Context image

GPS verified Latitude / Longitude 51.102109, -0.097787
GPS verified elevation 167.321m AOD.
Approximate distance to closest edge of Site 132m to the southwestern boundary of the Site.

Notes: Cylindrical panoramic image - **to be viewed printed on A1 paper** (see instructions for viewing below). This represents a 125% enlargement with 71.67 degree Horizontal Field of View and 21.86 degree Vertical Field of View (refer to Technical Methodology at the end of this Appendix). If printed on A3 paper this image is for context only.

Instructions for viewing printed: This image must be printed on A1 paper and then viewed at comfortable arm's length (exact mathematical reference point = 542mm from eye to image) by maintaining the head in a constant position (without turning) and panning the image from side to side - this maintains a constant viewing distance across the panorama and provides the best recommended representation of the view found on site.

NOTE: Photomontage shown without mitigation planting or building finishes.
