## Strategic Housing and Economic Land Availability Assessment (SHELAA)

April 2020

## CONTENTS

1.0	INTRODUCTION .....	2
2.0	METHODOLOGY IN BRIEF .....	2
3.0	2020 REPORT .....	3
4.0	RESULTS AND ANALYSIS .....	3

## 1.0 Introduction

- 1.1 The National Planning Policy Framework (“NPPF”) requires local planning authorities to produce a strategic housing and economic land availability assessment to identify sufficient land to meet their housing need over the plan period (NPPF, paragraph 67). The Planning Practice Guidance (PPG) goes on to state that local planning authorities should also assess the existing and future supply of land for economic development (PPG, Paragraph: 001 Reference ID: 3-001-20190722).
- 1.2 The Assessment is an evidence-gathering exercise which identifies the location of potential housing and employment sites in the District to inform the plan-making process. It does not in itself determine whether a site should be allocated for housing development but is the first step in the process

The purpose of this Document is to:

- Identify sites and broad locations with potential for housing and employment;
  - Assess their development potential; and
  - Assess their suitability for development and the likelihood of development coming forward.
- 1.3 **The SHELAA should be seen as a wide-ranging ‘palette of sites’ to inform possible choices for the development plan documents. It is an aid to plan-making only, presenting the facts about available housing and employment land. It is not a statement of Council policy and does not rank or compare sites. It does not allocate land, pre-empt or prejudice any decision the Council may make in the future on any particular site or settlement and does not alter any existing policies or land use designations as set out in the Development Plan.**

## 2.0 Methodology in brief

- 2.1 The Council has produced this Document in accordance with the published Strategic Housing and Employment Land Availability Assessment Methodology (April 2018) which is available to view on our website. It closely follows the recommended process set out in the Government Practice Guidance<sup>1</sup>. Guidance states where standard methodology is followed correctly, “a local planning authority should not need to justify the methodology used in preparing its Assessment, including at independent examination”.
- 2.2 The preparation of the SHELAA methodology has involved liaison with key stakeholders including representatives from the development industry and local authorities within the functional housing and economic market areas<sup>2</sup>.
- 2.2 This SHELAA represents a significant change from the SHLAA (2016) and SELAA (2016) previously published. It is a new type of document both in terms of content and format. The SHELAA is now comprises a long list of nominated sites, that will be considered further in the Site Selection Report. There is a map for each site along with a completed pro forma that sets out the constraints and an initial conclusion regarding the suitability, availability and achievability of sites, along with an indicative timescale of delivery. There is a list of site that are excluded from detailed assessed as it is not of a scale that meets the size threshold. Summary maps have also been prepared which identifies SHELAA sites by location.

---

<sup>1</sup> National Planning Policy Guidance

<sup>2</sup> Further information on this liaison is set out within the SHELAA Methodology (April 2018)

- 2.3 Whilst the SHELAA forms part of the evidence base that informs the preparation of Development Plan documents, a series of Site Selection Papers identify which sites are suitable for allocation. It is the role of Site Selection Papers to provide a more detailed assessment of the sites set out in the SHELAA. It will look in more detail at constraints and opportunity of sites and provide a more detailed assessment of delivery timescales.

### 3.0 2020 Report

- 3.1 This report is an update to the report published in 2018. The 2018 report provided the palate of sites for the commencement of work on the Site Allocations Document. The Council operates a 'rolling' call for sites, so that details of sites can be submitted at any time. The web site advised that after 1<sup>st</sup> August 2018 no further sites would be added into the SHELAA and the next opportunity to promote a new site would be through the Site Allocations Document regulation 18 consultation which took place in Autumn 2019. This was to enable technical work to be undertaken on sites.
- 3.2 18 new housing sites and 6 new employment sites have been included in the 2020 report including those submitted through the 'rolling' call for sites and those formally submitted to the Regulation 18 consultation of the Site Allocation DPD.

#### Time Period of the Strategic Housing and Economic Land Availability Assessment

- 3.3 The Assessment uses the base date of '**1<sup>st</sup> April 2020**'.

### 4.0 Results and Analysis

- 4.1 There are 254 housing sites and 101 employment site in the Assessment. These are listed in site ID order in Appendix 1- Housing Sites, Appendix 2 – Employment Sites. 8 sites were excluded as they did not meet the size threshold, these are listed in Appendix 3. A list of commitments is set out in Appendix 4.
- 4.2 Summary maps have also been produced, which set out the SHELAA sites by location. These are available to view on the Council web site at <http://www.midsussex.gov.uk/planning-licensing-building-control/planning-policy/local-development-framework/evidence-base/strategic-housing-land-availability-assessment/>
- 4.3 A windfall study and information relating to housing land supply are published separately to this report.
