page 15).
- 1.3 If the Haywards Heath Neighbourhood Plan is made by Mid Sussex District Council, it will be used in determining planning applications within the Neighbourhood Plan Area, as part of the development plan.
- 1.4 The aim of this HRA screening report is to assess whether there are any likely significant effects on European sites within relative proximity to the Neighbourhood Plan Area (Appendix 1).
- 1.5 Much of the information used for this screening report has been developed through the HRA for the Mid Sussex District Plan 2014-2031. The most recent version of this document was published in October 2015. It is considered that the background information in the District

Plan HRA can be used for this screening report of the Haywards Heath Neighbourhood Plan and as such, this screening report should be read in conjunction with it.

- 1.6 Further detail can be found in the [HRA for the Mid Sussex District Plan](#), other [supporting documents](#) and the [District Plan](#).
- 1.7 In producing this HRA screening report, the following guidance has been taken into account:
- David Tyldesley and Associates (for Scottish Natural Heritage) (August 2012) Habitats Regulations Appraisal of Plans: Guidance for Plan-making Bodies in Scotland – Version 2.0<sup>1</sup>
  - David Tyldesley and Associates (for the Countryside Council for Wales) (September 2012) Draft Guidance for Plan Making Authorities in Wales: The Appraisal of Plans Under the Habitats Directive<sup>2</sup>

It is noted that there is a different legislative framework in Scotland, however, in the absence of formal guidance for England, Natural England has recommended the use of this guidance for Scottish Natural Heritage.

## 2.0 Legislative Background

- 2.1 The Natura 2000 network consists of sites across Europe designated for their nature conservation importance. It aims to be an ecologically coherent network of designated sites that protect threatened species and habitats. The Natura 2000 network is formed of Special Areas of Conservation for species, plants and habitats and Special Protection Areas for bird species. Special Areas of Conservation (SACs) are designated under the European Council Directive 92/43/EEC on the conservation of natural habitats and of wild fauna and flora (the 'Habitats Directive'). Special Protection Areas (SPAs) are classified under the European Council Directive 2009/147/EC on the conservation of wild birds (the 'Birds Directive').
- 2.2 To help protect the Natura 2000 network, there are particular requirements for plans and projects. Article 6(3) of the Habitats Directive states:

'Any plan or project not directly connected with or necessary to the management of the site but likely to have a significant effect thereon, either individually or in combination with other plans or projects, shall be subject to appropriate assessment of its implications for the site in view of the site's conservation objectives. In the light of the conclusions of the assessment of the implications for the site and subject to the provisions of paragraph 4, the competent national authorities shall agree to the plan or project only after having ascertained that it will not adversely affect the integrity of the site concerned and, if appropriate, after having obtained the opinion of the general public'.

---

<sup>1</sup> <http://www.snh.gov.uk/planning-and-development/environmental-assessment/habitat-regulations-appraisal/>

<sup>2</sup> <http://www.ccg.gov.uk/landscape--wildlife/managing-land-and-sea/environmental-assessment/habitats-regulations-assessmen.aspx>

The Habitats Directive is clear that an ‘appropriate assessment’ of a plan or project applies to both Special Areas of Conservation and Special Protection Areas (see also Article 7).

2.3 The Conservation of Habitats and Species Regulations 2010 (the ‘Habitats Regulations’), the UK’s transposition of the Habitats Directive and Regulation 102, provides:

- ‘(1) Where a land use plan –
- (a) is likely to have a significant effect on a European site or a European offshore marine site (either alone or in combination with other plans or projects), and
  - (b) is not directly connected with or necessary to the management of the site,
- the plan-making authority for that plan must, before the plan is given effect, make an appropriate assessment of the implications for the site in view of that site’s conservation objectives’.

2.4 This means that any proposed plan that may affect a European site (Special Area of Conservation or Special Protection Area) must first undergo an assessment to look at its potential impacts applying the precautionary principle. This is to determine if the plan will adversely affect the integrity of the European site(s) concerned. This process is known as a Habitats Regulations Assessment and the first stage considers any likely significant effects (the screening stage). Straightforward mitigation measures can be applied at the screening stage which may mean that previous likely significant effects can be ruled out and the plan does not need to progress to the second stage. An appropriate assessment is the second stage of the HRA process and a plan should undertake this where likely significant effects are identified at the screening stage and cannot be ruled out after applying straightforward mitigation measures. The appropriate assessment looks at the implications of a plan for a European site in view of the site’s conservation objectives. Further more detailed mitigation measures may be introduced at the appropriate assessment stage to avoid or reduce the effects of a plan on the European site(s). Before a plan may be given effect, the plan-making authority as competent authority must ascertain that it would not adversely affect the integrity of the European site(s).

2.5 In terms of neighbourhood plans, the Neighbourhood Planning (General) Regulations 2012 require a submitted neighbourhood plan to include a statement explaining how the proposed neighbourhood development plan meets the basic conditions set out in paragraph 8 of Schedule 4B of the Town and Country Planning Act 1990<sup>3</sup>. One of these basic conditions is that the neighbourhood plan must be compatible with EU obligations and needs to demonstrate that it is not likely to have a significant effect on a European site.

---

<sup>3</sup> Regulation 15(1)(d).

### **3.0 European Site Information**

- 3.1 The first step of the screening process is to consider the European sites that could be affected by a plan. Five such sites<sup>4</sup> were identified through the District Plan HRA process, and of these, the screening for the District Plan identified likely significant effects on the Ashdown Forest Special Protection Area (SPA) and Special Area of Conservation (SAC) as a result of recreational disturbance and atmospheric pollution. Ashdown Forest lies adjacent to the north-east boundary of Mid Sussex and within Wealden District and, therefore, is not within the Neighbourhood Plan Area.
- 3.2 The Ashdown Forest SPA was classified in 1996. It is a 3,200Ha site comprising predominantly of lowland heathland and woodland. The Ashdown Forest SPA is an internationally important habitat classified because of the presence of breeding populations of Dartford warbler *Sylvia undata* and European nightjar *Caprimulgus europaeus*. Ashdown Forest is also notified as a Site of Special Scientific Interest (SSSI).
- 3.3 The Ashdown Forest SAC was designated in 2005 and covers 2,700Ha. It has a different boundary to the SPA, but the two designations overlap (Appendix 1). The qualifying features for the designation are the Annex I habitats: Northern Atlantic wet heaths with *Erica tetralix* and European dry heaths, and the Annex II species: Great crested newt *Triturus cristatus*. It is also part of the SSSI.
- 3.4 Further environmental details can be found in the HRA for the Mid Sussex District Plan (see Chapter 3: European Sites).

### **4.0 Habitats Regulations Assessment for the Mid Sussex District Plan**

- 4.1 The potential effects of development on Ashdown Forest were assessed during the HRA process for the Mid Sussex District Plan. The screening exercise carried out in late 2007 and early 2008 found likely significant effects<sup>5</sup> on the Ashdown Forest SPA as a result of increased recreational activity arising from new residential development and related population growth that is likely to disturb the ground-nesting birds. Further information can be found in the HRA for the Mid Sussex District Plan (see Chapter 6: Disturbance Impact Pathways).
- 4.2 Data analysis of a survey investigating visitor access patterns at Ashdown Forest found that the majority of regular visitors originated from within a 7km distance from Ashdown Forest. Within this 7km 'zone of influence', measures to reduce recreational pressure would be most effective, therefore, residential development leading to a net increase in dwellings will need to contribute to an appropriate level of mitigation. This will be in the form of providing

---

<sup>4</sup> Ashdown Forest SPA, Ashdown Forest SAC, Castle Hill SAC, Lewes Downs SAC, and Mole Gap to Reigate Escarpment SAC.

<sup>5</sup> Based on current evidence, it cannot be shown that there will not be a likely significant effect, so applying the precautionary principle, the HRA considers that proposals resulting in new residential development will have a likely significant effect on Ashdown Forest.

a Suitable Alternative Natural Greenspace (SANG), either on the development site itself or through a financial contribution towards a strategic SANG, and a separate financial contribution towards a Strategic Access Management and Monitoring (SAMM) strategy. An assessment of reasonable alternatives to the 7km zone of influence and the mitigation approach has been made in the [District Plan Sustainability Appraisal](#) (Incorporating Strategic Environmental Assessment) (August 2016). It is considered that that assessment can be applied to the HRAs for neighbourhood plans.

- 4.3 In terms of atmospheric pollution, the [Mid Sussex Transport Study](#) indicates that projected traffic increases are well below the threshold deemed as significant and, therefore, the HRA report concludes that significant effects are unlikely and no further measures are necessary. In order to promote good practice, however, the emerging District Plan contains measures to encourage sustainable transport and the requirements for avoidance and mitigation in relation to air pollution.
- 4.4 Policy DP15 in the Submission District Plan 2014-2031 (August 2016) outlines the proposed approach to protecting Ashdown Forest. Any residential development allocation included within the Haywards Heath Neighbourhood Plan will be subject to the requirements of the District Plan policy for the Ashdown Forest SPA and SAC or the approach being implemented at the time of a planning application.
- 4.5 It should be noted that the District Plan has not yet been adopted and, therefore, the District Plan HRA has not been tested and accepted at Examination. Whilst this is the case, the District Plan HRA did consider that some housing allocations in the District would be through neighbourhood plans. The expected level of development was taken into account and as such, it is considered that the District Plan HRA can be used as background information for the HRAs of neighbourhood plans. Currently, as advised by Natural England, all planning applications proposing a net increase in residential dwellings within the 7km zone around the Ashdown Forest SPA will be required to mitigate their effects of increased recreational pressure in the form of providing two separate financial contributions towards SANG and SAMM measures. The [East Court and Ashplats Wood SANG Strategy](#) has been agreed by the District Council and a [SAMM interim mitigation strategy](#) has been approved by Natural England. The provision of mitigation will be taken into account when preparing the HRA for the neighbourhood plan.

## **5.0 Screening Assessment for the Haywards Heath Neighbourhood Plan**

- 5.1 The screening assessment has regard to the conservation objectives of the Ashdown Forest SPA and SAC. It also makes reference to other plans and projects (the emerging Mid Sussex District Plan 2014-2031 and other neighbourhood plans in Mid Sussex). Key questions relating to the neighbourhood plan are included below and along with the screening assessment, help to establish if an appropriate assessment is required.

**5.2 Is the Haywards Heath Neighbourhood Plan directly connected with, or necessary to the management of a European site for nature conservation?**

From review of the Haywards Heath Neighbourhood Plan, it is considered that it is not directly connected with, or necessary to the nature conservation management of Ashdown Forest, and so a Habitats Regulations Assessment is required.

**5.3 Does the Haywards Heath Neighbourhood Plan propose new development or allocate sites for development?**

Yes – seven sites have been allocated for residential development in Policies H1 through to H7. The Haywards Heath Neighbourhood Plan allocates the following sites:

- Land at Hurst Farm for approximately 350 dwellings
- Land South of Rocky Lane and West of Weald Rise for approximately 190 dwellings
- Caru Hall for approximately 12 dwellings
- Rear of Devon Villas for approximately 10 dwellings
- Beech Hurst Depot, Bolnore Road for approximately 15 dwellings
- Harlands Road Car Park for approximately 40 dwellings
- Within the Grounds of Downlands Park for approximately 20 dwellings.

This amount of development is in line with the emerging Mid Sussex District Plan and is within the numbers assessed in the District Plan HRA. All of these sites are outside the 7km zone of influence and as such, are not considered to have a likely significant effect on the Ashdown Forest SPA and SAC.

**5.4 Are there any other projects or plans that together with the Haywards Heath Neighbourhood Plan could impact on the integrity of a European site, the ‘in combination’ impact?**

Yes, the emerging Mid Sussex District Plan 2014-2031 and other neighbourhood plans being produced in the District, especially those within the 7km zone. It is considered that the level of development proposed in the Haywards Heath Neighbourhood Plan has been assessed as part of the housing strategy considered through the District Plan HRA.

The Haywards Heath Neighbourhood Plan may also have an in combination effect with other plans being produced by local authorities that have land within the 7km zone, such as Wealden District Council, Lewes District Council and Tunbridge Wells Borough Council. It is understood though that with regards to recreational disturbance, Wealden District Council and Lewes District Council will be making provision for SANG and contributing to the wider Joint SAMM Strategy that is currently being prepared. Any development in Tunbridge Wells Borough only needs to make a contribution towards SAMM measures.

## Screening Assessment

- 5.5 The following table illustrates the findings of the screening assessment for each of the policies within the Haywards Heath Neighbourhood Plan. This assesses whether there is a likely significant effect from these policies on the Ashdown Forest SPA and SAC.
- 5.6 For it to be concluded that a policy would have no likely significant effect on a European site, one of the following reasons usually applies (this is taken from the guidance for Scottish Natural Heritage, p19-20):
- Intended to protect the natural environment, including biodiversity, or to conserve or enhance the natural, built or historic environment, where enhancement measures will not be likely to have any negative effect on a European site;
  - Which will not themselves lead to development or other change, for example, because they relate to design or other qualitative criteria for development or other kinds of change;
  - Which make provision for change but which could have no conceivable effect on a European site, because there is no link or pathway between them and the qualifying interests, or any effect would be a positive effect, or would not otherwise undermine the conservation objectives for the site;
  - Which make provision for change but which could have no significant effect on a European site (but is a minor residual effect), because any potential effects would be insignificant, being so restricted or remote from the site that they would not undermine the conservation objectives for the site;
  - For which effects on any particular European site cannot be identified, because the policy is too general, for example, it is not possible to identify where, when or how the policy may be implemented, or where effects may occur, or which sites, if any, may be affected.

<b>Haywards Heath Neighbourhood Plan Policy</b>	<b>Policy</b>	<b>Comment</b>	<b>Likely Significant Effect on the Ashdown Forest SPA and SAC</b>
Policy E1	Protection of open spaces	This policy relates to open spaces and seeks to resist their loss.	No likely significant effect – reason a).
Policy E3	Allocates land for new allotments	This policy relates to allotments.	No likely significant effect – reasons a) and c).
Policy E4	Allocates land for a new cemetery	This policy relates to cemetery provision.	No likely significant effect – reason c).
Policy E5	Designates land as a local gap	This policy relates to avoiding coalescence between settlements.	No likely significant effect – reason a).

<b>Haywards Heath Neighbourhood Plan Policy</b>	<b>Policy</b>	<b>Comment</b>	<b>Likely Significant Effect on the Ashdown Forest SPA and SAC</b>
Policy E6	Requires major development to promote green infrastructure opportunities	This policy relates to green infrastructure improvements.	No likely significant effect – reason a).
Policy E7	Seeks to encourage sustainable drainage	This policy relates to Sustainable Drainage systems.	No likely significant effect – reason b).
Policy E8	Criteria-based policy setting out design principles for major development	This policy relates to making the town more sustainable and seeks to ensure major developments meet a number of criteria.	No likely significant effect – reason b).
Policy E9	Criteria-based policy seeking to reinforce local character	This policy relates to local character and sets out criteria in relation to design elements.	No likely significant effect – reason b).
Policy E10	Seeks to retain special character in Areas of Townscape Character	Seeks to ensure development proposals in Areas of Townscape Character retain the special character of the area.	No likely significant effect – reason b).
Policy E11	Visual impact	This policy seeks to address any visual impact issues that may arise from major development or from development at prominent locations.	No likely significant effect – reason b).
Policy E13	New residential development and outdoor space	This policy seeks to secure good outdoor space commensurate with the size and type of dwellings.	No likely significant effect – reasons a) and b).
Policy B1	Retail development	This policy sets out criteria against which retail applications will be determined in the town centre and local centres.	No likely significant effect – reason b).

<b>Haywards Heath Neighbourhood Plan Policy</b>	<b>Policy</b>	<b>Comment</b>	<b>Likely Significant Effect on the Ashdown Forest SPA and SAC</b>
Policy B2	Encouraging a range of uses in the town centre	This policy seeks to encourage diversification in the town centre in order to bolster the economy through footfall.	No likely significant effect – reasons b) and c).
Policy B3	Modernisation/ redevelopment of existing commercial sites	This policy seeks to improve the commercial and employment offer of Haywards Heath.	No likely significant effect – reasons b) and c).
Policy T1	Providing good pedestrian and cycling connections	<p>This policy requires new major development to fully integrate with the town centre and other local destinations to allow for pedestrian and cycle movement.</p> <p>Whilst it is unlikely that the policy will have a significant effect on Ashdown Forest, enhancements to the footpaths/ cycle way network could improve public access to Ashdown Forest.</p>	No likely significant effect – reasons c) and e). The policy is general and does not specify where enhancements will be made. Should a particular route lead onto or towards Ashdown Forest further consideration may be required as to any potential impact.
Policy T2	Funding of cycle routes	Seeks contributions towards cycle routes to Haywards Heath railway station and town centre from major development.	No likely significant effect – reasons c) and e). The policy is general and does not specify where enhancements will be made. Should a particular route lead onto or towards Ashdown Forest further consideration may be required as to any potential impact.
Policy T3	Loss of off-street parking provision	This policy seeks to resist the loss of off-street parking.	No likely significant effect – reason b).

<b>Haywards Heath Neighbourhood Plan Policy</b>	<b>Policy</b>	<b>Comment</b>	<b>Likely Significant Effect on the Ashdown Forest SPA and SAC</b>
Policy H1	Land is allocated either side of Hurstwood Lane for a mixed used development	This policy allocates land at Hurst Farm for approximately 350 homes together with a school and informal open space to include a burial ground and allotments.	No likely significant effect – reason d). (The burial ground and allotments element has been considered above in Policies E3 and E4). Haywards Heath is outside of the 7km zone of influence for recreational disturbance and is 10.28km from the boundary of the Ashdown Forest SPA.
Policy H2	Land south of Rocky Lane and west of Weald Rise	This policy allocates land at south of Rocky Lane and west of Weald Rise for 190 homes.	No likely significant effect – reason d). Haywards Heath is outside of the 7km zone of influence for recreational disturbance and is 10.28km from the boundary of the Ashdown Forest SPA.
Policy H3	Caru Hall	Allocates land at Caru Hall for approximately 12 dwellings.	No likely significant effect – reason d). Haywards Heath is outside of the 7km zone of influence for recreational disturbance and is 10.28km from the boundary of the Ashdown Forest SPA.
Policy H4	Rear of Devon Villas	Allocates the rear of Devon Villas for approximately 10 dwellings.	No likely significant effect – reason d). Haywards Heath is outside of the 7km zone of influence for recreational disturbance and is 10.28km from the boundary of the Ashdown Forest SPA.

<b>Haywards Heath Neighbourhood Plan Policy</b>	<b>Policy</b>	<b>Comment</b>	<b>Likely Significant Effect on the Ashdown Forest SPA and SAC</b>
Policy H5	Beech Hurst Depot	Allocates Beech Hurst Depot for approximately 15 dwellings.	No likely significant effect – reason d). Haywards Heath is outside of the 7km zone of influence for recreational disturbance and is 10.28km from the boundary of the Ashdown Forest SPA.
Policy H6	Harlands Road Car Park	Allocates the site for approximately 40 dwellings.	No likely significant effect – reason d). Haywards Heath is outside of the 7km zone of influence for recreational disturbance and is 10.28km from the boundary of the Ashdown Forest SPA.
Policy H7	Within Grounds of Downlands Park	Allocates land for approximately 20 bungalows in C2 use.	No likely significant effect – reason d). Haywards Heath is outside of the 7km zone of influence for recreational disturbance and is 10.28km from the boundary of the Ashdown Forest SPA.
Policy H8	Housing development within the built-up area boundary	This policy seeks to set criteria by which housing development within the built-up area boundary will be determined.	No likely significant effect – reason b).
Policy H9	Extensions to existing dwellings	This policy seeks to set criteria by which extensions to dwellings will be determined.	No likely significant effect – reason b).
Policy L1	Clair Hall	This policy relates to the retention of Clair Hall.	No likely significant effect – reason b).
Policy L2	Dolphin Centre	This policy relates to the retention of the Dolphin Leisure Centre	No likely significant effect – reason b).

<b>Haywards Heath Neighbourhood Plan Policy</b>	<b>Policy</b>	<b>Comment</b>	<b>Likely Significant Effect on the Ashdown Forest SPA and SAC</b>
Policy L3	Land is allocated as open space	This policy relates to land at Hurst Farm which is allocated for open space to provide a landscape setting to the proposed allotments and cemetery.	No likely significant effect – reason a).
Policy L4	Proposed Bluebell Railway western extension	This policy relates to the route of the proposed Bluebell Railway western extension to Haywards Heath and its terminus at Haywards Heath railway station and that it will be protected from development that prevents its completion.	No likely significant effect – reason b). (Although the opening of this stretch of the rail line may lead to increased visitors to Horsted Keynes and East Grinstead within the 7km zone of influence, it is not anticipated that it would increase recreational disturbance on Ashdown Forest itself).
Policy L5	Provision of community buildings	This policy seeks to support the provision of new community buildings.	No likely significant effect – reason b).
Policy L8	St Francis sports site	This policy supports the enhancement of sports facilities.	No likely significant effect – reason b).
Policy L9	Playing fields and sports facilities	This policy seeks to retain and enhance playing fields and sports facilities in the town.	No likely significant effect – reasons a) and b).

5.7 The screening assessment looks at the policies individually (alone) to identify if there is an effect on the European site. It is possible to apply straightforward mitigation measures to the plan if there are any policies likely to have a significant effect alone, and then re-screen the policy to see if it can then be determined no likely significant effect. Examples of straightforward mitigation include the deletion of the policy, alteration of the spatial distribution of the potentially damaging proposal or reduction in the scale of the potentially damaging proposal. It is considered, however, that the type of mitigation proposed by the District Plan HRA (that is, SANG and SAMM) is more complex and bespoke and, therefore, should be tested through the next stage, the appropriate assessment.

- 5.8 No policies in the Haywards Heath Neighbourhood Plan were found to have a likely significant effect alone on the Ashdown Forest SPA and SAC. Policies H1, H2, H3, H4, H5, H6 and H7 concerning housing allocations are not considered to result in a likely significant effect, but it is possible there could be a minor residual effect (reason d)). As described in the screening assessment table, Haywards Heath town is 10.28km from the boundary of the Ashdown Forest SPA and outside the 7km zone of influence so there is unlikely to be an in-plan in combination effect (that is, there is unlikely to be an in combination effect from the policies in the Neighbourhood Plan). Any wider in combination effect with other plans will be considered in the section below.

### **In Combination Effects**

- 5.9 Other neighbourhood plans and windfall sites within the 7km zone in Mid Sussex will be required to provide mitigation for development where there is a net increase in dwellings and any in combination effect will be taken into account through the overall mitigation strategy. Policies that propose residential development in neighbourhood plans in Mid Sussex outside the 7km zone of influence are considered to have an insignificant effect on the Ashdown Forest SAC and SPA (as assessed through the District Plan HRA) although this will be explored in further detail in the HRAs of those neighbourhood plans.
- 5.10 This also applies to plans being produced by local authorities that have land within the 7km zone, such as Wealden District Council, Lewes District Council and Tunbridge Wells Borough Council. It is understood that with regards to recreational disturbance, Wealden District Council and Lewes District Council will be making provision for SANG and contributing to the wider Joint SAMM Strategy that is currently being prepared. Any development in Tunbridge Wells Borough only needs to make a contribution towards SAMM measures.
- 5.11 To mitigate the development set out in the allocations at Uckfield, Crowborough and Maresfield identified in the Wealden District Core Strategy, both SANG and SAMM will be required. Lewes District Council is considering options for delivering a SANG and will also require contributions towards SAMM<sup>6</sup>. Tunbridge Wells Borough Council has not allocated any sites within the 7km zone of influence, but contributions may be provided towards SAMM where appropriate<sup>7</sup>. All affected local authorities are involved in the development of the Joint SAMM Strategy and their work on mitigation described above demonstrates their commitment to protecting the Ashdown Forest SPA and SAC under the Habitats Regulations.
- 5.12 Ongoing monitoring of birds, visitors and the SAMM projects at Ashdown Forest as well as monitoring visitors at the SANG will ensure that mitigation remains effective. Adjustments can be made to the mitigation strategy and tariff if deemed necessary. Monitoring and any adjustments will be examined through the SANG and SAMM strategies.

## 6.0 Conclusion of the Screening Assessment

- 6.1 The screening assessment table above shows that there would be no likely significant effects on the Ashdown Forest SPA and SAC from the policies included within the Haywards Heath Neighbourhood Plan. A full HRA (that is, the appropriate assessment stage that ascertains the effect on integrity of the European site) of the Haywards Heath Neighbourhood Plan is not required as the development proposed in the Neighbourhood Plan is outside of the 7km zone of influence and, therefore, unlikely to have a significant effect on the Ashdown Forest SPA and SAC. The Habitats Regulations have also been considered during the independent examination of the Haywards Heath Neighbourhood Plan.
- 6.2 As a precautionary measure, any residential development proposed within Haywards Heath Parish will be subject to the recommendations of the HRA and if relevant, the current approach to Ashdown Forest being implemented at that time. Applicants for planning permission are advised to contact the District Council for further advice prior to submitting a planning application.
