6 Policy Approaches	136

Executive Summary

Introduction

1. Nexus Planning, alongside NEMS Market Research, was commissioned by Mid Sussex District Council in September 2021 to prepare the Mid Sussex Retail Study 2021. The Retail Study is expected contribute to the evidence base that will inform the emerging District Plan to cover the period up to 2038.
2. The following key elements have been completed as part of the Study:
 - Updated assessment of the latest retail and leisure trends, and impacts of these;
 - A review of the latest national and local policy on retail, leisure, other town centre uses and town centres generally;
 - An analysis of the empirical research prepared by NEMS through a household telephone survey of 1,000 households;
 - A capacity assessment of 'need' for new retail and leisure floorspace over the District Plan period to 2038;
 - Health check assessments of the District's main centres including Burgess Hill, East Grinstead and Haywards Heath, and the following villages of the Category 2 settlements: Copthorne, Crawley Down, Cuckfield, Hassocks and Keymer, Hurstpierpoint and Lindfield;
 - Engagement with key stakeholders of the centres subject of the health check work;
 - A review of adopted policies in the Mid Sussex District Plan 2014-2031 relating to town centres and retailing, and recommendations for revised policy wording; and
 - Review of and recommendations for town centre boundaries, retail hierarchy and retail impact assessment thresholds.

Retail & Leisure Trends

3. In order to set the scene for the Study, we have provided an overview of the recent and trends that form the backdrop for retail, leisure and town centre activity at the present time. The retail property landscape in the UK has seen dramatic changes over the last 50 years. The post-war years saw a significant redevelopment effort focused on town centres. However, during the 1990s and 2000s, the retail landscape changed following the introduction of retail warehouse parks and large out-of-town shopping centres and retail parks. More recently, the shift to 'town centre first' policy approach has seen a shift back to development focussed on town centre locations.

4. Set against an already volatile economy following Brexit uncertainty, the UK economy has experienced a significant shock as a result of the Covid-19 pandemic. Following the emergence of the virus at the beginning of 2020, the subsequent restrictions on movement and behaviour through a series of national lockdowns have sought to mitigate its impact. This uncertain background has caused business investment and expenditure to decline, which has had a knock on effect for retailing.
5. While the retail and leisure sectors are dynamic at the best of times, there is no denying that town centres are still feeling the impacts of the Covid-19 pandemic.
6. Consumer expectations are also continually evolving, producing a dynamic retail market. Providers operating in the market are required to evolve as a result of numerous dynamic factors, including: the characteristics of the UK population; consumer demands; popularity in private car ownership; planning policy; and digital advances. The diverse nature of factors which form consumer expectations is forcing retailers to pursue new innovative development proposals. Consumers are seeking more out of their shopping experience.
7. Long term trends such as online shopping have also impacted on the retail sector, however despite the increasing popularity of shopping online, there will always be a need and demand for physical stores. The vast majority of convenience sales are made in store, and even when groceries are purchased online and delivered, the majority of orders are selected by staff from shelves in physical stores.
8. For comparison goods shopping, the requirement for physical stores is expected to remain as shoppers opt to enjoy the experience of viewing items in person. However, this shopping experience will need to evolve and diversify, seeking to engage shoppers on an experiential level. Whilst the sector is continually evolving and there are a number of ongoing success stories, recent headlines have focussed on failing retailers and store closures.
9. The greater availability of high street units for leisure purposes appears to have helped stoke an entrepreneurial spirit in recent years, with a number of centres beginning to benefit from a greater focus on independent leisure, and food and drink retailers and also modern markets, which are frequently focussed around food and drink operators. New cinemas have been developed close to the shopping core, and other 'competitive socialising' concepts, which include bowling, crazy golf, table tennis, darts, axe-throwing and other seemingly niche pursuits, have been met with success. More generally, the gym market continues to perform well.

10. There is a concern that the implications of the pandemic will be particularly felt on the leisure sector. The full impact on the leisure sector as a whole will really evolve throughout the remainder of 2022 and into 2023, and it is clear that the industry is not 'in the clear' yet.

Health Check Assessments

11. With the backdrop of retail and leisure trends in mind, the Study has undertaken a health check assessment for each of the District's three Category 1 settlements (Burgess Hill, East Grinstead, and Haywards Heath), and the six Category 2 settlements (Copthorne, Crawley Down, Cuckfield, Hassocks and Keymer, Hurstpierpoint and Lindfield). Notably, each of the Category 2 settlements (with the exception of Copthorne) are also defined as Village Centres under Policy DP3 in the current Mid Sussex District Plan (2014-2031). The health check assessments provide a snapshot of how the respective centres are performing at present.
12. The health check assessments build on our analysis of market trends. We supplement this analysis with three sources of new empirical evidence; our town and village centre surveys, stakeholder engagement, and responses to the NEMS Household Telephone Survey. By combining the findings of our engagement with local groups, residents and businesses, the Household Survey results, our on-the-ground observations, and desktop research, we have built a picture of the current health of the centres, based on performance against the range of health check indicators set out in the NPPF / PPG.
13. We have benchmarked the composition of each centre, as summarised in Figure A.

Figure A. Town & Village Centre Composition (2021)

	Burgess Hill	East Grinstead	Haywards Heath	Copthorne	Crawley Down	Cuckfield	Hassocks	Hurstpierpoint	Lindfield	UK Average
Convenience (%)	7.6	7.9	6.7	25.0	40.0	6.1	14.6	15.4	17.5	9.2
Comparison (%)	25.8	27.1	37.7	16.7	10.0	36.4	25.5	30.8	27.5	27.1
Retail Services (%)	19.2	21.8	17.0	25.0	20.0	24.2	25.5	21.2	20.0	15.6
Leisure Services (%)	20.7	21.4	17.5	16.7	10.0	24.2	12.7	19.2	25.0	24.6
Fin. & Bus. Services (%)	12.1	14.4	12.6	16.7	0	6.1	12.7	7.7	7.5	9.1
Vacant (%)	14.7	7.4	8.5	0	20.0	3.0	9.1	5.8	2.5	14.2
Total (#)	198	229	223	12	10	33	55	52	40	

14. The key takeaways for each of the assessed centres are set out below:

Burgess Hill

- The ongoing delay of the redevelopment of the Martlets Shopping Centre is having a negative impact on the overall vitality and viability of Burgess Hill Town Centre. The uncertainty surrounding the redevelopment is likely to continue deterring wider investment;
- Enhancement to the overall public realm and landscaping will be integral to improving the environmental quality of the town centre and would have significant benefits for the appearance and perception of the area. The Church Road and Church Walk corridor is identified as an area for improvement in both the Town Wide Strategy and Neighbourhood Plan. These works would in turn assist in generating further investment in the wider town centre;
- The centre has vacancy rate of 14.6% of the overall composition in the centre which has increased from 13.2% in 2014. While this is not significantly higher than the UK average, it is notable, and likely partly a result of the uncertainty surrounding the redevelopment of the Martlets Shopping Centre;
- Although Burgess Hill is one of the larger centres in the District, the range of shops, cafes, pubs and restaurants is limited as highlighted by responses to NEMS Household Survey. The evening economy was also found to be lacking. The ongoing uncertainty surrounding the redevelopment of the Martlets Shopping Centre is once again likely to be having an impact on the desire for leisure operators to enter Burgess Hill Town Centre.

East Grinstead

- While the town centre is serviced by buses and a railway station, public transport links could be improved, and in particular, links to Gatwick Airport. As noted through the stakeholder engagement, stakeholders noted that public transport is relatively limited and bus provision is considered to be particularly poor. Bicycle facilities could be improved to help attract cyclists;
- There is an opportunity to improve the link and wayfinding between the core town centre and the railway station;
- The centre has a successful offering of independent units and this is seen to be a strength that should be harnessed as much as possible;
- The historic environment provides an important platform to market the town as a destination with a particular focus on the unique historic character including linking the centre with

existing tourist facilities such as the Bluebell Railway nearby;

- The quality and attractiveness of shopfronts decreases as you move northbound and away from the historic buildings on the High Street. A joined up approach to shopfront improvements could be utilised as a strategy to improve the attractiveness of East Grinstead Town Centre;
- The majority of the units in the centre close at 5:30pm, limiting the potential for an established night time economy. However 35.1% of respondents to the NEMS Household Survey rated the provision of evening economy as either 'plentiful' or 'good', which indicates that while there is room for improvement, the provision of evening uses is okay.

Haywards Heath

- Buildings in the centre would benefit from upgrading or repainting in order to improve the appearance and perception of the area, and overall environmental quality;
- Public realm upgrades would also provide wider benefits in maximising development and investment opportunities, as well as improving the experience of pedestrians;
- An opportunity exists related to the Orchards Shopping Centre, which is in Council ownership. The Masterplan identifies this site for possible improvements, and mixed-use development. If viable, residential development could be incorporated;
- Comments from stakeholders suggested that there was an under provision of supermarkets in the centre, and that more variety in convenience goods floorspace would benefit the town centre;
- While the town has a railway station, this is located outside of the town centre, providing less opportunities for linked trips. However, the station and The Broadway are less than a 10 minute walk. Pedestrian and cycle links could be improved between the railway station and the town centre to connect the station and the surrounding retail offer with the town centre;
- There is a concentration of leisure and retail services along the Broadway, while the majority of comparison goods shops are located along the South Road. This creates a disconnect between these two very distinct parts of the town centre. In order to capitalise on the distinct character areas, better pedestrian connections could be provided to provide a clear link, and attract movement between the two.

Copthorne

- Despite the centre sufficiently providing for the immediate day to day essentials for the local residents, the centre lacks a community centre or sufficient places for people to gather;
- There is a very limited offer of leisure services within the village, and therefore it is likely that local residents travel to neighbouring villages or areas that have more variety;
- It was identified by stakeholders that street lighting was not adequate in the area. Improvements to the street lighting and wider public realm would help to create a sense of place for the village.

Crawley Down

- The centre's offer is local in nature, and the diversity of uses is akin to its status as one of the smaller centres in the Study;
- Stakeholders identified that there may need to be more CCTV cameras to improve the safety of crime in the area;
- There is an opportunity present in the vacant Royal Oak pub, which could be renovated and reopened to provide more vibrancy to the centre;
- It is acknowledged that there is a lack of development sites and available units for new businesses to enter the centre.

Cuckfield

- Comparison stores are well represented, while the centre suffers from a lack of convenience stores with only two units identified in the overall composition. This was confirmed through the NEMS Household Survey and stakeholder engagement, when stakeholders identified that additional grocery stores would provide increased diversity in the retail offer;
- The centre benefits from an attractive environment, and it is a destination for both residents and tourists to visit;
- There is a lack of car parking within the centre, and the current on street parking arrangement can create issues for congestion. Car parking management and traffic calming measures may need to be considered to assist in alleviating this issue.

Hassocks

Mid Sussex Retail Study

- The provision of cafes, restaurants and pubs is limited, and a more appealing offer would assist in contributing to a more vibrant evening economy;
- Stakeholders and the NEMS Household Survey both identified a lack of parking as an issue for the vitality of the village centre. Parking and traffic management may assist in alleviating some of these concerns;
- The environmental quality of the centre could be improved, and a public realm strategy may be beneficial in helping facilitate this;
- The centre is a popular place for cycling however cycle parking is lacking. Improving cycle facilities may further assist in drawing cyclists to the area.

Hurstpierpoint

- Public realm improvements such as street lighting and repairs and widening of the public footpath would further enhance the attractiveness of the centre;
- In centre parking is in short supply which detracts from the visitor experience. Implementing parking management measures may assist in improving the experience for motorists and pedestrians alike;
- Congestion is an issue at peak times, and traffic calming measures might assist in improving the situation;
- Additional signage within the centre and to the car park would assist in improving legibility.

Lindfield

- The centre is predominantly comprised of independent retailers and other operators, which is considered to be a strength of the centre;
- The centre has a thriving evening economy as reported through the NEMS Household Survey and stakeholder sessions, and the pubs and restaurants trade strongly;
- There is a lack of available vacant premises and very few clear development sites. This, combined with the cost of units when they do become available make it difficult for new businesses to enter the centre;
- The provision of cycle lanes and routes would assist in connecting the neighbouring villages and creating more linked trips;

- Parking provision is limited on the High Street and there are very few off street car parking spaces. However car parking was not raised as a major issue by stakeholders or by respondents to the Household Survey, and a high proportion of visitors generally walk to the centre.

Future Needs

Market Share and Performance

15. Adopting Experian MMG3 population growth rates, we identify that the population of the Study Area (Zones 1-10) is forecast to grow by 10.4% from 282,609,919 in 2021 to 311,943 by 2038. Applying appropriate growth rates and discounting special forms of trading, we arrive at potential expenditure levels available of £735.2m in convenience goods, and £1,641.5m in comparison goods at 2038.
16. We then isolated where residents of the District undertook their convenience shopping trips. The results show that the District retains 63.1% (£425.1m) of its own residents' spending on convenience goods. Of this, town centres and villages account for 11.7% of all spend carried out in the District while the majority of convenience goods spending in Mid Sussex is carried out in out-of-centre locations outside of the main centres of Burgess Hill, East Grinstead, and Haywards Heath (51.4%). Approximately 36.9% (£248.2m) of convenience good trade 'leaks' elsewhere to destinations such as Crawley and Brighton.
17. Compared to the Council's previous evidence base (Mid Sussex Retail Study Update, 2014), convenience spend retained within the District has slightly increased from 61.4% to 63.1% in 2021. This has largely been driven by an increase in spending at out-of-centre foodstores (increased from 47.2% to 51.4%), whilst spending decreased to Burgess Hill (from 6.2% to 2.5%) and East Grinstead (5.7% to 3.2%) with Haywards Heath remaining relatively consistent (1.2% to 1.1%). This demonstrates that the increased draw of out-of-centre facilities has come at the expense of Burgess Hill and East Grinstead in particular, whilst Haywards Heath has remained relatively consistent, albeit drawing a lower level of spending.
18. Based on the survey findings, we also estimate that comparison goods retailers within the District attracted a combined turnover of £242.2m at 2021. This represented a 32.6% market share of overall available comparison goods spending (£982.8m). Contrary to our findings for convenience goods spending, town centre locations are the most popular destination in Mid Sussex, accounting for 24.6% of the market share, with just 8.0% to out-of-centre facilities.
19. Leakage out of the District equated to 67.4%, which is indicative of the geographic relationship of

the District with other major towns nearby including Crawley to the north, and Brighton to the south. Both towns provide a larger offer of comparison goods, and therefore account for a significant part of the leakage rates, attracting 29.5% and 15.9% respectively.

20. Assessed against 2014 data, leakage outside of the District has increased somewhat from 64.7% to 67.4% in 2021. Within Mid Sussex, whilst trading to the town centres currently exceeds the draw of out of centre facilities, this is shown to have fallen from 33.2% to 24.6%, whilst out-of-centre stores have increased their market share from 2.2% to 8.0%.
21. Broken down across the key centres, Burgess Hill market share has fallen from 9.6% to 4.0% (likely due to delays associated with the town centre regeneration scheme), whilst East Grinstead has remained resilient (8.1% to 8.0%) and Haywards Heath has grown from 7.8% to 11.4%.

Convenience Capacity

22. Based on the household survey, we identify that convenience retailers within Mid Sussex turnover an estimated £425.0m, which is higher than the benchmark turnover of all those facilities, which is £370.7m at 2021. This 'over-trade' equates to £54.3m of additional expenditure across the District at 2021, or 14.6% above company averages.
23. Further assessments of turnover against national company averages for benchmarking identified that facilities across each of Burgess Hill, East Grinstead, and Haywards Heath were 'under-trading', below national averages. Comparatively, convenience retailers outside of each of the main centres were found to be 'over-trading' above national averages, further evidencing the strong performance of out-of-centre convenience facilities across the District.
24. On a more local level, where national retailers with benchmark data is available, it was found that facilities across the District's Village Centres performed above national averages, demonstrating the relative strength of these local facilities; a trend that has increased since the lockdowns associated with the Covid-19 pandemic.
25. Once committed developments are accounted for, which equate to a net convenience floorspace of 1,380 sq m and an estimated turnover of £12.1m, we are then able to determine the extent of any residual expenditure which is available to support additional convenience floorspace.
26. There is immediate capacity for additional convenience floorspace within the District, equivalent to between 3,300 and 5,700 sq m net at 2021, rising over the plan period to between 6,000 and 9,900 sq m net by 2038. The majority of this capacity is a result of the significant over-trade of existing

foodstores and relatively low anticipated growth rates for convenience floorspace turnover, rather than a direct result of additional resident population and spending.

27. However, capacity modelling does not necessarily equate to need. Given the poorer performance of stores within existing town centres and the availability of vacant retail floorspace identified within each of Mid Sussex's key town centres, we do not suggest that the Council would require additional convenience retail allocations over the plan period, particularly where these would further compete with existing town centre facilities.

Comparison Capacity

28. Taking account of inflow, population and expenditure growth and forecast floorspace efficiencies, we identify a small comparison goods deficit expenditure of -£4.9m at 2026, rising to £20.4m by 2038. As with convenience capacity modelling, we have taken account of committed comparison retail goods floorspace, which equates to a total of just 580 sq m, or £3.1m of committed comparison goods turnover.
29. Accounting for these commitments, we identify a residual expenditure deficit through to 2031, with a surplus arising at 2036, increasing to £15.3m at 2038. We go on to utilise average sales densities for high street retailers (the upper end of what could be achieved) to provide assumed minimum floorspace estimates and average sales densities for bulky goods retailers (the lower end of what could be achieved) to provide assumed maximum comparison goods floorspace capacity estimates.
30. This available residual spend equates to a comparison goods floorspace capacity arising by 2036 of between 800 sq m and 1,100 sq m, rising to an estimated capacity of between 1,400 sq m and 1,900 sq m at 2038. In light of the deficit in comparison goods floorspace capacity over the short-medium term, and the relatively minimal growth thereafter, we would not recommend that the Council seeks to specifically allocate any additional comparison goods floorspace.

Leisure Capacity

31. We considered in detail the market shares for the various different categories of leisure provision, and our results and the findings of the household surveys showed that the District was self-sufficient in respect of indoor health and fitness (gyms), restaurants, pubs, bars and nightclubs, whilst residents also regularly visited facilities in Crawley (particularly for cinema, bowling and bingo).
32. Whilst the proposed redevelopment plans for The Martlets in Burgess Hill incorporates both cinema and bowling facilities, our benchmark capacity assessment did not identify any significant gaps in the

leisure offer of the District that would justify further allocations.

33. In terms of restaurants, pubs, bars and cafés, we identified spending capacity for new operators over the plan period. However, as 'main town centre uses', new food and beverage facilities should consider the potential re-occupation of vacant floorspace in the first instance in accordance with the sequential test and 'town centre first' principles.

Policy Approaches

34. The Study builds upon the work undertaken, and presents a series of recommendations for the Council to consider in the development of policies within the emerging Local Plan, in addition to longer-term non-policy recommendations and approaches to enhance the vitality and viability of the District's centres.
35. In terms of the Council's town centre hierarchy, we undertook a baseline analysis in order to consider the position of the centres against the Council's adopted settlement hierarchy. As summarised in Figure B, we consider Burgess Hill, East Grinstead and Haywards Heath function as Tier 1 'Main Town Centres', and Cuckfield, Hassocks, Hurstpierpoint, Lindfield and Crawley Down as Tier 2 'Large Village and Local Centres'. Notably, we do not consider that Copthorne's offer and function align with the definitions for the town centre hierarchy and would suggest that it functions more as an undesignated Neighbourhood Parade.

Figure B. Recommended Town Centres Hierarchy

Tier	Description	Centres
Tier 1 – Main Town Centres	Provides a significant range of shops, services, businesses, community facilities, employment opportunities, serving a broad area including smaller neighbouring towns.	Burgess Hill, East Grinstead and Haywards Heath
Tier 2 – Large Village and Local Centres	Provides, or has the potential to provide, a range of shops, services, businesses and community facilities, to serve the immediate local area.	Cuckfield, Hassocks, Hurstpierpoint and Lindfield Crawley Down

36. We go on to make a series of suggested revisions to the existing town centre boundaries and primary shopping areas, in particular contracting areas that are isolated, operate as a distinct separate parade of shops, or do not function as part of the collective retail, leisure, commercial and service offering of 'main town centre uses' that make up the relevant centres. We have also paid due regard to proposals and the relevant masterplan.

37. Before we consider our guidance for specific Local Plan policies, it is worth reflecting on our recommendations that the Council does not have any specific need for new retail (or leisure) floorspace allocations over the plan period, as well as the findings of the various health check assessments.
38. Notably, we identified vulnerabilities across each of the three key centres of Burgess Hill, East Grinstead and Haywards Heath that would support policy protection from out-of-centre competitors in addition to efforts to enhance the vitality and viability of the towns.
39. Convenience retailers across each centre were found to be collectively undertrading against benchmark levels, whilst out-of-centre stores overtraded against benchmarks. This analysis of convenience store performance is backed up by reductions in the market share of convenience retailers within Burgess Hill (6.2% to 2.5%) and East Grinstead (5.7% to 3.2%) from 2014, demonstrating relative vulnerabilities. Whilst Haywards Heath has retained a relatively consistent market share for convenience goods spending (c. 1.1%), it is significantly lower than either of the other centres.
40. Whilst comparison goods market shares are more positive for Haywards Heath (rising from 7.8% in 2014 to 11.4% in 2021), East Grinstead's market share has remained constant (c. 8.0%) and Burgess Hill has fallen by more than half (9.8% to 4.0%), likely due to the loss of retailers, poor environmental quality and uncertainty surrounding redevelopment plans for The Martlets deterring new occupiers. In contrast, spending across out-of-centre facilities has increased from 2.2% to 8.0% and leakage to destinations beyond the District have grown from 64.7% to 67.4%.
41. This is not to suggest that Mid Sussex's centres are collectively failing – far from it, especially given the relative success of local and village centres – but the draw and attraction of the District's three main town centres require policy protection from the impacts of out-of-centre retailers to support efforts to bring forward redevelopment schemes on town centre sites (both large and small) including complementary uses such as residential dwellings (where appropriate) and commercial office space, alongside other non-policy initiatives over the longer term to enhance their overall vitality and viability.
42. In terms of Local plan policies, we suggest that Class E and main town centre uses should be protected within the defined PSA, with loss of floorspace resisted unless it can be demonstrated that the change would enhance the vitality and viability of the centre, not result in adverse impact on adjoining occupiers and (when proposing uses that are not main town centre uses) can proactively demonstrate

- that Class E uses are no longer viable. Ground floor uses within the PSA should provide an active frontage.
43. Outside of defined town centre boundaries, main town centre uses should be resisted unless it can be demonstrated (in accordance with the NPPF and PPG) that such proposals would be compliant with the impact and sequential tests. In terms of the retail impact test, a local threshold of 500 sq m (GIA) is recommended. Small village and neighbourhood parades (of five or more units) should also be protected to meet the needs of local communities.
44. We also recommend that the Council considers imposing conditions on new planning permissions for new retail, food and beverage, and associated services uses within the PSA restricting changes of use within Class E, as well as restrictions on new non-retail Class E uses changing to retail in out-of-centre locations.
45. Finally, we would also suggest policy support for proportionate reductions in floorspace to allow for amalgamations and subdivisions, meanwhile uses and delivery lockers.
46. Beyond Local Plan policies, we have identified a number of longer term initiatives that the Council may wish to consider to support policy objectives including the introduction of a Retail Liaison / Town Centre Manager role, development of a shopfront strategy and opening hour strategy, in addition to progressing ongoing public realm initiatives.

1 Introduction

- 1.1 Nexus Planning (Nexus), alongside NEMS Market Research (NEMS), was commissioned by Mid Sussex District Council in September 2021 to prepare the Mid Sussex Retail Study 2021. The Council is currently preparing a review of the District Plan to cover the period up to 2038, and the Retail Study would contribute to the evidence base that will inform the emerging Plan.
- 1.2 The approach adopted by Nexus and the project team has been refined to reflect the latest Government guidance provided in the National Planning Policy Framework (NPPF) (July 2021), Planning Practice Guidance (PPG), and the Use Classes Order (2020 amendments). Accordingly, a fundamental objective of the instruction is to produce a NPPF and PPG compliant Study.
- 1.3 Local authorities are bound by the statutory duty to cooperate, whereby they are required to engage constructively, actively and on an ongoing basis to maximise the effectiveness of local plan preparation in the context of strategic cross boundary matters. With this in mind, the Study has engaged with the adjoining local authorities to Mid Sussex District Council on cross boundary matters relevant to retailing and town centres.

Scope of Works

- 1.4 As set out in the brief, the requirements of the Study are set out in three key parts:
 - i Future Needs;
 - ii Policy Approaches; and
 - iii Health Checks.
- 1.5 In order to prepare a Study that addresses the requirements as set out above, the following key elements have been completed as part of the Study:
 - Updated assessment of the latest retail and leisure trends, and impacts of these;
 - A review of the latest national and local policy on retail, leisure, other town centre uses and town centres generally;
 - An analysis of the empirical research prepared by NEMS through a household telephone survey of 1,000 households;

Mid Sussex Retail Study

- A capacity assessment of 'need' for new retail and leisure floorspace over the District Plan period to 2038;
- Health check assessments of the District's main centres including Burgess Hill, East Grinstead and Haywards Heath, and the following villages of the Category 2 settlements: Copthorne, Crawley Down, Cuckfield, Hassocks and Keymer, Hurstpierpoint and Lindfield;
- Engagement with key stakeholders of the centres subject of the health check work;
- A review of adopted policies in the Mid Sussex District Plan 2014-2031 relating to town centres and retailing, and recommendations for revised policy wording; and
- Review of and recommendations for town centre boundaries, retail hierarchy and retail impact assessment thresholds.

1.6 In working through the scope of works, the project team have been mindful of the impact of the Covid-19 pandemic. While the Study was undertaken and drafted subsequent to any major lockdown or restrictions, the reality is that the impacts of the pandemic were and are still materialising. References to temporary closures of various retail and commercial leisure facilities may have changed following publication, as Government legislation responds to the constantly evolving picture presented by the pandemic.

Remainder of Report

- 1.7 In addressing the above scope of works, the remainder of this Study is comprised of the following chapters:
- **Chapter 2** sets the scene for the study by providing a summary of the latest retail and leisure trends and implications of these in planning for the future of town centres;
 - **Chapter 3** sets the policy context for the study, including providing a review of the latest government policy on retail, leisure, other town centre uses and town centres generally;
 - **Chapter 4** sets out a health check assessment of each of the main town and larger village centres within the District; and
 - **Chapter 5** provides a summary of the capacity assessment for the District;
 - **Chapter 6** sets out our policy approaches and recommendations to be considered for Mid Sussex District's emerging District Plan.

Appendices

1.8 The Study is supported by the following appendices:

- **Appendix A:** Study Area Plan
- **Appendix B:** NEMS Household Survey Results
- **Appendix C:** Statistical Tables
- **Appendix D:** Town Centre Composition Plans
- **Appendix E:** Town Centre Boundaries

2 Retail & Leisure Trends

Introduction

- 2.1 In order to set the context for this Study, we have provided an overview of the recent and current retail and leisure trends below. In reading the below, it should be noted that the retail and leisure sectors are dynamic and, whilst recent phenomena such as the Covid-19 pandemic, and long term trends such as online shopping have impacted on the retail sector, new retailers and new formats continue to evolve to meet shoppers' needs. The below commentary should therefore be taken as a 'snapshot' in respect of current market conditions.
- 2.2 The following sections provide commentary on the following key topics:
- The rise and fall of the retail sector in the UK;
 - Covid-19 and the current state of the UK economy;
 - The impact of the internet and special forms of trading;
 - Convenience goods trends;
 - Comparison goods trends; and
 - Leisure, food and drink trends.

The rise and fall of the retail sector in the UK

- 2.3 Since the 1950s, the UK retail market has, in general, experienced expansive growth. The rate of which the growth is occurring has increased in speed over that period. The level of growth is resultant of several influencing factors:
- Improving standards of living;
 - A population with higher disposable incomes;
 - The popularity of obtaining fiscal credit;
 - Changes in modes of transport; and
 - New (digital) technologies, including online retailing.

- 2.4 The economic climate that prevailed following the 2008 recession had substantial impacts on the retail market by restricting resident incomes and reducing standards of living. In consequence, the level of spending retracted. Since 2013 (recognised as being the end of the recession in the UK), the economy had slowly regained momentum and by 2016, economic activity was broadly back to pre-recession levels of economic activity.
- 2.5 The Brexit vote in 2016 and subsequent triggering of Article 50 had a negative impact on business and consumer confidence. During 2017 the consumer economy tightened, with rising inflation and slowing wage growth. Experian reported that 2017 saw the UK shift from being one of the fastest growing G7 economies to one of the slowest¹. The combination of Brexit and the 2017 general election exacerbated the uncertain retail environment.
- 2.6 The retail property landscape in the UK has also seen dramatic changes over the last 50 years. The post-war years saw a significant redevelopment effort focused on town centres. However, during the 1990s and 2000s, the retail landscape changed following the introduction of retail warehouse parks and large out-of-town shopping centres and retail parks. More recently, the shift to 'town centre first' policy approach has seen a shift back to development focussed on town centre locations.
- 2.7 Consumer expectations are also continually evolving, producing a dynamic retail market. Providers operating in the market are required to evolve as a result of numerous dynamic factors, including: the characteristics of the UK population; consumer demands; popularity in private car ownership; planning policy; and digital advances. The diverse nature of factors which form consumer expectations is forcing retailers to pursue new innovative development proposals. Consumers are seeking more out of their shopping experience.

Covid-19 and the Current State of the UK Economy

- 2.8 The UK economy has experienced a significant shock over the past 18 months as a result of the Covid-19 pandemic. Following the emergence of the virus at the beginning of 2020, the subsequent restrictions on movement and behaviour through a series of national lockdowns have sought to mitigate its impact. This uncertain background has caused business investment and expenditure to decline. Household spending fell by over 20% for the second quarter of 2020 following the imposition of national lockdown measures which commenced in March 2020, including the forced closure of non-essential retail, employees being asked to work from homes wherever possible, and millions of

¹ 'Retail Planner Briefing Note 15', Experian, December 2017

- jobs being furloughed. The resulting fall in expenditure was the largest quarterly contraction on record. Retail sales volumes also suffered significant falls in April 2020 as all but essential stores closed during the height of the lockdown.
- 2.9 However, as a result of the gradual reopening of businesses over the summer of 2020, the economy returned to growth, and gathered momentum as a greater number of sectors reopened, including hospitality and leisure services, followed by the full reopening of schools. However, a more pronounced resurgence in the number of cases of Covid-19 resulted in the Government reinstating a nationwide lockdown in early 2021, and this had further implications for the economy.
- 2.10 In October 2020, Experian published its Retail Planner Briefing Note 18² ('ERPBN18'), which provides Experian's most recent information on retail developments and short, medium and long term forecasts for retail planning decisions.
- 2.11 ERPBN18 (December 2020) sets out Experian's best estimate of the retail sector and future changes in expenditure at the time of its publication. Experian anticipates that the post-Covid-19 recovery will be subdued and that the economy will not recover to pre-Covid levels until at least 2022. In this regard, Experian consider that due to the unprecedented nature of the global pandemic, there is great uncertainty over the scale and duration of the outbreak and the resulting economic consequences. An orderly transition and adjustment to a new trading relationship resulting from Brexit is also assumed, and any uncertainty arising from this is likely to further weigh on the economy.
- 2.12 Although the medium term outlook for Gross Domestic Product (GDP) will be shaped by the course of the pandemic, the long term outlook for GDP remains unchanged, with growth of around 1.7% expected to remain below historic averages (2.3%) due to slower population rises and productivity. The fluctuations in GDP growth over the last 18 months demonstrate the recent volatility. Figure 1 provides a snapshot of GDP growth from 2012 to now, and shows that the UK's economy expanded 23.7% year-on-year in the second quarter of 2021, a substantial rebound from the significant decline in GDP growth 2020.

² Experian, Retail Planner Briefing Note 18, October 2020

Figure 1. UK GDP Annual Growth Rate 2012-2021

Source: Trading Economics, 2021

- 2.13 Experian also provide projections for overall retail sales growth, and while these are expected to be volatile in the near term, growth is less impacted over the medium and longer terms. The outlook for special forms of trading (i.e. internet sales, mail order) has been revised upwards by Experian, while the future growth prospects for retail floorspace have been revised down. This reduction is in line with weaker projections for spending and stronger projections for internet sales.
- 2.14 In terms of inflation, Office for National Statistics (ONS) data³ indicates that the rate of inflation (as measured by the consumer price index) increased from 0.5% at June 2016 to a high of 3.1% at November 2017, before reducing to 0.6% at December 2020. The rate of inflation in 2021 has then increased back up to 2.4% in June 2021. Retail has been an industry under significant stress, as many retailers find themselves squeezed between rising costs and the increasing volume of sales over the internet. This has of course been pressurised further with the impact of the Covid-19 pandemic, with more people having turned to online options due to lockdown restrictions.
- 2.15 Notwithstanding the increasing popularity of shopping online, there will always be a need and demand for physical stores. The vast majority of convenience sales are made in store, and even when groceries are purchased online and delivered, the majority of orders are selected by staff from shelves in physical stores. For comparison goods shopping, the requirement for physical stores is expected to remain as shoppers opt to enjoy the experience of viewing items in person. However, this shopping experience will need to evolve and diversify, seeking to engage shoppers on an experiential level.

³ ONS 'Consumer price inflation tables' dataset, May 2021

- 2.16 In terms of the grocery market, the ONS⁴ reports that the food and non-alcoholic beverage inflation rate as of May 2021 was -1.3% when compared to 12 months previous. The same figure in May 2020 was 1.9%. Conversely, the inflation rate on alcoholic beverages and tobacco was 1.7% when compared to 12 months previous. The same figure in May 2020 was 2.6%.
- 2.17 The long-term impacts of the Covid-19 pandemic are ultimately yet to be determined, and as such it is almost impossible to predict with any meaningful certainty what effects short-term business closures and significantly reduced levels of economic activity will continue to have.
- 2.18 However, as may be expected, the ONS⁵ has reported that retailers who had predominantly relied on customers visiting their stores recorded big reductions in sales after lockdown restrictions were implemented and they were required to close their doors. On the other hand, dispensing chemists have sold consistently more since the pandemic began than they did before, with their sales increasing in March 2020. Sales continued to grow in June 2020 even after restrictions were eased and other non-essential stores were allowed to reopen. Non-specialised foodstores, including supermarkets, also traded consistently above their pre-pandemic levels. Furniture retailers returned to pre-pandemic levels swiftly following the lifting of restrictions in the summer of 2020 and continued to grow, boosted by people still spending more time at home than they used to.
- 2.19 In terms of online retailing, the ONS⁶ has reported online sales reached higher than usual levels over the course of the pandemic, peaking at first in May 2020 (32.8%). Although these levels dropped off after shops reopened in June, the proportion of online retailing began to increase in October and continued to do so into November following the reintroduction of lockdown measures, peaking again in January 2021 (37.1%). However, with the gradual reopening of the economy in Spring/Summer 2021, the ONS has reported a decrease in the overall proportion of retail spending online. Figure 2 graphs the growth of internet sales as a percentage of total retail sales between October 2011 and September 2021.

Available Expenditure and the Impact of the Internet

- 2.20 Experian forecasts have reported fairly turbulent growth in per capita convenience and comparison goods expenditure for the short term. In this regard, Experian forecasts that per capita expenditure growth in the convenience goods sector will increase substantially to 8.4% at 2020 (from -0.9% at 2019), with this growth largely attributed to consumers spending more on such goods as a result of lockdown measures. However, as shown in Figure 3, Experian forecasts a 6.2% decrease in per capita expenditure growth in 2021 for convenience goods, with very limited forecast growth thereafter to 2040.
- 2.21 As Figure 3 indicates, forecasts indicate that comparison goods spending will increase following a substantial decrease of 8.5% in 2020, but it is evident that per capita comparison goods expenditure increases going forward will be below the level apparent at the turn of the millennium (the average annual growth rate between 1997 and 2007 was 8.5% for comparison goods). Experian identifies that per capita comparison goods expenditure growth dropped from 5.4% at 2017 to 3.4% at 2018, and forecasts that it will remain between 2.9% to 3.0% per annum in the medium to long term. The exception to this is the decrease noted above in 2020, which is largely a result of lockdown measures closing all but essential stores. There is now an anticipated growth of 6.5% in per capita expenditure in 2021 and 3.8% in 2022 under the expectation that lockdown measures will be limited and expenditure will pick up.

Figure 3. Experian's Identified and Forecast Convenience and Comparison Goods Per Capita Expenditure Growth

Volume Growth Per Head (%)	2016	2017	2018	2019	2020	2021	2022	2023-27	2028-40
Convenience goods	3.3	1.9	1.0	-0.9	8.4	-6.2	0.2	0.0	0.1
Comparison goods	4.8	5.4	3.4	4.3	-8.5	6.5	3.8	3.0	2.9

Source: Figure 1a and Figure 1b of Experian Retail Planner Briefing Note 18

- 2.22 Whilst the above figures relate to a level of growth that is significantly below that which has historically been available to retailers, the situation for high street stores is exacerbated through the increasing amount of expenditure which is committed through special forms of trading⁷ and, in particular, online trading.
- 2.23 In this regard, Appendix 3 of ERPBN18 indicates that special forms of trading accounted for just under 27% of total retail sales at 2020 as a consequence of Covid-19 and subsequent to very strong growth in online retailing over the past decade. Although the growth in special forms of trading is anticipated to drop back slightly in 2021, Experian believes that special forms of trading will account for almost 30% of retail sales by 2026, increasing to around 32% by 2031.
- 2.24 Figure 4 sets out Experian's identified and forecast level of special forms of trading as a proportion of overall convenience and comparison goods expenditure. Experian estimates that special forms of trading will account for over a third of comparison goods expenditure and over a fifth of convenience goods expenditure by 2031.

Figure 4. Experian's Identified and Forecast Market Share of Special Forms of Trading for Convenience and Comparison Goods Sectors

Volume Growth Per Head (%)	2016	2017	2018	2019	2020	2021	2026	2031
Convenience goods	10.0	11.6	12.8	14.1	21.1	18.1	21.2	22.8
Comparison goods	18.5	20.8	22.4	23.4	30.6	29.1	33.7	36.2

Source: Figure 5 of Experian Retail Planner Briefing Note 18

- 2.25 The ongoing popularity of internet shopping continues to have clear implications in respect of the viability of some physical store retailers. However, it is important to note that changes in how people shop also bring about some opportunities for retailers trading from the high street. In particular, many stores sell online, but fulfil orders from regular stores rather than warehouses⁸, with purchases therefore helping to sustain tangible retail floorspace. As a consequence, Experian also provides an

⁷ Including internet sales, mail order, stalls and markets, door-to-door and telephone sales

⁸ This is particularly the case with food shopping and speciality comparison goods purchases, where retailers often try to tap into a wider market through an online presence

'adjusted' estimate of special forms of trading, which relates to expenditure which is not available to actual stores.

Convenience Goods

- 2.26 Even prior to the Covid-19 pandemic, socio-economic conditions had led to significant shifts in convenience goods retailing, which have resulted in the 'big four' supermarket operators' market share being cut. Mintel⁹ finds that the decline of the food superstore is well established and that this can be attributed to two issues.
- 2.27 Firstly, people are undertaking food shopping in different ways. More people are living in town and city centres and more people are having difficulties financing the purchase of their own home. Mintel indicates that such people are more likely to undertake food shopping on an 'as needs' basis and are more likely to eat out or use takeaways. As such, they are less likely to have a need to undertake a 'main food shop'.
- 2.28 Secondly, general uncertainty in the economy has made hard discounters (namely Aldi and Lidl) a more attractive proposition, and are particularly thriving given that shoppers are currently having to be 'money savvy'. Discounters have also made efforts to try to compete more directly with the 'big four' supermarket operators, with larger stores, greater ranges of goods, fresh foods and premium products becoming increasingly prevalent. It is clear that the likes of Aldi and Lidl are no longer 'discount retailers' as they once were, and have better met a wider range of customers' needs through the increase in a supply of more premium products.
- 2.29 The move towards the middle ground has allowed discounters to secure market share from both superstores and smaller convenience stores. In addition, we note that discount retailers are often happy to trade alongside more upmarket convenience goods retailers (such as Marks & Spencer Foodhall) as, collectively, the two stores can meet many food shopping needs.
- 2.30 The shifts in the sector are illustrated with reference to changes in retailers' market share in recent years, as shown in Figure 5.

⁹ 'UK Retail Rankings', Mintel, April 2018

Figure 5. Market Share of convenience goods operators

Operator	December 2016	December 2017	December 2018	December 2019	December 2020
Tesco	28.4	28.1	27.8	27.4	27.3
Sainsbury's	16.5	16.5	16.1	16.0	15.9
Asda	15.3	15.3	15.2	14.8	14.3
Morrisons	10.8	10.8	10.6	10.3	10.4
Aldi	6.2	6.8	7.4	7.8	7.4
Co-op	6.3	5.8	5.9	6.1	6.0

Ocado	1.1	1.1	1.2	1.3	1.6

Source: KANTAR Grocery Market Share. Figures shown are for the final reporting period in each calendar year

- 2.31 Over the past couple of years, the market has witnessed the closure of unprofitable foodstores, particularly operated by Tesco and Morrisons. Conversely, discount retailers including Aldi and Lidl are planning substantial investment over the coming years, which will likely further shift the grocery market in the short and medium term.

Comparison Goods

- 2.32 The comparison goods sector is currently being squeezed by a number of factors including reduced expenditure growth, the ability of internet shopping to plug gaps in retailer representation, increases in the minimum wage, and business rates changes. The effects of Covid-19 and the efforts to contain it, have accelerated those factors.
- 2.33 This 'perfect storm' has resulted in changes to traditional retailing on the UK high street and generally a lesser reliance on comparison goods retail. To underscore this, the Centre for Retail Research reported that 2020 was the worst year for retail job losses in more than 25 years. Around 180,000 retail jobs were lost in total, with this figure representing a rise of almost a quarter on 2019¹⁰.
- 2.34 Whilst the sector is continually evolving and there are a number of ongoing success stories (including Primark, Zara, Jack Wills, Joules and Hotel Chocolat), recent headlines have focussed on failing retailers and store closures. High profile retailers that have struggled include Debenhams, which announced the closure of all 124 stores in December 2020¹¹ and the Arcadia Group, which owned

¹⁰ Article headlined 'Retail sales in 2020 'worst for 25 years', BBC, 12 January 2021

¹¹ Article headlined 'Debenhams set to close putting 12,000 jobs at risk', BBC, 1 December 2020

Topshop, Topman and Dorothy Perkins, which in February 2021 announced the closure of around 500 stores¹². Furthermore, Intu Properties, one of Britain's biggest shopping centre owners, fell into administration in June 2020 after failing to secure an agreement with its creditors¹³. These announcements are the most recent in a raft of notable closures, including Marks & Spencer announcing in 2016 the closure of 110 stores by 2022, and House of Fraser's widely publicised battle to retain as many stores as possible.

- 2.35 Whilst the loss of some of the above names will have significant repercussions for certain towns (particularly those that lose Debenhams, Marks & Spencer or House of Fraser from their high street in very quick succession), this is partly due to some well-known retailers having failed to 'move with the times' and update their offer, accommodation and online presence. This is partly a consequence of retailers struggling to reinvest in their business when margins are tight (or non-existent).
- 2.36 It will be interesting to see whether any permanent change in working from home may act to counterbalance the polarisation trend, given the prospect of fewer commuters in larger centres and greater numbers of people spending the working day in and around their home. The impact on larger centres may be a reduced footfall, particularly within the week days, and result in the shift in expenditure being directed to the smaller town, district and local centres. This is likely to have a positive impact for smaller centres such as those within Mid Sussex District..
- 2.37 Whilst structural changes have had a material impact on the vitality and viability of many UK high streets, there are some beneficiaries. In particular, household discount operators, such as B&M, Home Bargains, Poundland and Wilko, have reoccupied a number of medium to large retail units. However, as evidenced by the failure of Poundworld, there is some evidence that this market may be approaching capacity.
- 2.38 It remains to be seen what additional long-term impacts will eventuate from the most recent retail closures that occurred during the Covid-19 pandemic. However, prior to the implementation of lockdown measures, trading conditions for retailers were challenging and many retailers were struggling to meet costs, including rents, resulting in a higher proportion of retailers restructuring or entering administration. As has been seen throughout 2020 and 2021, the conditions have only become more challenging.

¹² Article headlined 'After Topshop owner Arcadia's demise, what now for UK clothes shopping?' The Guardian, 13 February 2021

¹³ Article headlined 'Shopping centre owner Intu collapses into administration', The Guardian, 26 June 2020

Leisure and Food & Drink

- 2.39 The greater availability of high street units for leisure purposes appears to have helped stoke an entrepreneurial spirit in recent years, with a number of centres beginning to benefit from a greater focus on independent leisure, and food and drink retailers and also modern markets, which are frequently focussed around food and drink operators.
- 2.40 More generally, the food and drink sector has also been buoyed in recent years by the success of mid-market national multiples, which expanded quickly across the UK. However, there are signs that the market is becoming saturated in some locations and a number of high profile operators have been in financial difficulty. Given the problems suffered by such operators, the market has become more cautious and mid-market operators are picking new sites carefully as a result. Instead, we have seen a number of independent operators flourish, both before and throughout the pandemic, and a desire of shoppers to choose local operators over the bigger, regional and national brands. This is particularly the case for smaller local and district centres across the UK.
- 2.41 A further significant recent high street success story in some locations has been the resurgence of the town centre leisure sector, which has resulted in new cinemas being developed close to the shopping core, and other 'competitive socialising' concepts, which include bowling, crazy golf, table tennis, darts, axe-throwing and other seemingly niche pursuits.
- 2.42 Cinema openings have been on the up in recent years and 'boutique' cinema operators – including Curzon, Everyman and The Light – are able to operate from smaller sites in town centres (partly as a consequence of digital technology). Town centre cinema development has successfully underpinned wider mixed-use developments, as food and drink operators are typically keen to locate in close proximity to benefit from spin-off custom. New, innovative leisure occupiers (particularly independent operators) have had success both in re-using existing difficult to let premises, and in driving the evening economy.
- 2.43 More generally, the gym market continues to perform well, with the Leisure Database Company identifying that there are now more than 7,000 gyms across the UK, with the fitness market having an estimated value of more than £5bn. The Leisure Database Company suggests that this is a 'golden age of fitness', with around one in every seven Britons having a gym membership. Budget gyms are currently particularly popular, with operators such as Pure Gym, the Gym Group and easyGym utilising a format that is based on low costs and high volume.

- 2.44 There is a concern that the implications of the pandemic will be particularly felt on the leisure sector, with some facilities not being allowed to reopen until July 2021. The full impact on the leisure sector as a whole will really evolve throughout the remainder of 2021 and into 2022, and it is clear that the industry is not 'in the clear' yet.

Conclusion

- 2.45 This Chapter has provided an overview of the recent and current retail and leisure trends that form the backdrop for retail, leisure and town centre activity at the current time. While the retail and leisure sectors are dynamic at the best of times, there is no denying that town centres are still feeling the impacts of the Covid-19 pandemic. Long term trends such as online shopping have also impacted on the retail sector, and new retailers and new formats continue to evolve to meet shoppers' needs.

3 National & Local Policy Context

Introduction

- 3.1 Prior to discussing the floorspace capacity and vitality and viability of the centres within Mid Sussex District, it is important to set out the prevailing national planning policy context for retail in the UK, to set the scene for the following assessments and recommendations.
- 3.2 This chapter sets out the recent updates to the planning policy context, including updates to the National Planning Policy Framework (2021), hereafter, referred to as the NPPF; the National Planning Practice Guidance (PPG), as well as the recent changes to the Town and Country Planning (Use Classes) Order and Town and Country Planning (General Permitted Development Order). We also provide a summary of the local planning policy context.

National Planning Policy Framework

- 3.3 The NPPF was initially adopted on 27 March 2012, and the Government published the most updated version in July 2021.
- 3.4 The NPPF provides a 'presumption in favour of sustainable development'. It effectively instructs decision makers to support development unless there are negative environmental, social and/or economic impacts. The NPPF provides the national guidance against which all planning applications should be considered.
- 3.5 At paragraph 8, the NPPF sets out its economic objective - to help build a strong, responsive and competitive economy. This overarching economic objective is supported by Chapter 6, which emphasises that significant weight must be given to supporting economic growth and productivity, and that local business needs and wider opportunities for development must be taken into account.
- 3.6 Chapter 7 of the NPPF seeks to ensure the ongoing vitality of town centres. In particular, within this chapter, paragraphs 86 to 91 promote and support new development and investment within the defined boundaries of town centres, recognising that town centres are at the heart of communities. Where town centres are in decline, the NPPF directs local planning authorities to plan positively for their future to encourage economic activity. The NPPF recognises the need for local authorities to promote the vitality and viability of their towns and cities through the promotion of competition and growth management.

- 3.7 Specifically, paragraph 87 requires Local Planning Authorities (LPAs) to enforce a sequential approach when assessing planning applications for main town centre uses located outside of existing centres or not in accordance with an up to date Local Plan. To do this, local authorities should require applications for main town centre uses to be located in town centres, then in edge of centre locations and only if suitable sites are not available should out-of-centre sites be considered. When reviewing edge of centre and out-of-centre proposals, they should give preference to accessible locations well connected to the town centre.
- 3.8 Paragraph 90 specifies that LPAs should require an impact assessment for retail and leisure development outside of town centres that are not in accordance with an up to date Local Plan and if the development is over a proportionate, locally set threshold. Where there is no locally defined threshold, the default threshold will be 2,500 sq m. The impact assessment should assess:
- i the impact of the proposal on existing, committed and planned public and private investment in a centre or centres in the catchment area of the proposal, and
 - ii the impact of the proposal on town centre vitality and viability, including local consumer choice and trade in the town centre and wider area, up to five years from the time the application is made.
- 3.9 In summary, the NPPF endorses a 'town centre first' approach to all retail activity (including leisure). It stipulates that where retail and leisure proposals cannot be accommodated within, or, adjacent to the town centre, applicants have to demonstrate, through the dual application of the impact test and the sequential test that the development will not affect negatively upon the vitality and viability of town centres.

National Planning Practice Guidance

- 3.10 The PPG for 'Town Centres and Retail' (last updated 18 September 2020) sets out further practical details of the Government's aspirations on town centres. Some key headlines are as follows:
- Encourages a wide range of complementary uses in town centres, such as residential, employment, entertainment/leisure, healthcare and education uses, as well as temporary activities such as 'pop ups'.
 - Recognises the potential for evening and night-time activities to increase economic activity, employment, diversification and to develop the 'unique brand' of a town centre.

- Promotes stakeholder engagement and involvement in shaping town centres, including the activities of Business Improvement Districts (BIDs), Local Economic Partnerships (LEPs), landowners and private sector businesses.
 - Recommends Town Centre Strategy options which are realistic based on the likely role and function of the centre, and which identify an appropriate mix of uses, the likely scale of need, and opportunities for improvement, including to the historic and natural environment.
- 3.11 In July 2019, additional indicators were added to the PPG's list for planning for town centres and high streets, including balance between independent and multiple stores, barriers to new businesses opening and existing businesses expanding, and opening hours and the extent to which there is an evening and night time economy offer.

The Town and Country Planning (Use Classes) & (General Permitted Development) Orders

- 3.12 In recent years, the Government has focussed considerable effort on trying to promote diversification in town centres through Permitted Development Rights. In addition to traditional Use Class 'rights', more recent rights have been granted in order to help diversify town centres and in order to reflect changing economic pressures in accordance with the General Permitted Development Order 2015 (GPDO). These include, subject to Prior Approval, the ability to convert a large number of uses to residential. Uses can include shops, financial and professional services, amusement arcades and casinos. There is also the commonly utilised ability to change office premises to residential.
- 3.13 To support new ventures and pop-ups and avoid buildings being left empty, a separate permitted development right allows a range of uses (such as offices, shops, financial and professional services, restaurants and cafes, hot food takeaways, assembly and leisure uses) to convert temporarily to another use (such as an office, shop, financial and professional service, restaurant) for a single continuous period of up to three years. This right allows start-ups to test a new business model, and then to seek planning permission for the permanent change of use on that or another site. The same right now allows for the temporary change of use to specific community uses (health centre, art gallery, museum, public library, public hall or exhibition hall) to provide a greater mix of uses on the high street and increase footfall, and bring community uses closer to communities.
- 3.14 Permitted development rights are an important component in the re-shaping of a number of town centres throughout the UK. Symptomatic of this, the Government announced in June 2020 plans to

- introduce a new use class for 'commercial, service and business' in town centres. This proposal has simplified the process for switching between such uses in town centres. Consequently, The Town and Country Planning (Use Classes) Order 1987 was amended on 22 July 2020, and came into force in England on 1 September 2020 as the Town and Country Planning (Use Classes) (Amendment) (England) Regulations 2020. The amendments to the Use Classes Order included revoking Parts A and D and introducing three new use classes (Use Class E, F1 and F2).
- 3.15 These amendments mean that uses previously falling into Use Class A1, A2 and A3 (such as shops, and restaurants), Use Class B1 (including offices), and specific uses within Use Classes D1 and D2 (such as gyms, doctors' surgeries and nurseries) are now combined within a single Use Class (Class E: 'Commercial, Business and Service').
- 3.16 Additional Use Classes F1: 'Learning and non-residential institutions' and F2: 'Local community' have also been created, amalgamating a number of previous Use Classes. Use Class F1 covers any use (not including residential) for the provision of education, display of works of art, museum, public library, public reading room, public hall, exhibition hall, for or in connection with public worship or religious instruction or as a law court. Use Class F2 covers a shop selling mostly essential goods, including food, no larger than 280 square metres (sq m) and where there is no other such facility within 1,000m radius of the shop's location; a hall or meeting place for the local community; an area or place for outdoor sport or recreation, not involving motorised vehicles or firearms; and an indoor or outdoor swimming pool or skating rink.
- 3.17 In practice, because changes within a single Use Class would not constitute development, this means a number of new changes of use can be carried out without the need for planning permission, notwithstanding any amendments to frontages and signage. Most notably, within Use Class E, a large shop can now freely change to a gym, an office, a restaurant, a nursery and any combination thereof.
- 3.18 The amendments also took a number of uses (such as pubs and bars, takeaways, music venues and cinemas) out of the Use Class Order entirely, categorising them as 'Sui Generis' uses. Each of these uses now need planning permission for any changes to their use, providing further protection to valued local facilities (such as pubs) and further controls for town centres against potentially unwanted uses (such as takeaways).
- 3.19 In March 2021, an update was made to the GPDO setting out the Permitted Development Rights associated with Use Class E. Use Class MA allows for the change of use of these Class E properties to residential from August 2021 (extending rights that had previously been restricted to office uses

using Class O, and shops uses using Class M). This permitted development right is subject to maximum size requirements, the property having been in use as Class E for 2 years and vacant for 3 months, as well as an application to the Council for 'Prior Approval' for limited consideration of impacts related to transport, contamination, flood risk, noise, the provision of natural light, and the potential effect of providing residential accommodation within an industrial area. All residential units created are required to meet minimum internal space standards. Further limitations apply in Conservation Areas and for nurseries, as well as in areas covered by 'Article 4 directions' where the rights do not apply.

3.20 Article 4 directions are issued under article 4 of the GPDO, and allow for Councils to withdraw permitted development rights from defined areas. However, after notifying the Secretary of State of their intention to make an Article 4 direction, the Secretary of State can intervene and modify or cancel an Article 4 if the direction is not considered to be justified.

3.21 In July 2021, paragraph 53 of the NPPF was updated setting out updated limitations for the use of Article 4 directions:

The use of Article 4 directions to remove national permitted development rights should:

- *where they relate to change from non-residential use to residential use, be limited to situations where an Article 4 direction is necessary to avoid wholly unacceptable adverse impacts (this could include the loss of the essential core of a primary shopping area which would seriously undermine its vitality and viability, but would be very unlikely to extend to the whole of a town centre)*
- *in other cases, be limited to situations where an Article 4 direction is necessary to protect local amenity or the well-being of the area (this could include the use of Article 4 directions to require planning permission for the demolition of local facilities)*
- *in all cases, be based on robust evidence, and apply to the smallest geographical area possible.*

3.22 It should be noted that any existing Article 4 directions that currently restrict office-to-residential changes under the old GPDO Use Class O will still 'bite' until July 2022, so Councils have the opportunity to propose new article 4 directions.

Mid Sussex Development Plan

3.23 The adopted Development Plan for Mid Sussex District is comprised of the following key documents:

- Mid Sussex District Plan 2014-2031;
- Saved policies of the Mid Sussex Local Plan 2004;
- Small Scale Housing Allocations Development Plan Document; and
- Neighbourhood Plans.

3.24 The district has full neighbourhood plan coverage, with 18 of the 20 Neighbourhood Plans being 'made', while one is subject to a referendum and the other in production.

3.25 The Council is in the process of preparing a Housing Allocations Development Plan Document, which is due for adoption in Spring 2022.

3.26 There are also three Town Centre Masterplan SPDs relevant to the Study, including:

- Burgess Hill Town Centre Masterplan SPD 2006;
- East Grinstead Town Centre Masterplan SPD 2006; and
- Haywards Heath Town Centre Masterplan SPD 2021.

3.27 We provide below a summary of the key documents and policies that are particularly relevant to this Study.

Mid Sussex District Plan 2014-2031

3.28 The Mid Sussex District Plan was adopted in 2018 and forms the key development plan document for planning across the District. There are two policies that are specifically relevant to the Study; Policy DP2 Town Centre Development and Policy DP3 Village and Neighbourhood Centre Development.

3.29 Policy DP2 supports the renewal of the three town centres of Burgess Hill, East Grinstead and Haywards Heath. The policy:

- Defines the role of the three town centres for the wider district;
- Supports regeneration, renewal and environmental enhancement of the town centres, where specific criteria are met;

- Defines primary and secondary shopping frontages and sets out the specific policies that apply to those areas. In primary shopping frontages, the policy requires a 'clear predominance of Class A1 shop uses', while in secondary shopping frontages, the policy sets out that a 'high proportion of Class A1-A5 uses appropriate to a shopping area, which contribute to the pedestrian flow and attractiveness of the area, should be retained';
 - Sets out the criteria for the sequential test for town centres; and
 - Sets a local threshold for Retail Impact Assessments of 500 sq m.
- 3.30 Policy DP3 highlights the important role that the village and neighbourhood centres play for the wider district. The policy:
- Defines the role of the village centres of Crawley Down, Cuckfield, Hassocks, Hurstpierpoint and Lindfield and permits development that would contribute to meeting local needs, is appropriate in scale and function, and is in accordance with the relevant Neighbourhood Plan;
 - Defines the role of small village centres and neighbourhood centres, and sets out that in these locations, development involving the change of use away from Use Class A1 shops would be resisted except in certain circumstances.
- 3.31 We provide recommendations for revised policy wording at Chapter 6 of this Study.

Neighbourhood Plans

- 3.32 Mid Sussex has full neighbourhood plan coverage with 20 neighbourhood plan areas in total. Of those, 18 neighbourhood plans are 'Made', one is subject to referendum and one is at the early stages of production. Neighbourhood plans include policies related to town/village centres.
- 3.33 The District is comprised of the neighbourhood plan areas as listed below. Where there are relevant town and village centre policies relevant to the Study, a brief summary has been included below:
- Albourne Neighbourhood Plan – made September 2016;
 - Ansty and Staplefield Neighbourhood Plan – made February 2017;
 - Ardingly Neighbourhood Plan – made March 2015;
 - Ashurst Wood Neighbourhood Plan – made June 2016;
 - Balcombe Neighbourhood Plan – made September 2016;

- Bolney Neighbourhood Plan – made September 2016;
- Burgess Hill Neighbourhood Plan – made January 2016. The Burgess Hill Neighbourhood Plan has a keen focus on development with the town centre, and divides the town centre into various ‘quarters’ for policy purposes. Policies TC1-TC6 provide broad criteria for development within each quarter, as well as setting out requirements for public realm and access to Burgess Hill Town Centre;
- Copthorne Neighbourhood Plan – adopted September 2021. The Copthorne Neighbourhood Plan contains policy CNP14.1, which sets out that proposals that would result in the loss of shops and retail premises would not be supported, except in exceptional circumstances;
- Crawley Down Neighbourhood Plan – made January 2016. The Neighbourhood Plan defines the extent of Crawley Down Village Centre, and contains Policy CDNP03 (Retention of Local Retail Facilities & Vernacular Buildings), which restricts the change of use of Use Class A1 units to other uses, except in certain circumstances where outside of permitted development rights. The policy also restricts the loss of a public house;
- Cuckfield Neighbourhood Plan – made October 2014. The Neighbourhood Plan defines the extent of Cuckfield Village Centre and at Policy CNP11 sets out the uses that are considered to be acceptable within the bounds of the defined Village Centre;
- East Grinstead Neighbourhood Plan – made November 2016. The Neighbourhood Plan defines the extent of the Town Centre boundary, as well as an area that is focussed around pedestrian activity (High Street and London Road), and an area for pedestrian enhancement (Railway Approach). Policies EG8 and EG9 set out the requirements for development within East Grinstead Town Centre, as well as allowing temporary community uses within long term vacant commercial and retail premises;
- Hassocks Neighbourhood Plan – made June 2020. The Hassocks Neighbourhood Plan aims to ‘develop the centre of the village to form a distinctive social hub’. Policy 18 specifically sets out support for development proposals that are deemed to enhance the character and sense of place of the central retail area of the village.
- Haywards Heath Neighbourhood Plan – made December 2016. The Neighbourhood Plan defines the extent of the town centre, the primary retail core and secondary retail core, and includes policies B1 and B2 which are specific to development within the town centre;

- Horsted Keynes Neighbourhood Plan – currently being prepared;
- Hurstpierpoint and Sayers Common Neighbourhood Plan – made March 2015. The Neighbourhood Plan contains an overarching aim to improve the pedestrian environment to assist in encouraging the retailing sector, however contains no specific policy to that end;
- Lindfield and Lindfield Rural Neighbourhood Plan – made March 2016. Policy 4 of the Neighbourhood Plan defines the extent of Lindfield Village centre, and sets out a prescriptive policy that resists the loss of existing A1 uses;
- Slaugham Neighbourhood Plan – made September 2019;
- Turners Hill Neighbourhood Plan – made March 2016;
- Twineham Neighbourhood Plan – made March 2016; and
- West Hoathly Neighbourhood Plan – made April 2015.

Town Centre Masterplans

- 3.34 Each of the three main towns (Burgess Hill, East Grinstead and Haywards Heath) is covered by a Town Centre Masterplan SPD. Whilst the Masterplans for Burgess Hill (2006) and East Grinstead (2006) are now somewhat dated and in some cases superseded by specific developments or Neighbourhood Plan policies, the documents are still a material consideration for development planning decisions. Haywards Heath Town Centre Masterplan was revised in 2020-21 and includes an up-to-date vision, objectives and principles for future development. It was adopted in March 2021.

Burgess Hill Town Centre Masterplan SPD 2006

- 3.35 The Burgess Hill Town Centre Masterplan SPD was prepared in 2005 and 2006 in collaboration with local stakeholders. The Masterplan sets out the plan for regeneration and revitalisation of the Town Centre. The Masterplan study area extends beyond the Burgess Hill Town Centre Boundary and includes St Johns Park in the north, London Road to the east and Mill Road to the west.
- 3.36 The Masterplan has assessed the development potential of whole sections of the town centre, including identifying opportunities for the redevelopment of Church Walk and the Martlets Shopping centre, and well as the associated multi-storey car park, which are being brought forward. The Masterplan also identifies potential opportunities for new retail floorspace, and mixed use developments, as well as locations for landmark buildings.

East Grinstead Town Centre Masterplan SPD 2006

- 3.37 The East Grinstead Town Centre Masterplan SPD is a guide to the revitalisation and redevelopment of East Grinstead Town Centre. It provides additional guidance to supplement Mid Sussex District Council statutory planning policies as set out in the District Plan.
- 3.38 The Masterplan includes a series of objectives that set the overarching intent for development within the Town Centre. The objectives relate to seven key themes, including town centre structure, accessibility, retailing, providing a greater mix of uses including residential, enhancing the public realm, enhancing East Grinstead's special character, and sustainability. Development guidance is provided for each objective.
- 3.39 Objective 3, in particular, is '*to create opportunities for new retail and associated parking within the town centre that improves the quality and offer of the shopping experience*'. The relevant development guidance sets out a series of opportunities and criteria for development within the Masterplan area, including that out-of-centre foodstore would be strongly resisted and that new high quality comparison goods floorspace could be accommodated, as well as identifying a number of specific opportunity sites for refurbishment and redevelopment. Specifically, the development guidance includes reference to the redevelopment of West Street and Queens Walk to create a new shopping quarter. A redevelopment of this site has recently been completed.

Haywards Heath Town Centre Masterplan SPD 2021

- 3.40 The Haywards Heath Town centre Masterplan SPD was adopted in March 2021. The Masterplan has been prepared to develop a vision, objectives and guiding principles for development within the Town Centre. The Masterplan sets out the current baseline position and identifies key character areas that contribute to Haywards Heath's unique character and opportunity areas and projects. The document has been designed to provide a framework for future planning decisions as well as investment.
- 3.41 The area included with the Town Centre Masterplan boundary extends beyond the Town Centre boundary defined within the Council's development plan. In addition to the core town centre areas of South Road, The Orchards Shopping Centre and The Broadway, the Masterplan area extends to Haywards Heath Station, Clair Park and Clair Hall.
- 3.42 The Masterplan identifies key public realm and transport infrastructure improvements and makes recommendations for key proposals. A detailed set of proposals are included for South Road that

Mid Sussex Retail Study

seek to make improvements to the existing public realm and user experience. Similarly, specific proposals are set out for South Road and The Broadway.

- 3.43 The Masterplan also identifies key additional opportunity sites across the Masterplan area, the redevelopment of which could support the vibrancy of Haywards Heath.
- 3.44 The Masterplan provides some recommendations for the future consideration of town centre Boundaries and Primary Shopping Areas. It recommends that the definition of Primary and Secondary Shopping Frontages should be reviewed as part of the District Plan Review process to ensure Policy DP2 does not restrict uses which may revitalise the town centre.

Mid Sussex Retail Study

- 3.45 The Mid Sussex District Council Retail Study (first completed in September 2008, and then updated in November 2014 and May 2016) indicated that while the three key town centres were performing reasonably well as shopping destinations, they were not meeting their full potential. The Study recommended that each town should improve their attractiveness to minimise competition from other towns outside the District.
- 3.46 The Retail Study Update 2016 found that for convenience goods, there was no district-wide capacity for new floorspace 2031. For comparison goods, the Study forecasted that there was no short to medium term capacity (up to 2025) as a result of existing 'commitments', or already planned new comparison floorspace. However, capacity for new floorspace was found to emerge towards the end of the forecast period in 2029 for 5,781 sq m, increasing to 8,643 sq m by 2031.

4 Town Centre Health Check Assessments

Introduction

- 4.1 This chapter of the report sets out our health check assessment to assess the vitality and viability of Town Centres. In this context, this Report provides detailed health check assessments for the Council's main Town Centres, namely: East Grinstead, Haywards Heath and Burgess Hill (as defined by the adopted town centre boundaries). The report also provides a high-level assessment of the relative health of retail and leisure provisions in the villages of the Category 2 settlements of Copthorne, Crawley Down, Cuckfield, Lindfield, Hassocks and Hurstpierpoint and their role and function in the network and hierarchy of centres.

Methodology

- 4.2 Health checks are recognised as important planning 'tools' for appraising and monitoring the changes in the overall vitality and viability of town centres, and informing both plan-making and decision-taking at the local level.
- 4.3 This town centre assessment builds on our analysis of market trends as outlined in Chapter 2. We supplement this analysis with three sources of new empirical evidence; our town and village centre health checks, stakeholder engagement, and responses to the NEMS Household Telephone Survey. By combining the findings of our engagement with local groups, residents and businesses, the Household Survey results, our on-the-ground observations, and desktop research, we are able to build a picture of the current health of the centres, based on performance against the range of health check indicators set out in the NPPF / PPG.
- 4.4 We describe our methodology for the health check exercise below, before going on to examine each of the District's Town and Village Centres. We utilise the categorisations employed by Experian. These are mostly commonplace, but for the avoidance of doubt, 'Retail Services' include the likes of dry cleaners, health & beauty, opticians and travel agents, whilst 'Leisure Services' include gyms, bars, cafes, fast-food outlets, nightclubs and cinemas.
- 4.5 Nexus carried out the health check survey exercises in November 2021. Health checks are both a physical exercise in walking the town centres to understand their make-up, constraints, and opportunities, as well as an exercise in understanding the views of local stakeholders.

- 4.6 As part of undertaking the town centre health checks, we recommended to the Council that we contact and engage with a number of key stakeholders. The engagement exercise took place via two virtual stakeholder engagement sessions in November which were attended by representatives of a range of stakeholder groups. Some additional written responses were also received by those who had further comments and those who were not able to attend the live stakeholder engagement sessions. The views and opinions expressed during the stakeholder sessions have been used to supplement the observations made during the health check site visits.

Health Check Indicators

- 4.7 While the NPPF does not provide a precise list of criteria to be used to assess the health of a centre, the Government's 'Town Centres and Retail' PPG of March 2014, updated in July 2019, offers a helpful set of indicators. The PPG explains that these indicators should be monitored on a regular basis in order to judge the health of a centre and its performance over time:

- **Diversity of Uses** | Data on the diversity of uses in Mid Sussex's centres was collected during the health check composition surveys completed by Nexus in November 2021. The collected data includes the number, type and quantum of floorspace provided in these locations. The extent and composition of the town centres of East Grinstead, Haywards Heath, Burgess Hill and Hassocks has been informed by Experian Goad plans. The plans were updated as part of site visits to these centres that took place in November 2021.

As Experian Goad Plans are not available for Copthorne, Crawley Down, Cuckfield, Lindfield and Hurstpierpoint, the composition of these centres were informed by observations during our site visits in November 2021. Floorspace data is not available for these centres.

A comparison of the composition of each centre against UK averages (as calculated by Experian Goad in October 2021) is utilised as an appropriate benchmark. We have also reviewed the composition of each centre against the same figures calculated for the Mid Sussex Retail Study prepared in 2014.

- **Proportion of Vacant Street Level Property** | Vacant properties were also identified during the 2021 health check exercise. The volume of vacant floorspace within a centre can provide an indication of how well the centre is performing. However, it is important to acknowledge that a degree of vacancy is inevitable and indeed desirable. Some 'churn' is expected in the market as units alter and change, as new businesses come in, and others leave. In this context,

vacant units can be found in even the strongest of town centres. Equally, a low vacancy rate does not necessarily mean a centre is performing well; as the quality and performance of the occupied units may be relatively poor. At this specific time, the Council should also be wary of the post-Covid-19 implications of town centre openings, with some businesses either not yet able to re-open, or holding off re-opening.

- **Commercial Yields on Non-Domestic Property** | Whilst this can be an indicator of town centre performance over time, data on commercial yields for Mid Sussex centres is not publically available at this time, as it is now only produced by ONS for major cities.
- **Customers' Views and Behaviour** | Information on customers' views is based on the results of a series of consultation and engagement exercises including targeted stakeholder workshops for each town and village centre, as well as the results of the NEMS Household Telephone Survey. These results provide an indication of how a centre is both used and viewed by local residents, businesses and visitors.
- **Retailer Representation and Intentions to Change Representation** | Information on the current strength of centres and retailer representation has been derived from Experian Goad Category Reports and other published sources.
- **Commercial Rents** | An examination of average prime rents can facilitate an understanding of shopping rents and investment yields.
- **Pedestrian Flows** | General footfall and pedestrian flows were observed by Nexus during site visits to the District's key Town and Village Centres. Nexus was able to obtain a comprehensive understanding of pedestrian flows through observation at varying times. We have also utilised footfall data collected by Visitor Insights and published in Baseline Reports for each centre.
- **Accessibility** | Consideration of access to and around each centre was informed by the Nexus site visits. This was in addition to stakeholder engagement, and a desktop review of data pertaining to access to public transport and parking facilities. The accessibility of a centre is determined by considering the ease and convenience of access by a variety of transport means including pedestrians, cyclists and disabled people.
- **Perceptions of Safety and Occurrence of Crime** | General perceptions of safety were gathered by Nexus during the site visits and supplemented by a review of existing data and stakeholder feedback.

- **State of Town Centre Environmental Quality** | Consideration of the quality of the buildings and public realm in each of the centres was informed by Nexus' site visits to the centres.
- **Balance between independent and multiple stores** | Consideration of the balance of retailer representation was informed by Nexus' site visits to the centres, stakeholder engagement, as well as Goad mapping.
- **Extent to which there is evidence of barriers to new businesses opening and existing businesses expanding** | Attention was given to the length of unit vacancies as per Goad Reports, as well as the size of units available to let, and insights provided through engagement with relevant stakeholders operating businesses within the centres.
- **Opening Hours / Availability / Extent to which there is an evening and night time economy offer** | General understanding of the night time economy was informed by Nexus' site visits to the centres, stakeholder engagement, and a review of various local businesses' opening hours online.

Health Check Assessments

- 4.8 In the sections following, a health check assessment is presented for each town and large village centre within the District. For each, a range of information, as described above, is presented where available.

Burgess Hill Town Centre

Description & Status

- 4.9 Burgess Hill is located on the edge of the South Downs National Park and is on the border of West and East Sussex. The core part of the centre is located along Station Road, Church Road, Church Walk, Martlets Shopping Centre and Market Place Shopping Centre. These main shopping areas are interconnected by pedestrianised routes. As Burgess Hill is one of the larger town centres in the district, the amenities and shopping services are well used by the surrounding villages, providing everyday essentials for local people.
- 4.10 Mid Sussex District Council have approved plans for a major redevelopment in parts of Burgess Hill Town Centre including The Martlets Shopping Centre. The extant permission, when developed, would provide new homes, retail, leisure facilities, a hotel and extensive public realm upgrades.
- 4.11 Burgess Hill is defined as a Main Town Centre in the adopted District Plan. The centre is located within the Burgess Hill Neighbourhood Plan area which was made in 2016.

NB: A full sized composition plan can be viewed at Appendix D.

Figure 10. Burgess Hill Town Centre Health Check Assessment Table

Health Check Indicator	Summary
Overall Composition	<p>Figure 8 provides an overview of Burgess Hill's composition at the time of the site visits in November 2021 compared to the UK average (2021). The current overall composition is broadly similar to the UK averages for both units and floorspace. Where there are notable discrepancies, these have been picked up in the sections following.</p> <p>Mid Sussex District Council have approved plans to redevelop parts of Burgess Hill Town Centre including the Martlets Shopping Centre; however, this has been subject to recent delays. The extant permission, when developed, would support the introduction of retail, a new gym, cinema, bowling alley, hotel and 172 flats and extensive public realm upgrades.</p>
Convenience	<p>There are 15 convenience units which account for 7.6% of the overall composition in Burgess Hill Town Centre. This is slightly lower than the UK average of 9.2%. Since the previous health checks were undertaken for the 2014 Retail Study, the overall proportion of convenience floorspace has reduced from 14.4% to 11.6%, which is also lower than the UK average of 15.4%.</p> <p>The centre is anchored by a Waitrose and features other national multiples including Greggs, Iceland and Holland & Barrett. The remainder of convenience units in the centre consist of predominantly independent retailers including a tobacconist, butchers, off licence, bakers and confectionary store.</p>
Comparison	<p>Comparison units account for 25.8% of the overall units which is slightly lower than the conclusions of the previous retail study (28.4%), and the UK average (27.1%).</p> <p>The key national comparison operators include New Look, WH Smith, Wilko and Boots. There is a lack of fashion stores within the centre, with New Look, Peacocks, Bon Marche, M&Co being the predominant clothing retailers.</p> <p>Charity shops were also prevalent in the centre including Cancer Research UK, Marie Curie Cancer Care, BHF, St Peter & St James Hospice and the Book Den.</p>
Services	<p>Since 2014 when the previous retail study health checks were carried out, retail service units have seen an increase of 3.0 percentage points to 19.2% whilst comprising 10.4% of the floorspace within the centre.</p>

Mid Sussex Retail Study

	<p>Both the percentage of units and floorspace are in excess of the UK averages, which stand at 15.6% (units) and 7.2% (floorspace).</p> <p>Leisure service units have seen a marginal decrease of 0.4 percentage points to 20.7% compared to 21.1% in 2014. The leisure services currently present in the centre are 16 fast food takeaways units, eight restaurants, four pubs and a karate health club.</p> <p>Financial and business services make up 12.1% of all units within the town centre, but only 8.6% of the overall floorspace, both of which are slightly higher than the UK averages.</p>
Vacancies	<p>The vacancy rate in the centre is 14.6% of the overall composition, slightly higher than the UK average of 14.2%. The vacancy rate also represents an increase since the previous retail study health checks were undertaken in 2014, from 13.2%.</p> <p>In 2014, vacant floorspace represented 11.4% of the floorspace across of the centre, and this figure has increased to 15.9%. This figure does not include recently demolished larger retail floorplates around The Martlets.</p> <p>Given the forthcoming redevelopment of the Martlets Shopping Centre, a slightly higher than average vacancy rate is to be expected while ongoing uncertainty reigns.</p>
Pedestrian Flows	<p>The Visitor Insights Baseline Report 2021¹⁴ revealed that 857,101 people visited the centre between September 2020 and September 2021 with the most popular day to visit being Thursdays. From the same report, the average dwell time was 163 minutes. Visits to the centre over this period were notably less than for Haywards Heath Town Centre and East Grinstead Town Centre.</p> <p>At the time of the site visits, it was observed that there was a higher flow of people along Church Walk and the indoor Market Place Shopping Centre than in other parts of the town. The Martlets was notably quiet.</p>
Accessibility	<p>The centre is within close walking distance to Burgess Hill train station which is on the Gatwick Express line, Southern Rail line and Thameslink.</p>

¹⁴ Visitor Insights derived from GPS data.

	<p>The town centre will benefit from a series of walking and cycling improvements being delivered through the Place and Connectivity Programme, which will provide safe, direct and attractive routes to encourage active travel. These improvements will better link the town centre through to the town's main public transport hubs and residential and employment areas.</p> <p>Parking was adequate at the time of the Nexus site visits. Free on-street car parking is available throughout the centre. Available off-street car parking spaces include:</p> <ul style="list-style-type: none"> • Martlets – 159 spaces (£0.80 per hour Mon-Sat 8am-6pm) • Market Place Shopping Centre – 293 space (£0.80 per hour Mon-Sat 8am-6pm) • Station Road – 120 spaces (£0.80 per hour Mon-Sat 8am-6pm) • Cyprus Road – 210 spaces (£0.80 per hour Mon-Sat 8am-6pm) • Church Road – 56 spaces (£0.80 per hour Mon-Sat 8am-6pm) • The Railway Tavern – 27 spaces (£1.00 per hour Mon-Sun) • Queens Crescent – 150 spaces (£0.80 per hour Mon-Sat 8am-6pm) • Burgess Hill Station – 136 spaces (£4.20 all day Mon-Sat) <p>The NEMS Household Survey found that 67.6% of respondents who identified that they visited Burgess Hill Town Centre the most, usually travelled by car as either the driver or passenger, while 24.7% usually walked.</p>
Perception of Safety	<p>The centre was relatively busy at the time of the site visit, providing significant natural surveillance across the centre. However, parts of the centre, including the area around the Martlets are due for redevelopment and remain vacant ahead of construction taking place, potentially drawing anti-social behaviour and loiterers.</p>
Opening Hours and the Evening Economy	<p>Burgess Hill's evening economy is underpinned by pubs, restaurants, a cinema, a theatre and the addition of a board game club. Many of these close at around 11pm. From a desktop survey of the centre, the majority of other stores hold regular opening hours of 9am until 5pm or 5:30pm.</p>

	<p>When asked how they would rate the evening and night time economy in Burgess Hill Town Centre, 37.8% of respondents to the NEMS Household Survey rated the provision as either 'poor' or 'severely lacking', indicating that there is room to improve in the evening offer.</p>
Environmental Quality and Public Realm	<p>The overall quality of the centre could be improved to create a nicer environment for shoppers. Parts of the centre, including Church Walk, have a lot of potential. Shopfronts would benefit from upgrades, and it was observed that fascia signage is fairly inconsistent throughout the centre. The area could benefit from soft landscaping along Church Road, but without over cluttering the pavement for pedestrians.</p> <p>The Church Road and Church Walk corridor is identified as an area for improvement in the Town Wide Strategy and Neighbourhood Plan. It is also identified as a priority area for public realm and connectivity improvements in the Place and Connectivity Programme to support the growth of the town and encourage people to shop locally and to complement the wider town centre regeneration proposals. The scheme concept proposes the upgrade of public spaces along the route and to enhance and bring together the various distinctive character areas, reflective of the emerging New River Retail proposals for the regeneration of Burgess Hill Town Centre.</p> <p>These extensive public realm improvements are likely to help catalyse further change.</p> <p>During the site visit it was noted that the roundabout on Station Road approaching Church Road and the shopping centre did not allow for a safe and accessible crossing.</p>
Barriers to Entry	<p>Burgess Hill is within 30 minute driving time of large centres including Brighton, Horsham and Crawley and therefore competes with larger destinations that have a more varied offer of retail and leisure units. At present there are a number of vacant units across the town ranging in size and location, giving potential retailers opportunity to find the right space. However, the ongoing uncertainty around the redevelopment of the Martlets Shopping Centre is very likely to be a detractor at the current time for both retailers and customers alike.</p>
Customer Views & Behaviour	<p>In the NEMS Household Survey, respondents were asked about what would encourage them to visit the Burgess Hill Town Centre more often. The most common three responses were 'increased general choice and range of shops' (29.4%), 'if it was updated/got a revamp'</p>

	<p>(14.3%), 'improved range of cafes/restaurants/pubs' (11.2%), and 'improved range of non-food shops' (10.5%).</p> <p>When asked what the respondents liked the most about Burgess Hill Town Centre, the most common responses were that it was 'close to home' (24.1%), and 'range of shops' (11.4%), suggesting that people mainly use the centre as a place that provides the day to day essentials.</p>
Key Takeaways	<p>Having completed the health check assessment for Burgess Hill Town Centre, the key takeaways include:</p> <ul style="list-style-type: none"> • The ongoing delay of the redevelopment of the Martlets Shopping Centre is having a negative impact on the overall vitality and viability of Burgess Hill Town Centre. This uncertainty surrounding the redevelopment is likely to continue deterring wider investment; • Enhancement to the overall public realm and landscaping will be integral to improving the environmental quality of the town centre and would have significant benefits for the appearance and perception of the area. The Church Road and Church Walk corridor is identified as an area for improvement in both the Town Wide Strategy and Neighbourhood Plan. These works would in turn assist in generating further investment in the wider town centre; • The centre has vacancy rate of 14.6% of the overall composition in the centre which has increased from 13.2% in 2014. While this is not significantly higher than the UK average, it is notable, and likely partly a result of the uncertainty surrounding the redevelopment of the Martlets Shopping Centre and aligns with findings around the reductions in market shares (Chapter 5); • Although Burgess Hill is one of the larger centres in the District, the range of shops, cafes, pubs and restaurants is limited as highlighted by responses to NEMS Household Survey. The evening economy was also found to be lacking. The ongoing uncertainty surrounding the redevelopment of the Martlets Shopping Centre is once again likely to be having an impact on the desire for leisure operators to commit to Burgess Hill Town Centre.

East Grinstead Town Centre

Description & Status

- 4.12 East Grinstead is a historic town centre in Mid Sussex and one of the oldest towns in the County. The ancient market town is the capital of the High Weald Area of Outstanding Natural Beauty (AONB). The retail provision in the centre is primarily located on London Road and the High Street is known for its row of 14th century timber framed Tudor and Medieval buildings. A large proportion of the High Street is located in the East Grinstead Conservation Area, for which a Conservation Area Appraisal was completed in 2019. East Grinstead is also known for the Bluebell Railway which runs a preserved steam train from East Grinstead to Sheffield Park Station, a return journey covering 20 miles through the Sussex countryside.
- 4.13 East Grinstead is defined as a 'Town Centre' within the Mid Sussex District Plan 2014-2031. The centre is located within the East Grinstead Neighbourhood Plan area which was made in 2016.

Figure 14. East Grinstead Town Centre Composition Plan

NB: A full sized composition plan can be viewed at Appendix D.

Figure 15. East Grinstead Town Centre Health Check Assessment Table

Health Check Indicator	Summary
Overall Composition	<p>East Grinstead is one of three large town centres in Mid Sussex and has a good mix of uses comprising 229 units. During stakeholder sessions, it was noted that the centre is well served by independent and specialist stores.</p> <p>Figure 13 provides an overview of East Grinstead's composition at the time of the site visits in November 2021, compared to the UK averages (2021). It also provides a comparison to previous health checks carried out in July 2014.</p>
Convenience	<p>East Grinstead has seen an increase in convenience units since 2014, from 4.3% to 7.9% of the overall units in the centre which is an increase in 3.6 percentage points. This is slightly below the UK average of 9.2%. Overall, convenience floorspace accounts for 12.2% of the centre's total floorspace, which is slightly below the UK average of 15.4%. The centre has a range of convenience stores with the main big name brands including Waitrose, Holland & Barrett, Iceland and Greggs. The remaining convenience stores are mainly independent which include a tobacconist, health food store, bakery, confectionary store, off licence and shoe repairs.</p>
Comparison	<p>The centre has seen a significant decrease in the number of comparison units since 2014, at which point, comparison units accounted for 35.1%. In 2021, comparison units made up 27.1% which is in line with the UK average. Notwithstanding, comparison units still make up the largest proportion of units in the centre.</p> <p>The comparison offer comprises of a mix of charity shops, florists, jewellers, banks and health food stores. Stakeholders also identified that there is a positive mix of independent and specialist stores in East Grinstead which was considered to be an important draw to the centre.</p>
Services	<p>The overall number of services available in the centre has remained similar to the previous Study, which was published in 2014.</p> <p>Retail services account for 21.8% of units which is higher than the UK average of 15.6%. The majority of these broadly fall within the health and beauty sector, opticians and dry cleaners.</p> <p>Leisure services accounted for 21.4% which is slightly lower than the UK average of 24.6% and remain similar to the 2014 results of 21.7%.</p>

Mid Sussex Retail Study

	<p>During the stakeholder sessions, stakeholders highlighted that both the existing leisure centre and cinema complex would benefit from upgrading.</p> <p>The financial and business service units within the centre have remained the same in both 2014 (14.4%) and 2021 (14.4%). In terms of floorspace, financial and business service units account for 12.5%, compared to the UK average of 6.9%. These figures indicate that some of the financial and business services in the centre may have larger than average floorplates.</p>
Vacancies	<p>The number of vacant units in the centre have remained largely the same in both 2014 (7.7%) and 2021 (7.4%) which in any event is lower than the UK average of 14.2%.</p>
Pedestrian Flows	<p>During the site visits, there was limited footfall towards the northern end of the High Street. However there were noticeably higher levels of footfall along London Road which is consistent with the higher concentration of larger retailers such as Boots, WHSmith, Waterstones and Costa Coffee, as well as the Martell's Department Store.</p> <p>The Visitor Insights Baseline Report 2021 revealed that 1,296,544 people visited the centre between September 2020 and September 2021 with the most popular day to visit being Thursdays. From the same report, the average dwell time was 167 minutes.</p>
Accessibility	<p>East Grinstead is served by a railway station situated north west of the centre which provides direct connections to London Victoria. The legibility from the train station to East Grinstead Town Centre is poor, due to lack of signage.</p> <p>The centre is accessible via bus services that have direct links to locations across the County. Stakeholders commented that public transport connections to Gatwick Airport could be improved, and that more buses would be beneficial.</p> <p>The NEMS Household Survey found that 1.2% of respondents who identified that they visited East Grinstead Town Centre the most, usually travelled by bus. Meanwhile, 76.5% usually travelled by car as either the driver or passenger, and 19.2% usually walked.</p> <p>In terms of availability of car parking, the Town Centre is serviced by the following key off-street car parks:</p>

Mid Sussex Retail Study

	<ul style="list-style-type: none"> • Queensway – 163 spaces (Mon- Sat 8am-8pm at £0.80 per hour) • Christopher Road – 44 spaces (Mon-Sat 8am-6pm at £0.80 per hour) • King Street – 70 spaces (Mon-Sat 8am-6pm at £0.80 per hour) • Chequer – Mead – 122 spaces (Mon-Sat 8am-6:00pm at £1.20 per hour) • Vicarage – 153 space (Mon-Sat 8am-6:00pm at £1.20 per hour) • Waitrose car park – (free for 2 hours for customers) <p>There is also on-street car parking available, much of which is 'pay & display' including the High Street. London Road and some other surrounding streets are part of the Controlled Parking Zone.</p>
Perception of Safety	<p>Stakeholders noted that generally speaking the town centre was a safe place, with limited occurrence of crime. It was, however, noted that the existing police station, which is located on De La Warr Road, is only open Monday to Friday between 10am-2:00pm. The town centre and wider area would therefore be better served by a police station that runs 24 hours 7 days a week.</p>
Opening Hours and the Evening Economy	<p>A high proportion of businesses open between the hours of 9am-5:30/6:00pm on weekdays. There is however a cinema and restaurants along the High Street and London Road which make an important contribution to the night time offering of the area.</p> <p>It was noted during the stakeholder sessions that many of the retailers close between 5:30-6pm. Very few stores open later into the evening, other than traditional evening uses such as restaurants, bars and pubs.</p> <p>When asked how they would rate the evening and night time economy in East Grinstead Town Centre, 35.1% of respondents to the NEMS Household Survey rated the provision as either 'plentiful' or 'good'.</p>
Environmental Quality and Public Realm	<p>East Grinstead benefits from an attractive High Street with historic shopfronts that are quaint. The Conservation Area Appraisal, which was completed in 2019, described East Grinstead as 'one of the best surviving medieval market towns in Sussex, famous for its timber framed buildings and its ridgeline setting within the High Weald landscape'. However, further to the north along London Road, the quality begins to diminish.</p>

	<p>It was also noted during consultation sessions that littering is considered a big issue on the High Street. Regular organised clean-ups or provision of larger bins may help to improve the appearance and cleanliness of the street scene. Hanging baskets were empty at the time of visit although this may be due to the time of the year, and overall there was limited planting throughout the centre.</p>
Barriers to Entry	<p>There is a high concentration of listed buildings along the High Street. As Listed Building Consent would be required for alterations, the listed status of these building may be considered to be a potential barrier to entry for new businesses as alterations would need to demonstrate a lack of harm to the historic environment. The vacant units that are available are mainly small scale; a possible deterrent to larger retailers considering East Grinstead as an option.</p>
Customer Views & Behaviour	<p>The stakeholder sessions were attended by representatives from East Grinstead Town Council and East Grinstead Business Association. Some of the feedback provided included the following thoughts and key views:</p> <ul style="list-style-type: none"> • The centre has a large range of independent and specialist shops which contribute to making the centre an attractive place for visitors; • Conversely it was noted that there is a shortage of larger nationals and upmarket retailers in the centre which could be considered a potential weakness; • There are concerns of a growth in discount stores which may create a negative perception of the town centre; • The northern end of London Road appears to be suffering from less footfall and dated appearance of shopfronts; • Key events for the Town Centre across the year include a French Market and Christmas lights and shop front window reveal event. Local events were generally very popular pre-Covid; • Shops need to be open past 6pm in order to provide a better night time economy; • Future developments should seek to highlight the unique heritage and create an experience to draw more visitors to the centre as a destination; • Recycling is not easily available to shoppers; • Public toilets are well kept; • Public transport connections to Gatwick Airport are poor; and

	<ul style="list-style-type: none"> • Transport connections to Eastbourne are limited. <p>When asked whether their main food shop was linked up with any other activity, the NEMS Household Survey identified that 78.3% of people living in Zone 6 (East Grinstead), linked their main food shopping trip with a visit to East Grinstead Town Centre. This indicates that the majority of those undertaking their main food shop at supermarkets in the Town Centre are also visiting other stores on the same trip.</p> <p>When asked in the NEMS Household Survey what would encourage them to visit East Grinstead more often, the common responses were 'increased general choice and range of shops' (26.0%), 'cheaper parking' (19.0%), and 'improved non-food shops within the town centre' (11.6%).</p> <p>While stakeholders identified the provision of independent units in East Grinstead Town Centre to be an important strength, respondents to the NEMS Household Survey were less convinced, with 30.3% stating that they thought the provision of independent units was either 'poor' or 'severely lacking'.</p>
Key Issues	<p>Having completed the health check assessment for East Grinstead Town Centre, the key takeaways include:</p> <ul style="list-style-type: none"> • While the town centre is serviced by buses and a railway station, public transport links could be improved, and in particular, links to Gatwick Airport. As noted through the stakeholder engagement, stakeholders noted that public transport is relatively limited and bus provision is considered to be particularly poor. Bicycle facilities could be improved to help attract cyclists; • There is an opportunity to improve the link and wayfinding between the core town centre and the railway station; • The centre has a successful offering of independent units and this is seen to be a strength that should be harnessed as much as possible; • The historic environment provides an important platform to market the town as a destination with a particular focus on the unique historic character including linking the centre with existing tourist facilities such as the Bluebell Railway nearby;

Mid Sussex Retail Study

	<ul style="list-style-type: none"> • The quality and attractiveness of shopfronts decreases as you move northbound and away from the historic buildings on the High Street. A joined up approach to shopfront improvements could be utilised as a strategy to improve the attractiveness of East Grinstead Town Centre; • The majority of the units in the centre close at 5:30pm, limiting the potential for an established night time economy. However 35.1% of respondents to the NEMS Household Survey rated the provision of evening economy as either 'plentiful' or 'good', which indicates that while there is room for improvement, the provision of evening uses is okay.
--	---

Haywards Heath Town Centre

Description & Status

- 4.14 Haywards Heath is located in the centre of the District providing a range of services and amenities that are not widely available to the smaller neighbouring villages. Retail units are concentrated along South Road, Sussex Road, the Broadway and the Orchards Shopping Centre which accommodates a number of national multiples.
- 4.15 The Haywards Heath Town Centre Masterplan SPD was adopted by the Council in 2021. The Masterplan sets out the current baseline position and identifies key character areas that contribute to Haywards Heath's unique character and opportunity areas and projects. The document has been designed to provide a framework for future planning decisions as well as investment, and focusses particularly on Council owned assets.
- 4.16 Haywards Heath is defined as a 'Town Centre' within the Mid Sussex District Plan 2014-2031. The centre is located within the Haywards Heath Neighbourhood Plan area which was made in 2016.

Figure 19. Haywards Heath Town Centre Composition Plan

NB: A full sized composition plan can be viewed at Appendix D.

Figure 20. Haywards Heath Town Centre Health Check Assessment Table

Health Check Indicator	Summary
Overall Composition	<p>Figure 18 provides an overview of Haywards Heath Town Centre's composition at the time of the site visits in November 2021 compared to the previous health checks in 2014 and the UK average for October 2021.</p> <p>There are currently 223 units within Haywards Heath, which is anchored by a Marks and Spencer. There is a large car park adjacent to the Orchards Shopping Centre, which provides a focal point for retail. The town centre has a mix of independent and national multiples including Clarks, Fat Face, Waterstones, Next, Boots and Costa Coffee.</p> <p>The Haywards Heath Masterplan, which was published in 2021, identifies a series of objectives that range from strengthening the centre's distinct character areas, improving the offer of car parking, integrating greenspaces and providing opportunities to live in the town centre. The Council is a significant landowner, and the masterplan identifies sites that present significant mixed-use development opportunities, including, notably, the Orchards Shopping Centre.</p>
Convenience	<p>The centre has seen a slight decrease of 1.0 percentage points in convenience stores (6.7%) compared to 2014 figures (7.7%). This proportion of convenience units in 2021 is lower than the UK average of 9.2%. In terms of convenience floorspace, the centre has the same proportion as the UK average of 15.4%.</p> <p>Haywards Heath has a number of national multiple convenience brands including M&S, Tesco Express, Iceland, Holland & Barrett, COOK and Greggs. The remaining convenience operators are independent including butchers, off licence, tobacconists and local grocer. During the stakeholder sessions it was discussed that one of the town centre's weaknesses is that there is no other supermarket outside of the M&S.</p> <p>Notably however, there is a large Waitrose and a Sainsbury's adjacent to the train station, both outside of the Town Centre boundary. The train station and supermarkets are less than a 10-minute walk from The broadways, which is within the town centre boundary, and improved pedestrian connections could provide opportunities for linked trips.</p>

Comparison	<p>Comparison units account for the majority of the stores within Haywards Heath with 84 units, representing 37.7% of the overall composition. There has been a slight drop in comparison stores since 2014, when comparison units accounted for 40.3% of the overall units.</p> <p>The centre comprises of a mix of independent stores and national comparison retailers, including Next, Accessorize, Superdrug, Fat Face, Waterstones, and Millets. The provision of fashion multiples could be improved, although it is noted that the centre competes with larger destinations including Crawley and Brighton due to their relative proximity. This is confirmed by the NEMS Household Telephone Survey result, which identified that 10.4% of respondents who visited Haywards Heath most often considered that an increased general choice and range of shops would encourage them to visit more frequently.</p>
Services	<p>The proportion of retail service units has risen from 14.8% of the total units in 2014, to 17.0% in the overall composition in 2021. This is slightly above the UK average of 15.6%.</p> <p>Leisure services account for 17.5% of units in the centre which has remained largely the same since 2014. However leisure floorspace has risen significantly from 14.9% in 2014 to 25.6% in 2021 which is aligned with the UK average. As identified by stakeholders, the centre has a good range of restaurants, bars and cafes, contributing to the growth in the proportion of leisure services over time.</p> <p>Financial and business services account for 12.6% of the centre's units and 25.6% of floorspace which is slightly above the UK averages of 9.1% for units and 6.9% for floorspace. The centre's offer includes a wide range of banking options, as well as a notable number of estate agents, which specifically account for 60.7% of all financial and business services.</p>
Vacancies	<p>At the time of the site visits in November 2021, there were 19 vacant units (8.5%), a lower proportion than the UK average (14.2%). This demonstrates the success of the large number of independent retailers and services available in the centre. The majority of the vacant units were located on the southern end of the Broadway as well as a few along South Road.</p>

<p>Pedestrian Flows</p>	<p>During the site visits, high pedestrian flows were observed throughout the centre. The Orchards was observed to be noticeably busier than along the Broadway where there are more leisure services.</p> <p>The Visitor Insights Baseline Report 2021 revealed that 1,181,497 people visited the centre between September 2020 and September 2021 with the average visit frequency of 10 times per annum. From the same report, the average dwell time was 174 minutes and the most popular day to visit was Wednesday.</p>
<p>Accessibility</p>	<p>Haywards Heath station is located north of the town centre boundary, and offers direct services to Brighton, Cambridge, London and Eastbourne. The station is served by Southern Rail trains and Thameslink. Stakeholders referenced an opportunity to have a 'Hopper Bus' service the town centre, to take shoppers between the main parts of the town centre and the train station.</p> <p>There is a good provision of car parking in Haywards Heath. Available spaces include:</p> <ul style="list-style-type: none"> • The Orchards Shopping centre – 208 spaces (£1.20 for 2 hours and free after 6pm) • Haywards West Car Park – 49 spaces (£1.20 for 2 hours and free after 6pm) • Hazelgrove Road – 118 spaces (£1.20 for 2 hours and free after 6pm) • Haywards East – 40 spaces (£1.20 for 2 hours and free after 6pm) • Gower Road – 20 spaces (£1.20 for 2 hours and free after 6pm) • Franklynn Road – 75 spaces (£1.20 for 2 hours and free after 6pm) <p>There is also free on-street parking available throughout the town centre.</p> <p>It was identified in the NEMS household survey that 73.5% of respondents who identified that they visited Haywards Heath the most often travelled to the centre by private vehicle as either a passenger or driver. Meanwhile 21.9% of respondents identified that they usually walk, and 1.2% arrived by bicycle.</p>

	Stakeholders advised that bicycle parking is currently lacking, and easily accessible bicycle racks/spaces may help to encourage visitors to cycle to the centre.
Perception of Safety	The centre was observed to be relatively busy at the time of the site visits, providing significant natural surveillance across the centre. The perception of crime in Haywards Heath was therefore low. Stakeholders also identified that formal CCTV has been an important deterrent for petty crime and anti-social behaviour. The presence of a security guard within the Orchards Shopping Centre has been an important step in reducing crime in that part of the town.
Opening Hours and the Evening Economy	<p>Haywards Heath has a high portion of bars and restaurants along the Broadway that close between 9pm and 12am on the weekends, ensuring a good quality evening offer. However there are limited evening economy uses along South Road and in the Orchards Shopping Centre.</p> <p>When asked how they would rate the evening and night time economy, 38.5% of respondents to the NEMS Household Survey thought the provision was either 'plentiful' or 'good'. Meanwhile 14.3% stated that the evening economy was 'poor' or 'severely lacking'.</p>
Environmental Quality and Public Realm	Reasonably wide pavements provide a positive shopping experience for shoppers, and Victoria Park provides an attractive town centre backdrop. The Masterplan has identified an opportunity to make more of the park and church yard. Along South Road and Sussex Road, additional trees/planting would create an even nicer environment. Where planter boxes are present, they were noted to be in a poor state of disrepair, a fact confirmed by stakeholders. Shopfront improvements and a consistent shop front strategy would also make the centre appear more attractive.
Barriers to Entry	<p>The Haywards Heath Town Centre Masterplan provides detailed analysis of potential development sites within Haywards Heath Town Centre. It also identifies a range of interventions that would make significant improvements to the vitality of the town centre, which would in turn have important positive knock on effects for future investment.</p> <p>Lack of available premises and potentially high cost of units are considered to be factors that may reduce the potential for new traders to enter the town centre in the near term.</p>

<p>Customer Views & Behaviour</p>	<p>Comments received during stakeholder consultation included:</p> <ul style="list-style-type: none"> • The retailers in the Orchards share the use of the security operators which makes the centre feel more safe; • The buildings are not well kept and many of the shopfronts need repainting to make the overall look of the town centre more inviting; • Soft landscaping around the town centre should be used to make the centre appear more attractive; • M&S is the only large town centre supermarket, and the town centre would benefit from another; • Although the Broadway has many restaurants, there are not enough bars to create vibrancy in the area in the evening and more night time uses would strengthen the centre's offer; • South Road and the Broadway are very disjointed, and there is a clear distinct between the two sections; • Pavements and the public realm more generally need some improvement to create a more attractive environment; • Litter and rubbish from fast food outlets needs to be resolved; • There needs to be a better provision of cycle parking and routes; • There are not enough activities aimed at the younger generation, and as a result these groups are more likely to opt to go to other larger centres such as Brighton or Crawley. <p>When asked in the NEMS Household Survey what respondents currently like about Haywards Heath, the most common responses were 'close to home' (30.6%), followed by 'range of shops' (18.5%).</p> <p>Conversely, when asked 'are there any measures that would encourage you to visit more often' the most common responses were 'increased general choice and range of shops' (10.4%) followed by 'improved non-food shops within the town centre' (7.9%). These responses indicate that while respondents are mostly satisfied with the range of shops available throughout the centre, there is still room for improvement.</p>
--	---

<p>Key Takeaways</p>	<p>Having completed the health check assessment for Haywards Heath Town Centre, the key takeaways include:</p> <ul style="list-style-type: none"> • Buildings in the centre would benefit from upgrading or repainting in order to improve the appearance and perception of the area, and overall environmental quality; • Public realm upgrades would also provide wider benefits in maximising development and investment opportunities, as well as improving the experience of pedestrians; • An opportunity exists related to the Orchards Shopping Centre, which is in Council ownership. The Masterplan identifies this site for possible improvements, and mixed-use development. If viable, residential development could be incorporated; • Comments from stakeholders suggested that there was an under provision of supermarkets in the centre, and that more variety in convenience goods floorspace would benefit the town centre; • While the town has a railway station, this is located outside of the town centre, providing less opportunities for linked trips. However, the station and The Broadway are less than a 10 minute walk. Pedestrian and cycle links could be improved between the railway station and the town centre to connect the station and the surrounding retail offer with the town centre; • There is a concentration of leisure and retail services along the Broadway, while the majority of comparison goods shops are located along the South Road. This creates a disconnect between these two very distinct parts of the town centre. In order to capitalise on the distinct character areas, better pedestrian connections could be provided to provide a clear link, and attract movement between the two.
-----------------------------	---

Copthorne Village Centre

Description & Status

- 4.17 Copthorne is a small village in the northern part of Mid Sussex, but in close proximity to Crawley and Gatwick Airport. The main retail offer is located along Copthorne Bank and includes a range of small convenience stores, services and a public house. There is also a small selection of shops at the corner of Copthorne Bank and Church Road, and a convenience store further to the south on Church Road.
- 4.18 Copthorne is designated as a Category 2 settlement under Policy DP6 (Settlement Hierarchy) in the current Mid Sussex District Plan (2031). In respect of its retail function however, Copthorne is not defined as one of the five Village Centres under Policy DP3 (Village and Neighbourhood Centre Development). Worth Parish Council has prepared a Neighbourhood Plan for Copthorne village, which was made on 29 September 2021.

NB: A full sized composition plan can be viewed at Appendix D.

Figure 25. Copthorne Village Centre Health Check Assessment Table

Health Check Indicator	Summary
Overall Composition	<p>Copthorne is one of the smallest centres within the District, and the village centre comprises 12 units. The centre provides a range of services, mostly very local in nature. The units are predominantly independent stores, and there are three convenience stores that cater for the day-to-day needs of the local population.</p> <p>Figure 23 provides an overview of Copthorne's composition at the time of the site visits in November 2021, compared to the UK averages (2021).</p>
Convenience	<p>Convenience units in Copthorne account for 25.0% of the overall composition of the centre which is significantly higher than the UK average of 9.2%. The three convenience stores include a McColl's, Premier, and Kwik Mart.</p> <p>The convenience stores in Copthorne principally function as day-to-day destinations, for more frequent top-up purchases rather than main shopping.</p>
Comparison	<p>Currently, there are two comparison units in Copthorne which account for 16.7% of the overall centre. Both comparison units are independent and consist of a florist and a fitted kitchens store.</p> <p>The lack of comparison goods stores is as would be expected when considering the centre's status within the wider town centres hierarchy, and close proximity to larger centres including East Grinstead, Crawley, Horsham and Royal Turnbridge Wells.</p>
Services	<p>There are three retail service units in the centre which accounts for 16.7% of the overall composition of the centre. All three retail services are independent hairdressers.</p> <p>There are two leisure services; the Prince of Albert Pub and takeaway pizza unit. Stakeholders suggested that there is a lack of places to meet and socialise in the centre and that a coffee shop or cafe would be a good addition.</p> <p>There are two financial and business service units, both real estate agents; Connells Estate Agent and Copthorne Nicholson Property Services.</p>

Vacancies	During the Nexus site visits, no vacancies were identified in Copthorne.
Pedestrian Flows	At the time of the Nexus site visits to Copthorne, footfall was observed to be fairly low, however, this is expected due to the predominantly residential and local nature of the centre, and limited offer.
Accessibility	<p>Free on street parking is located in front of the cluster of shops on Copthorne Bank. There is also a public car park adjacent the Prince Albert Pub. It was noted during the stakeholder sessions that the convenience stores do not have enough parking.</p> <p>The centre also benefits from bus services that connect residents to Gatwick Airport as well as the other neighbouring centres such as Crawley Down and East Grinstead.</p> <p>Copthorne is an 8 minute drive to Gatwick Airport and there is direct access to the M23.</p> <p>When asked how they usually travel to Copthorne Village Centre, 54.0% of respondents identified that they walk, while the remaining 46.0% travelled by car as either driver or passenger.</p>
Perception of Safety	<p>At the time of the Nexus site visits, the perception of safety in the centre was good. The presence of the residential dwellings along Copthorne Bank provides natural surveillance, though to a lesser degree than active frontages of commercial units would.</p> <p>During the stakeholder sessions it was discussed that anti-social behaviour peaked during the Covid-19 lockdowns due to a lack of local activities for the younger generation.</p>
Opening Hours and the Evening Economy	<p>The main source of evening economy within the centre is the public house. Notably, many of the convenience stores close at 10pm.</p> <p>When asked how they would rate the evening and night-time economy in Copthorne, 46.3% of respondents stated 'average', while 18.7% said it was 'severely lacking'.</p>
Environmental Quality and Public Realm	The centre has a reasonable environmental quality however some of the shopfronts would benefit from upgrades to the signage in order to create better consistency and visual appeal. The pavements along Copthorne Bank at its junction with Meadow Approach are relatively wide, and could present an opportunity for soft planting.

Barriers to Entry	The overall composition of the centre comprises only 12 units with no available vacant units. There is also limited available development sites, meaning that expansion of the centre is unlikely.
Customer Views & Behaviour	<p>Representatives of Copthorne village were consulted through the stakeholder sessions. The following thoughts and views were shared in relation to the health of the centre:</p> <ul style="list-style-type: none"> • The stakeholders identified that retail provision is fragmented; • The centre is not well connected for commuting and other transport links and there is no direct walking or cycle route to connect Copthorne and Crawley; • Copthorne was considered to have a higher than average crime rate during the height of the pandemic, as there are limited available activities that cater towards the younger demographic in the area; • The stakeholders suggested that there is a lack of places to meet and socialise in the centre and that a coffee shop or cafe would be a good addition; • Street lighting should be improved to improve the visual attractiveness of the public realm; • The centre is local in nature and does not have a specific identify or uniqueness that would draw in visitors; • Stakeholders noted that there were too many convenience stores but not enough available parking. <p>When asked in the NEMS Household Survey, what respondents like most about Copthorne Village Centre, the most common responses were 'close to home' (31.0%), followed by 'close to work' (28.7%). This is a clear indication that the centre's role in the wider retail hierarchy is one of convenience.</p>
Key Takeaways	<p>Having completed the health check assessment for Copthorne Village Centre, the key takeaways include:</p> <ul style="list-style-type: none"> • Despite the centre sufficiently providing for the immediate day to day essentials for the local residents, the centre lacks a community centre or sufficient places for people to gather; • There is a very limited offer of leisure services within the village, and therefore it is likely that local residents travel to neighbouring villages or areas that have more variety;

Mid Sussex Retail Study

	<ul style="list-style-type: none"> • It was identified by stakeholders that street lighting was not adequate in the area. Improvements to the street lighting and wider public realm would help to create a sense of place for the village.
--	--

Crawley Down Village Centre

Description & Status

- 4.19 Crawley Down is a small village, and together with Copthorne, forms Worth Parish Council. The retail provision of Crawley Down comprises of a series of stores that cater for the day-to-day needs of the local residents. The main centre is concentrated along the Western edge of Station Road and is predominantly surrounded by residential dwellings.
- 4.20 Crawley Down is designated as a village centre by virtue of policy DP3 of the Mid Sussex District Plan 2014-2031. The centre is located within the Crawley Down Neighbourhood Plan area which was made in 2016.

Figure 29. Crawley Down Village Centre Composition Plan

NB: A full sized composition plan can be viewed at Appendix D.

Figure 30. Crawley Down Village Centre Health Check Assessment Table

Health Check Indicator	Summary
Overall Composition	<p>Figure 28 provides an overview of Crawley Down's composition at the time of the site visits in November 2021, compared to the UK averages from October 2021.</p> <p>The centre is currently made up of nine units, making it one of the smallest centres in the District.</p>
Convenience	<p>There are a total of four convenience units within Crawley Down which makes up 40.0% of all units. The centre features a Co-op Food, McColl's, an independent butcher and delicatessens.</p> <p>The NEMS Household Survey results showed that 23.6% of respondents who live in Zone 5 do their top-up shopping in the Co-operative on Station Road.</p>
Comparison	<p>There was one comparison unit identified within the centre at the time of the Nexus site visits, this being the pharmacy located on Old Station Close.</p>
Services	<p>Overall services make up 40.0% of the proportion of units in the village centre. Two retail services are present, a hairdressing salon and a barber. There are also two leisure service units, The Carriage restaurant and the Velvety Ginger Indian takeaway. There were no financial and business units identified within the centre.</p>
Vacancies	<p>At the time of the surveys, there was one vacant unit in Crawley Down, the Royal Oak pub. The pub, which comprises an impressive building, would contribute to the Crawley Down's evening economy.</p>
Pedestrian Flows	<p>During the Nexus site visits, it was observed that footfall throughout the village centre was relatively low. The main focus of pedestrian flow was observed near the Co-op Food store.</p> <p>The Visitor Insights Baseline Report 2021 revealed that 157,846 people visited the centre between September 2020 and September 2021 with the average visit frequency of 9 times per annum. From the same report, the average dwell time was 265 minutes and the most popular day to visit was Wednesdays.</p>
Accessibility	<p>There is no train station to Crawley Down however it is in close proximity to the M23 and a ten minute drive to Gatwick Airport and</p>

	<p>East Grinstead railway stations. There is a limited bus service that runs to Crawley, Copthorne and East Grinstead.</p> <p>There are two publicly accessible free car parks on Burleigh Way. One has 13 space, while the other has 16.</p> <p>The NEMS Household Survey asked respondents how they usually travel to the centre they visit most often. For Crawley Down, 54.9% of respondents travelled by car as either the driver or passenger, and 39.3% walked.</p>
Perception of Safety	<p>During the Nexus site visits it was observed that Station Road had a good amount of natural surveillance and during the stakeholder consultation, it was not identified that crime is an issue. However it was identified during stakeholder sessions that CCTV cameras would be a good addition to increase the perception of safety in the centre.</p>
Opening Hours and the Evening Economy	<p>Many of the businesses within Crawley Down Village centre were observed to have varying closing times, beyond the usual 9am-5pm. The Co-op Food convenience store mainly has opening hours of between 7am-10pm and the McColl's convenience store has opening hours of 6am to 9pm Monday to Saturday.</p> <p>Despite the centre being relatively small, there are two evening leisure services, including the Indian takeaway which closes at 11pm, as well as a British restaurant which closes at 11:30pm Fridays and Saturdays. The vacant public house, if brought back into use, would add further diversity to the village centre.</p>
Environmental Quality and Public Realm	<p>At the time of the Nexus site visits, it was observed that the pavement is fairly wide along the main parade of shops which allowed for ease of pedestrian accessibility. Shopfronts were observed to be slightly dated and could benefit from improvements.</p>
Barriers to Entry	<p>A clear barrier to entry includes the lack of commercial space as currently there is only one vacant unit in the centre.</p>
Customer Views & Behaviour	<p>The following thoughts and views were shared by stakeholders in relation to the health of the village centre:</p> <ul style="list-style-type: none"> It was noted that the Christmas lights reveal ceremony is a popular and successful, and there is a village fair each summer;

	<ul style="list-style-type: none"> • It has been observed that the centre is not a destination for which people would travel a long way to visit, but rather a successful set of shops that serves a local role for convenience within the wider village; • There is a good amount of parking provided which is free to use, however better management would be beneficial; • The vacant Royal Oak pub is designated as an asset of community value and over the years has been subject to many planning applications. However none have come to fruition and the site remains vacant. The site is now falling into a state of disrepair; • The centre would benefit from more CCTV cameras to increase perception of safety and deter crime. <p>The NEMS Household Survey showed that 30.1% of respondents from zone 5 visited the Crawley Down Village Centre the most of the centres assessed as part of this study. The centre clearly has an important role within the wider village.</p> <p>When asked what respondents like the most about Crawley Down, 26.3% said it was 'close to home', 10.9% said it was 'quiet/not too busy' and 8.9% said it was 'attractive environment/nice place'.</p> <p>When asked what would encourage them to visit Crawley Down Village Centre more often, 20.9% said 'improved range of cafes/restaurants/pubs', 15.2% said 'improved general choice and range of shops' and 11.7% said improved food shops'.</p>
Key Takeaways	<p>Having completed the health check assessment for Crawley Down Village Centre, the key takeaways include:</p> <ul style="list-style-type: none"> • The centre's offer is local in nature, and the diversity of uses is akin to its status as one of the smaller centres in the Study; • Stakeholders identified that there may need to be more CCTV cameras to improve the safety of crime in the area; • There is an opportunity present in the vacant Royal Oak pub, which could be renovated and reopened to provide more vibrancy to the centre; • It is acknowledged that there is a lack of development sites and available units for new businesses to enter the centre.

Cuckfield Village Centre

Description & Status

- 4.21 Cuckfield is a quaint village and civil parish in Mid Sussex District. The centre features a historic High Street which was once a market town. The streets are lined with attractive 16th century houses, many of which are listed buildings. The village is covered by a Conservation Area. The High Street has a range of independent boutique shops, vintage furniture stores, locally sourced produced etc.
- 4.22 Cuckfield is designated as a village centre by virtue of policy DP3 of the Mid Sussex District Plan 2014-2031 and is located within the Cuckfield Neighbourhood Plan area, which was made in 2014.

Figure 34. Cuckfield Village Centre Composition Plan

NB: A full sized composition plan can be viewed at Appendix D.

Figure 35. Cuckfield Village Centre Health Check Assessment Table

Health Check Indicator	Summary
Overall Composition	<p>Figure 33 provides an overview of Cuckfield's composition at the time of the site visits in November 2021.</p> <p>There are currently 33 units within Cuckfield Village Centre providing a range of services though mostly local in nature. The units are predominantly independent. The village centre has a unique character that draws in visitors from further afield than the immediate residential areas. The NEMS Household Survey found that 57.0% of respondents who visited Cuckfield Village Centre the most, thought the provision of independent units was either 'plentiful' or 'good'.</p>
Convenience	<p>Convenience stores account for two units, or 6.1% of stores in Cuckfield which is lower than the UK average of 9.2%. The convenience units comprise of a Nisa Local and an independent confectionary store.</p> <p>During the stakeholder sessions, participants identified that there is considered to be a gap in the market for another grocery store within Cuckfield Village Centre. Less mobile members of the population sometimes struggle to get basic essentials from local shops, and find it difficult to travel further afield to larger centres nearby.</p>
Comparison	<p>Comparison units accounts for the largest proportion of stores within the centre, with 12 units (36.4%). This exceeds the UK average of 27.1%.</p> <p>The centre comprises largely independent stores. There is a limited offer of national multiple comparison retailers, including Lloyd's Pharmacy.</p> <p>The centre features a positive range of independent comparison units including boutique style clothing stores, interior decorations stores and an art gallery.</p>
Services	<p>The service units account for 54.5% of the overall composition of the village centre. The majority of services have been identified as independent businesses.</p> <p>Retail services account for 24.2% of units which is above the UK average of 15.6%. The eight retail services include five hairdressers, a dog groomers, an optician and a funeral director.</p>

	<p>Leisure services account for 24.2% of units which is similar to the UK average by 0.4 percentage points (24.6%). The leisure services units include two pubs, two cafes, a fish and chip shop, an Indian restaurant and a British restaurant.</p> <p>There are two financial and business services units in the centre which accounts for 6.1% of the overall quantum. This is 3.0 percentage points below the UK average of 9.1%.</p>
Vacancies	<p>During the Nexus site visits, only one unit was observed to be vacant. This was located towards the central part of the High Street and was previously understood to be a saddlery store.</p>
Pedestrian Flows	<p>At the time of the Nexus site visits, the pedestrian footfall along the main high street had a steady flow of people.</p> <p>The Visitor Insights Baseline Report 2021 revealed that 300,238 people visited the centre between September 2020 and September 2021 with the average visit frequency of 9 times per annum. From the same report, the average dwell time was 251 minutes and the most popular day to visit is Thursdays.</p>
Accessibility	<p>Cuckfield does not benefit from a dedicated train station; the nearest being in Haywards Heath. However, a bus service does link Cuckfield and Haywards Heath, providing access to railways services. The centre also has easy access to the M23/A23 motorway.</p> <p>There is a limited amount of parking within the centre. Broad Street car park comprises 60 spaces and is free for 2 hours, There is also some on street parking which is only available to be used outside of operational hours, 8am-6pm Mon-Sat.</p> <p>When asked in the Household Survey how respondents usually travel to the centre, 65.7% travelled by car as either a driver or passenger, while 26.6% walked.</p> <p>Stakeholders identified that a lack of available parking is an issue for the centre. Congestion was also identified as an issue, along the High Street and South Road as they both are narrow.</p>
Perception of Safety	<p>During the Nexus site visits, it was observed that the main promenade is relatively safe with a good amount of natural surveillance from the shopfronts and houses. However, the narrow pavement towards the</p>

	<p>southern end of the road did not allow for safe passing of pedestrians whereby users are forced to walk onto the main road.</p> <p>Additionally, it was identified during the stakeholder sessions that there have been some illegal activities outside of public toilets whereby CCTV cameras will be enforced to deter future crime. Furthermore stakeholders made reference to some instances of anti-social behaviour during the Covid-19 lockdown period due to a lack of activities within the local area for youth.</p>
Opening Hours and the Evening Economy	<p>The centre has two public houses, two takeaways units and the restaurants, ensuring that the centre has a vital evening economy.</p> <p>The remainder of the centre operates traditional opening hours with the exception of the Cuckfield Pantry and Tea Room as well as Tom's Food café which both close at 3pm.</p> <p>The NEMS Household Survey found that 42.9% of respondents who visited Cuckfield Village Centre the most, rated the evening economy as either 'plentiful' or 'good'.</p>
Environmental Quality and Public Realm	<p>Cuckfield benefits from an attractive traditional village style historic and well maintained environment. The shopfronts are kept to a high standard, with valuable character and architectural details.</p> <p>Due to the historic nature, the pavements are narrow towards the southern end of South Street though the pavements do get wider towards the north. A low level of street lighting was observed within the centre.</p> <p>On-street parking dominates the street scene in parts of the centre, especially along High Street. This could be considered to have a slight negative impact on the otherwise attractive environmental quality.</p>
Barriers to Entry	<p>At the time of the site visits, the centre had a low vacancy rate of only one unoccupied unit. The limited availability of vacant space could be considered to be a barrier to entry for new traders.</p> <p>Additionally, a high proportion of units within the centre are listed buildings, this is potentially a barrier to entry for new businesses as any alterations will have to demonstrate a lack of harm to the historic environment.</p>
Customer Views & Behaviour	<p>Notable comments received during the stakeholder sessions included:</p>

	<ul style="list-style-type: none"> • Overall, the centre has a good range of independent and niche stores with a unique character; • There needs to be a provision for recycling in public areas; • Anti-social behaviour such as vandalism was noted to be an issue during Covid-19 lockdowns as the youth provision is considered to be particularly poor in the area; • There is a large elderly population that struggle to get out of Cuckfield due to accessibility issues but these groups also cannot get everything they need from within the centre as there is a lack of convenience stores; • The large vacant unit was discussed as a potential space for a grocery or hardware store; • There are issues with traffic management due to a lack of parking. Traffic calming measures may assist in resolving this issue. <p>The NEMS Household Survey asked respondents what would encourage respondents to visit the centre more often. The most common responses included 'improved food shops within the town centre' (11.4%) and 'increased general choice and range of shops' (11.1%).</p>
Key Takeaways	<p>Having completed the health check assessment for Cuckfield Village Centre, the key takeaways include:</p> <ul style="list-style-type: none"> • Comparison stores are well represented, while the centre suffers from a lack of convenience stores with only two units identified in the overall composition. This was confirmed through the NEMS Household Survey and stakeholder engagement, when stakeholders identified that additional local grocery stores would provide increased diversity in the centre's retail offer; • The centre benefits from an attractive environment, and it is a destination for both residents and tourists to visit; • There is a lack of car parking within the centre, and the current on street parking arrangement can create issues for congestion. Car parking management and traffic calming measures may need to be considered to assist in alleviating this issue.

Hassocks Village Centre

Description & Status

- 4.23 Hassocks village is located to the south of Burgess Hill around one mile east of Hurstpierpoint village. The main shopping area runs along Keymer Road (B2116), from the Budgen's store on Orion's' Parade to the junction with Woodsland Road. The centre is serviced by a railway station. The retail offer is supplemented by a parade of shops in Keymer, a short distance to the east of the centre.
- 4.24 Hassocks is designated as a village centre by virtue of policy DP3 of the Mid Sussex District Plan 2014-2031. The centre is located within the Hassocks Neighbourhood Plan area which was made in 2020.

Figure 40. Hassocks Village Centre Health Check Assessment Table

Health Check Indicator	Summary
Overall Composition	<p>Figure 38 provides an overview of Hassocks' composition at the time of the site visits in November 2021 compared to the UK average 2021.</p> <p>Hassocks performs an important role and function, serving the needs of the local community and neighbouring smaller villages in the area. The centre comprises a total of 55 units overall.</p> <p>The main shops in Hassocks run along Keymer Road. The operators are generally independent and offer a range of 'top up' convenience and key services, including post offices, banks, hairdressers and food and drink outlets. There are also a range of national multiples including Boots, Sainsbury's Local and a Nationwide.</p> <p>Hassocks' centre offer is supplemented by the offer of Keymer Neighbourhood Parade, a short distance to the east of Hassocks. This parade of shops is comprised of a convenience unit, two leisure services and two retail services.</p>
Convenience	<p>There are eight convenience units in Hassocks, making up 14.6% of all units, which is above the UK average of 9.2%.</p> <p>The centre has a wide range of convenience units including a butcher, delicatessen and an off licence. Four of these units are independent stores. The centre also features a Sainsbury's Local, Premier, McColl's and a Budgens.</p>
Comparison	<p>Comparison units account for 14 of the units or 25.5%, which is slightly lower than the UK average of 27.1%.</p> <p>Boots is the only 'big name' comparison store located in the centre. The remaining units are predominantly independent and include three charity shops, a clothing store, a florist and newsagent.</p>
Services	<p>Retail services account for 25.5% of all units which is significantly above the UK average of 15.6%. Hairdressers and beauty salons account for the majority of the retail services within the centre. Other retail services include an optician, post office, travel agent, vehicle repair store, an undertaker and dry cleaners.</p> <p>With seven units, leisure services accounts for 12.7% of all units in the centre, which is significantly below the UK average of 24.6%. The leisure</p>

Mid Sussex Retail Study

	<p>offer is generally limited, dominated by three cafes, two fast food takeaways and two restaurants (Indian and Chinese).</p> <p>Financial and business services account for 12.7% of all units in the centre, which is above the UK average of 9.1%. There are three estate agents and four solicitors.</p>
Vacancies	<p>During the site visits, five units were observed to be unoccupied which equates to 9.1% of units, and 8.5% of floorspace. Both figures are lower than the UK average.</p>
Pedestrian Flows	<p>At the time of the site visits, footfall was generally observed to be low within the centre.</p> <p>The Visitor Insights Baseline Report 2021 revealed that 392,970 people visited the centre between September 2020 and September 2021 with the average visit frequency of 10 times per annum. From the same report, the average dwell time was 249 minutes and the most popular day to visit is Wednesdays. It was also reported that the average number of indoor locations visited per trip was one store.</p>
Accessibility	<p>The main shopping area is in close proximity to Hassocks railway station, which provides connections to London and to Gatwick airport. By Road, the A273 runs past Hassocks, providing links to the south to Brighton and north to Burgess Hill and beyond to the north of the District.</p> <p>During the stakeholder session, it was acknowledged that the centre is a popular destination for cycling. However provision of cycle parking is limited which does not enable cyclists to safely store away their bicycles. Interestingly, the NEMS Household Survey did not find a high proportion of cyclists, with the majority of respondents usually travelling to the centre by private vehicle (54.1%) or walking (40.1%).</p> <p>There was an identified need for additional off street parking, and particularly for short stay visits. The main car parks are located at the railway station, charged at £2.50 for all day parking Mon-Fri, and free parking at Dale Avenue and the Orion car parks.</p>
Perception of Safety	<p>There was limited street lighting at the time of the visits. However, stakeholders did not identify any major issues with crime and safety, although noted that a more prominent police presence would assist in deterring anti-social behaviour.</p>

Opening Hours and the Evening Economy	There is a notable absence of a range of restaurants and other evening uses that means that Hassocks Village Centre does not currently have a particularly vibrant night time economy. The NEMS Household Survey found that 24.3% of respondents rated the evening economy in Hassocks as either 'poor' or 'severely lacking', while 24.8% rated it as 'average'.
Environmental Quality and Public Realm	Keymer Road was observed to have some soft landscaping with mature trees and greenery lining parts of the pavement. However some parts of the centre were observed to have limited architectural merit and some shopfronts are of poor quality. Stakeholders suggested that the public realm could be improved to create a nicer shopping environment. This sentiment has been notably carried through to the Neighbourhood Plan.
Barriers to Entry	Although, there are currently five vacant units within the centre, providing opportunities for new retailers to enter the centre, the majority of available units in the centre were observed to have smaller floorplates, which may not be attractive for larger operators. The centre is likely to be more attractive to smaller, independent retailers.
Customer Views & Behaviour	<p>Comments received during stakeholder consultation include:</p> <ul style="list-style-type: none"> • The location of the library is outside the village centre and would be better located in a more central location to maximise activity; • The public realm needs improvement; • Cycling is popular in the area, however cycle parking is lacking in the centre. The area would benefit from a better cycle route to link to neighbouring villages; • It was suggested to have traffic calming measures in place in order to reduce the speed of traffic; • More parking would benefit the village centre, however it was acknowledged that there is limited space to facilitate more parking spaces. <p>The NEMS Household Survey asked respondents what they liked about Hassocks. The most common responses were 'close to home' (29.0%), 'choice and range of shops' (12.2%), and 'attractive environment / nice place' (9.2%).</p>

Mid Sussex Retail Study

	When asked what would encourage them to visit Hassocks more often the most common response was 'more parking' (10.2%), followed by 'increased general choice and range of shops' (9.9%).
Key Takeaways	<p>Having completed the health check assessment for Hassocks Village Centre, the key takeaways include:</p> <ul style="list-style-type: none"> • The provision of cafes, restaurants and pubs is limited, and a more appealing offer would assist in contributing to a more vibrant evening economy; • Stakeholders and the NEMS Household Survey both identified a lack of parking as an issue for the vitality of the village centre. Parking and traffic management may assist in alleviating some of these concerns; • The environmental quality of the centre could be improved, and a public realm strategy may be beneficial in helping facilitate this; • The centre is a popular place for cycling, however cycle parking is lacking. Improving cycle facilities may further assist in drawing cyclists to the area.

Hurstpierpoint Village Centre

Description & Status

- 4.25 Hurstpierpoint is a small historic village southwest of Burgess Hill, which sits on the edge of the South Downs. Many of the buildings are from the 18th century or later which gives the centre a traditional village character. The main retail offer is located along the High Street, between its junction with Brighton Road in the west, and South Avenue in the east. The centre hosts mainly independent businesses with very few national multiples along the High Street.
- 4.26 Hurstpierpoint is designated as a village centre by virtue of policy DP3 of the Mid Sussex District Plan 2014-2031. The centre is also located within the Hurstpierpoint and Sayers Common Civil Parish. The centre is located within the area of the Hurstpierpoint Neighbourhood Plan which was made in 2015.

Figure 45. Hurstpierpoint Village Centre Health Check Assessment Table

Health Check Indicator	Summary
Overall Composition	<p>Figure 43 provides an overview of Hurstpierpoint Village Centre's composition at the time of the site visits in November 2021 compared to the UK averages (2021).</p> <p>The main shopping offer within Hurstpierpoint is located along the High Street. The centre features 52 units, most of which are independent retailers. There is a very limited offer of national multiples.</p> <p>When asked in the NEMS Household Survey how they would rate the provision of independent stores in the village centre, 56.1% of respondents rated it 'plentiful' or 'good'.</p>
Convenience	<p>There are eight convenience units in the centre including a Co-op Food store. The remaining are independent stores including a baker, greengrocer, delicatessen, butcher, and off licences. The offer is clearly local in nature, serving the local village and wider locality. Convenience stores make up 15.4% of the overall composition in Hurstpierpoint which is above the UK average of 9.2%.</p>
Comparison	<p>Comparison units make up the largest proportion of the overall composition at 30.8% which is slightly higher than the UK average of 27.1%. The majority of comparison units in the centre are independent stores, including a pet shop, florist, bridal wear store, clothing stores, gifts store and jeweller.</p>
Services	<p>Overall, services account for 48.1% of the overall composition. Retail services account for 21.2% of the centre which is above the UK average of 15.6%. The offer of retail units comprises four hairdressers, a private school agent, travel agent, two funeral directors, a watch repair shop and a clothing alterations shop.</p> <p>The centre also has a slightly lower proportion of leisure services (19.3%) compared to the UK average (24.6%). Leisure services include takeaways, restaurants, cafes and a small theatre.</p> <p>There are four financial and business services units which include three estate agents and a solicitor's office.</p>

Vacancies	At the time of the site visits, five units were identified as being unoccupied, accounting for 8.8% of units within the village centre. The centre has a lower proportion of vacancy levels compared to the UK average of 14.2%.
Pedestrian Flows	<p>At the time of the Nexus site visits, footfall was observed to be moderately high. A higher amount of footfall was observed near the Co-op Food store in the central part of the centre along the High Street, compared to the peripheries of the centre.</p> <p>The Visitor Insights Baseline Report 2021 revealed that 241,865 people visited the centre between September 2020 and September 2021 with the average visit frequency of 9 times per annum. From the same report, the average dwell time was 192 minutes and the most popular days to visit are Thursdays. It was also reported that the average number of indoor locations visited per trip was 1.1 store.</p>
Accessibility	<p>There is no train station in Hurstpierpoint though the centre is served by bus routes to Hassocks, Burgess Hill and Haywards Heath. Furthermore, cycle routes through the centre are limited. The provision of a well-designed cycle path might encourage more people to cycle into the centre rather than drive. Stakeholders identified that traffic congestion is a problem due to the narrow High Street, and at the time of the Nexus site visits, there was notable congestion.</p> <p>Free car parking is available for short stays and long stays at Trinity Road with 121 spaces, while a further 41 spaces are available at Brown Twins car park.</p> <p>When asked how they usually travel to Hurstpierpoint Village Centre, 50.2% of respondents to the NEMS Household Survey identified that they walk, while 37.5% of respondents identified that they usually travelled by car as either the driver or passenger.</p>
Perception of Safety	At the time of the site visits, it was observed that there was a low level of street lighting, which may result in a perception of poor safety, particularly in the winter months when daylight is limited. Stakeholders also identified that the combination of the speed at which cars sometimes travel through the centre and the narrow pavements, have raised concerns around pedestrian safety.
Opening Hours and the Evening Economy	There are three restaurants and two public houses in Hurstpierpoint, and the evening economy appears to function well. In addition, stores tend to shut later on the weekends, adding to the vibrancy of the

	<p>centre in the evenings. The remainder of the centre maintains traditional opening hours.</p> <p>The NEMS Household Survey asked respondents how they rated the evening economy in Hurstpierpoint. 41.0% of respondents rated the offer as either 'plentiful' or 'good'.</p>
Environmental Quality and Public Realm	<p>Stakeholders noted that pavements are in need of attention in several places throughout the centre both in terms of visual appearance and safety concerns. In some locations pavements are very narrow, forcing pedestrians to walk on the High Street.</p> <p>Improvements could also be made by increasing the amount of street lighting in the centre, improving legibility and safety.</p>
Barriers to Entry	<p>There are currently vacant units within the centre, providing opportunities for new retailers to enter the centre. However, the majority of available units in the centre were observed to have smaller floorplates, which may not be attractive to larger operators.</p> <p>Stakeholders noted that the rents may be a barrier for entry for new businesses.</p>
Customer Views & Behaviour	<p>Written responses were received by stakeholders representing Hurstpierpoint Village Centre. Comments included:</p> <ul style="list-style-type: none"> • Basic shops may be too expensive for some members of the community; • Post Office struggles to maintain opening hours; • No current provision for organic produce; • There are not enough cash points in the village centre; • The High Street can sometimes be dangerous and unpleasant for pedestrians due to the quantity and speed of traffic and behaviour of drivers; • A cycle route would encourage more people to cycle into the centre rather than drive as congestion is a prevalent issue. <p>The NEMS Household survey asked respondents what they liked most about Hurstpierpoint Village Centre. The most common responses were 'choice and range of shops' (23.2%), 'close to home' (22.1%) and 'nice atmosphere/friendly people' (19.0%).</p>

Mid Sussex Retail Study

	When asked what would encourage respondents to visit the centre more often, the most common responses were 'less traffic congestion' (22.6%), 'more parking' (15.3%), and 'increased general choice and range of shops' (12.0%).
Key Takeaways	<p>Having completed the health check assessment for Hurstpierpoint Village Centre, the key takeaways include:</p> <ul style="list-style-type: none"> • Public realm improvements such as street lighting and repairs and widening of the public footpath would further enhance the attractiveness of the centre; • In centre parking is in short supply which detracts from the visitor experience. Implementing parking management measures may assist in improving the experience for motorists and pedestrians alike; • Congestion is an issue at peak times, and traffic calming measures might assist in improving the situation; • Additional signage within the centre and to the car park would assist in improving legibility.

Lindfield Village Centre

Description & Status

- 4.27 Lindfield is an attractive historic village situated to the north east of Haywards Heath. The core part of the centre is located along the High Street which includes a range of independent units. The centre also boasts a natural spring fed pond with ducks and fish as well as a water fountain feature. This is located a short walk south of the High Street. Lindfield is located within the High Weald Area of Outstanding Natural Beauty.
- 4.28 Lindfield is designated as a village centres by virtue of policy DP3 of the Mid Sussex District Plan 2014-2031. The centre is located within the area of the Lindfield and Lindfield Rural Neighbourhood Plan which was made in 2016.

Figure 49. Lindfield Village Centre Composition Plan

NB: A full sized composition plan can be viewed at Appendix D.

Figure 50. Lindfield Village Centre Health Check Assessment Table

Health Check Indicator	Summary
Overall Composition	<p>Figure 48 provides an overview of Lindfield's composition at the time of the site visits in November 2021 compared to the UK averages (October 2021).</p> <p>Lindfield comprises 40 units which provide a range of services. The offer is largely independent and caters for the day-to-day needs of the local population. The NEMS Household Survey found that 73.6% of respondents who visited Lindfield the most often, rated the provision of independent stores as either 'plentiful' or 'good'. Lindfield is located a short distance from Haywards Heath and therefore plays a subordinate role in the wider hierarchy of town centres.</p>
Convenience	<p>There are seven convenience retailers in Lindfield, constituting 17.5% of the total number of units within the village centre. This proportion is higher than the UK average (9.2%).</p> <p>The centre is mainly comprised of independent retailers. However, the largest national multiple convenience store is the Co-Operative store located on the High Street, just south of Denman's Lane. The remaining convenience retailers include a bakery, butcher, delicatessens, off licence and a greengrocers.</p>
Comparison	<p>Comparison units make up the largest proportion of stores in the centre. There are 11 comparison retailers amounting to 27.5% of the overall units in the centre. This proportion is similar to the UK average (27.1%). The offer includes two pharmacies, bridal wear store, three clothing stores, a toy shop, a musical instrument store, a homewares store and a fitted kitchen showroom.</p>
Services	<p>Retail services account for 20.0% of the overall units in the centre, which is above the UK average of 15.6%. These mainly consist of independent stores including three hairdressers, a beauty salon, a natural therapy store and an optician.</p> <p>Leisure services constitutes 25.0% of retailers in the centre which is very similar to the UK average of 24.6%. The range of leisure services are predominantly independent, and include three public houses, cafes and restaurants.</p>

Vacancies	At the time of the Nexus site visits, one vacant unit was observed towards the centre of the High Street.
Pedestrian Flows	<p>At the time of the Nexus site visits in November, the centre was observed to have a relatively steady flow of footfall along the High Street, commensurate to that expected within a village centre.</p> <p>The Visitor Insights Baseline Report 2021 revealed that 451,216 people visited the centre between September 2020 and September 2021 with the average visit frequency of 10 times per annum. From the same report, the average dwell time was 217 minutes and the most popular day to visit is Thursdays. It was also reported that the average number of indoor locations visited per trip was 1.5 stores.</p>
Accessibility	<p>There is no train station in Lindfield however the centre is easily accessible by car and on foot. Additionally stakeholders highlighted that better provision of cycle lanes and cycle routes would assist in providing links to Haywards Heath and neighbouring villages.</p> <p>On street car parking is available throughout the main High Street. A small amount of free off-street car parking is available in two car parks behind the Co-operative store, one associated with the convenience shop, and the other a public car park – 27 spaces – and public toilet facility. Additional parking is available in two car parks Tollgate – 36 spaces, and Wilderness – 15 spaces.</p> <p>The household survey identified that of those that visited Lindfield Village Centre the most often, 47.8% travelled by car as either a passenger or driver, followed by 41.4% of respondents who identified that they generally walk into the centre. The latter suggests that a large proportion of people that use the centre live or work within close proximity and easy walking distance.</p>
Perception of Safety	The perception of safety of Lindfield was good at the time of visit, and stakeholders did not identify any particular issues of crime in the area. However, the benefits of having an occasional visible police presence on the High Street were acknowledged.
Opening Hours and the Evening Economy	Lindfield Village Centre features three public houses and three restaurants, and the evening economy functions well. Stakeholders confirmed that the food and beverage offer is successful, catering for both locals of Lindfield village, and those from further afield.

	<p>The NEMS Household Survey found that 41.0% of the respondents who visited Lindfield the most often rated the evening economy of Lindfield Village Centre as either 'plentiful' or 'good'.</p> <p>The remainder of the centre maintains traditional opening hours with the majority of the retailers shutting at around 5pm.</p>
Environmental Quality and Public Realm	<p>The built environment in the village centre is attractive and the centre is generally well maintained. Retail shopfronts follow a consistent style, commensurate to the village centre's location within the conservation area.</p> <p>The centre features an attractive village pond and fountain feature that acts as a focal point for the southern end of the village centre. Lindfield Common is located to the south of the village centre, providing attractive greenspace nearby.</p>
Barriers to Entry	<p>There is currently only one vacant unit within the village centre, indicating that the centre currently functions fairly well. However, the lack of vacant units also represents a lack of opportunity for new retailers to enter the local market.</p> <p>Many of the buildings along the High Street are listed, which may also be a perceived barrier to entry, as listed buildings can be expensive to maintain.</p>
Customer Views & Behaviour	<p>Comments received during the stakeholder sessions included:</p> <ul style="list-style-type: none"> • There is only one vacant unit indicating that the centre has managed well during the pandemic; • Pubs and restaurants are successful and are actively used by local residents and visitors to the centre from further afield; • Whilst the centre is quaint and relatively attractive, stakeholders noted that in some parts of the centre, units appear dated. In addition, some of the residential accommodation located above the commercial units along the High Street have not been well maintained; • The perception of safety in the area is generally very good and incidences of crime are minimal; • The provision of cycle lanes and routes would help to connect the neighbouring villages and create more linked up trips.

	<p>When asked what respondents liked most about Lindfield, the most common responses were 'choice and range of shops' (23.6%), 'attractive environment/nice place' (21.4%), and 'close to home' (21.4%).</p> <p>The NEMS Household Survey asked respondents what factors would encourage them to visit Lindfield Village Centre more often. The most common responses were 'improved range of non-food shops' (9.4% and 'increased general choice and range of shops' (3.6%).</p>
Key Takeaways	<p>Having completed the health check assessment for Lindfield Village Centre, the key takeaways include:</p> <ul style="list-style-type: none"> • The centre is predominantly comprised of independent retailers and other operators, which is considered to be a strength of the centre; • The centre has a thriving evening economy as reported through the NEMS Household Survey and stakeholder sessions, and the pubs and restaurants trade strongly; • There is a lack of available vacant premises and very few clear development sites. This, combined with the cost of units when they do become available make it difficult for new businesses to enter the centre; • The provision of cycle lanes and routes would assist in connecting the neighbouring villages and creating more linked trips; • Parking provision is limited on the High Street and there are very few off street car parking spaces. However car parking was not raised as a major issue by stakeholders or by respondents to the Household Survey, and a high proportion of visitors generally walk to the centre.

5 Future Needs

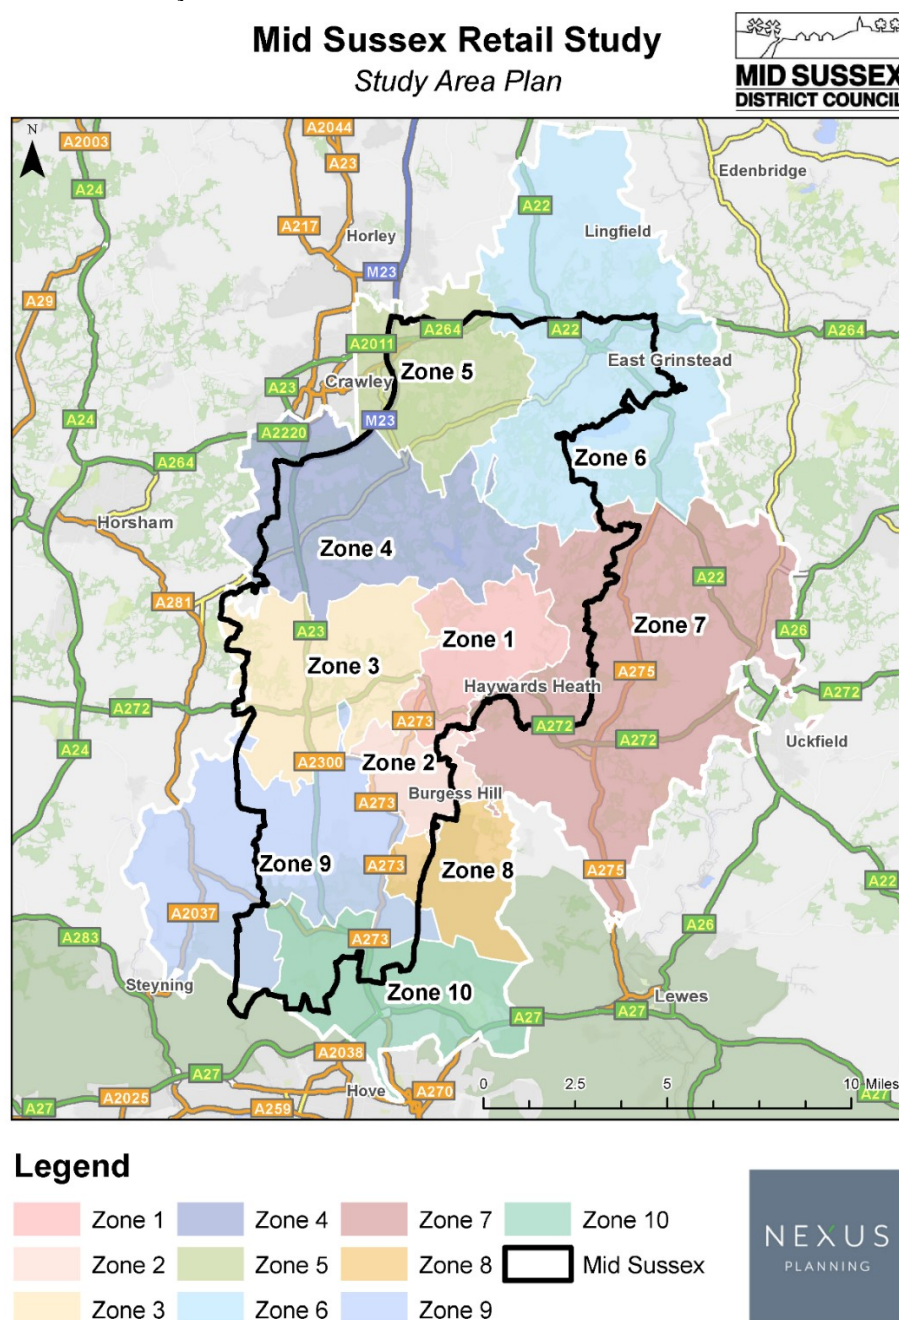

Introduction

- 5.1 This section defines the Study Area and describes the Household Survey undertaken to inform this study. It summarises the key findings on internet shopping patterns, and delves into the survey-derived market share analysis for convenience and comparison goods spending at 'bricks and mortar' locations.
- 5.2 We also set out the results of our quantitative capacity assessment for new retail (comparison and convenience goods) floorspace in Mid Sussex District, covering the period from 2021 to 2038. This section also considers the future capacity for leisure floorspace over the same timeframe.

Household Telephone Survey & Study Area

- 5.3 Household Surveys are recognised across the retail industry, and within planning policy guidance, as an excellent means of understanding where people within a specified area carry out their retail and leisure expenditure. We have therefore commissioned a new Household Telephone Survey and utilise the results to inform our quantitative analysis of the turnover of specific retailers, towns and other destinations, as well as its qualitative findings on attitudes and perceptions of different centres.
- 5.4 It is important to identify a Study Area that covers the area within which you would expect the resident population of the District to carry out the majority of its retail spending. This Study Area is shown on the plan in Figure 51 below, and at **Appendix A**. The Study Area is defined by postal sector geography in order to allow analysis by sub-areas (or 'Zones'), and to allow NEMS to obtain accurate samples.
- 5.5 In this instance, we have utilised broadly the same Study Area as the Mid Sussex Retail Study Update 2014 (as further updated in 2016). This enables us to directly compare and contrast the results gained in 2014 with those found in 2021.
- 5.6 We have identified a minor discrepancy between the mapping presented in the 2014 Study and the actual survey undertaken, which resulted in two postal sectors across Zones 6 & 10 being excluded from the interviews at the time. The only difference between the 2014 survey, and our own household survey in this respect, is that these have been restored. As such, the results for Zones 6 and 10 are not directly comparable to the 2014 results, but will nonetheless provide relevant trends.

Figure 51. Study Area Plan

5.7 Accordingly, the Study Area comprises 10 Zones and a total of 1,002 household surveys interviews took place across the 10 Zones. This is corroborated for its statistical accuracy, relative to population, by NEMS in their report in **Appendix B**. Figure 52 below sets out the postcode sectors which comprise each Zone.

5.8 The wording of the questions was also cognisant of the Covid-19 pandemic, as can be seen by the full questionnaire results in **Appendix B**. Respondents were asked where they ‘usually’ shop to avoid,

as far as possible, the recording of any unusual travel patterns, and a number of additional questions were asked about how people changed their shopping and leisure patterns as a result of Covid-19.

- 5.9 A full description of the research methodology, sampling size, weightings and sample profiles is contained at the beginning of the NEMS report. NEMS quote their work as being within a 95% confidence range.

Figure 52. Study Area Postal Sectors

Zone	Postal Sectors	Interviews
1 Haywards Heath	RH16 1, RH16 2, RH16 3, RH16 4	101
2 Burgess Hill	RH15 8, RH15 9, RH15 0	100

Study Area Population

- 5.10 The population for each zone in 2021, 2026, 2031, 2036 and 2038 is sourced from Experian MMG3 data (2020 report). We present the population projections on a Zone-by-Zone basis in Figure 53 below.

Figure 53. Study Area Postal Sectors

Zone	2021	2025	2030	2035	2038	Growth 2021-2038
Zone 1	39,297	41,116	42,446	43,553	43,913	11.7%
Zone 2	35,243	36,663	37,917	39,002	39,399	11.8%
Zone 3	7,204	7,474	7,698	7,878	7,962	10.5%
Zone 4	27,348	28,223	28,952	29,638	29,890	9.3%
Zone 5	40,084	41,217	42,017	42,752	43,073	7.5%
Zone 6	50,622	52,516	54,031	55,407	55,945	10.5%
Zone 7	19,149	19,981	20,749	21,470	21,742	13.5%

Source: Appendix B

Non-Store Retailing or Special Forms of Trading

- 5.11 Special forms of trading (SFT) are defined by Experian as sales via the internet, mail order, stalls and markets, vending machines, door-to-door and telephone sales, including online sales by supermarkets, department stores and catalogue companies.

Convenience Goods Online Shopping

- 5.12 The household survey asked residents of the Study Area where they normally undertake their main food and grocery shopping.
- 5.13 Across the Study Area, 20.1% of respondents usually shop online for their main food shop (Question 1 of the Household Survey). As set out in Section 2, the UK average for online convenience shopping in 2021 is 18.1%. As such, the take-up of online convenience shopping in the Study Area is higher than the UK average. The online trade across the Study Area is dominated by Tesco (41.8%), Sainsbury's (29.1%), as well as Asda (10.8%) and Ocado (7.9%), who together account for 89.7% of all online convenience goods spending.
- 5.14 The household survey also asked residents of the Study Area about how their online convenience shopping habits have been affected by Covid-19. Before the first lockdown, 34.6% of Study Area residents had shopped for groceries online at some point. During the lockdowns, this number increased to 46.6%. Since the lockdown has been lifted, the number using online services has decreased slightly to 41.1%, but remains significantly higher than before lockdowns. This suggests that Covid-19, and in particular the lockdowns, had resulted in a lasting habitual change in the Study Area, whereby a preference for online grocery shopping has increased.

Comparison Goods Online Shopping

- 5.15 The household survey also asked where respondents usually shop for different types of comparison goods. The findings are presented in Figure 54 which shows the take-up for online shopping varying across the categories from 10.3% (DIY) to 71.5% (Media). On average, within the Study Area, 41.2% of respondents shop online for comparison goods, compared with a UK average of 29.1%.
- 5.16 The household survey also asked residents of the Study Area about how their online comparison-shopping habits have been affected by Covid-19. Before the first lockdown, 82.5% of Study Area residents shopped for comparison goods online. During the lockdowns, this number increased slightly to 83.1%. Since the lockdowns have been lifted, this figure has risen slightly again to 84.7%.

5.17 Whilst the differences are marginal, and significantly less pronounced than the increase in convenience goods spending online, the base figures were already substantially higher with online comparison goods spend. The fact that online spend has increased since the lockdown was lifted is also notable, and confirms the general upwards trend in online comparison goods spend forecast by Experian (see Section 2).

Figure 54. Online Comparison Goods Spending in the Study Area, 2021

Source: NEMS Household Survey

5.18 Overall, when comparing pre-lockdown and post-lockdown frequency of online shopping, 28.7% of Study Area residents now shop online more often; 53.7% shop with the same frequency; and 9.4% shop online less often (8.1% were not able to give an answer). As would be expected, as the overall preference for online shopping has increased, the frequency of online shopping has also increased.

Retail Expenditure Forecasts

5.19 Having examined where online spending is focused, we now examine that proportion of spending which is carried out at 'bricks and mortar' stores.

5.20 Retail expenditure data has been sourced from our in-house Experian MicroMarketer G3 system. We obtain separate data for convenience and comparison goods, which in turn are broken down into multiple goods categories, as set out in our full statistical assessment in **Appendix C**.

- 5.21 The data takes account of the socio-economic characteristics of the local population to provide local consumer expenditure calculations. Experian is a robust source of population and expenditure data that is widely used for calculating retail capacity across the industry.
- 5.22 Expenditure data from Experian is provided per capita in 2019 prices, as is every subsequent monetary value. Using the growth rates presented in Table 6 of Experian Retail Planner Briefing Note 18 (October 2020), which are reproduced in Figure 55 below, the per capita expenditure is then projected forward to the base year (2021) and the relevant assessment years. Adjustments are made at every step to account for the growth in special forms of trading (SFT).
- 5.23 There are two elements that should be noted here:
- Experian notes that long-term forecasts should be treated with caution, and that they should be subject to regular reviews given the wide range of factors that can influence the broader national economy. Experian produces annual updates to reflect this. As we go on to discuss in our recommendations later in the report, the Council may wish to review some of the expenditure data inputs to this report (e.g. growth rates and base per capita spending figures) ahead of the Plan Examination to confirm that these do not change our current conclusions regarding the need for allocations (though we do not anticipate such significant changes at the time of writing).
 - Special forms of trading (SFT) are defined by Experian as sales via the internet, mail order, stalls and markets, vending machines, door-to-door and telephone sales, including online sales by supermarkets, department stores and catalogue companies. As we have mentioned previously. Experian Retail Planner Briefing Note 18 (October 2020) provides estimated year-on-year forecasts of internet and other SFT, which allows us to 'strip out' any expenditure that is, either now or in the future, diverted to SFT. This ensures that the increasing propensity to shop by SFT is accounted for in our modelling. These increasing deductions for SFT have the effect of off-setting some of the growth in expenditure in the Study Area derived from population increases. Furthermore, many brands offer online sales, but source the goods from their own stores' shelves. This is often the case for food stores where employees will pick online orders from stores' shelves before, during or after opening hours. These orders are then delivered by dedicated vans from each store and as such, the online expenditure is attributed to tangible stores. Experian provides 'adjusted' figures to account for this.

Figure 55. 'Adjusted' Special Forms of Trading Market Share Forecasts

Year	Convenience growth rates (%)	Comparison growth rates (%)
2021	-5.3	8.1
2022	0.2	2.9
2023	-0.3	2.7
2024	-0.2	2.0
2025	-0.1	1.9
2026	-0.2	2.0
2027	-0.2	2.1
2028	-0.1	2.3
2029	-0.1	2.4
2030	-0.2	2.5
2031	-0.1	2.5
2032	0.0	2.5
2033	0.0	2.6
2034	0.0	2.6
2035	0.1	2.7
2036	0.0	2.7
2037	0.0	2.7
2038	0.1	2.8
2039	0.1	2.7
2040	0.0	2.7

Source: Figure 6, Experian Retail Planner Briefing Note 18, October 2020

- 5.24 The expenditure per capita figures are then multiplied by the population of each zone at each of the assessment years. Figure 56 below sets out the resultant outcome of the total 'brick and mortar' comparison and convenience expenditure in the Study Area at the base and assessment years.

Figure 56. Retail Expenditure Forecasts in the Study Area (£m)

Zone	2021	2025	2030	2035	2038	Growth 2021-2038

Convenience Goods Findings

Market Shares

- 5.25 Before considering the capacity for new convenience goods floorspace, we firstly examine the overall convenience goods spend by residents across the Study Area. Figure 57 specifically examines where Study Area residents are spending their money.

- 5.26 The results show that destinations in Mid Sussex District account for 63.1% (£425.1m) of the spending of all Study Area residents in 2021 (£673.3 m per annum). The remaining 36.9% (£248.2m) of spending carried out by residents of the Study Area, takes place at destinations beyond Mid Sussex District.

Figure 57. Convenience Goods Market Share by Destination

Destination	Total Market Share Convenience (%)	Total Market Share Convenience (£m at 2021)
Burgess Hill Town Centre	2.5%	£16.9m
East Grinstead Town Centre	3.2%	£21.7m
Haywards Heath Town Centre	2.1%	£14.3m
Copthorne Village Centre	0.1%	£0.6m
Crawley Down Village Centre	0.9%	£6.4m
Cuckfield Village Centre	0.0%	£0.2m
Hassocks Village Centre	1.4%	£9.4m
Hurstpierpoint Village Centre	0.5%	£3.7m
Lindfield Village Centre	0.9%	£5.8m
In-centre Sub-total	11.7%	£79.0m
<i>Burgess Hill out-of-centre</i>	19.2%	£129.5m
<i>East Grinstead out-of-centre</i>	14.6%	£98.3m
<i>Haywards Heath out-of-centre</i>	16.4%	£110.5m
<i>Other out-of-centre</i>	1.2%	£7.8m
Mid Sussex District Total	63.1%	£425.1m
Brighton (stores located within the Study Area)	6.9%	£46.6m
Crawley (stores located within the Study Area)	2.2%	£15.1m
Others outside of Mid Sussex in the Study Area	3.7%	£24.6m
Crawley	12.8%	£86.0m
Brighton	2.8%	£18.5m
Lewes	1.9%	£12.9m
Hove	1.8%	£12.2m
Uckfield	1.5%	£9.9m
Others outside the Study Area	3.3%	£22.4m
Total	100.0%	£673.3m

Source: Tables 3 & 4, Appendix C

- 5.27 Of the £425.1m per annum spent in Mid Sussex, its town centres and villages account for £79.0m of spend. This equates to 11.7% of all spend carried out in the District.
- 5.28 However, the majority of convenience goods spending in Mid Sussex is carried out in out-of-centre locations outside of the main centres of Burgess Hill, East Grinstead, and Haywards Heath (51.4%, or £346.1m).

Mid Sussex Retail Study

- 5.29 The most popular destinations within the District are Tesco in Burgess Hill (£91.9m per annum), Sainsbury's in Haywards Heath (£77.2m), Sainsbury's in East Grinstead (£52.8m), Aldi in East Grinstead (£43.0m), and Lidl in Burgess Hill (£28.9m). Notably, each of these stores are located outside of the District's centres.
- 5.30 In terms of destinations outside the District (when combined with destinations within the Study Area, but outside of Mid Sussex's administrative boundaries), the highest collective attractors of convenience goods spend from residents of the Study Area are foodstores in Crawley (£101.1m per annum), as well as Brighton (£65.1m).
- 5.31 Importantly, we can also examine the destination of convenience goods spend within each Zone of Mid Sussex District. This is a key indicator and shows the amount of Mid Sussex District residents spend which is 'retained' within the District, and the amount which is 'leaked' elsewhere.
- 5.32 This District very broadly aligns with Zones 1-6 and 9 of the survey. Figure 58 examines the amount of convenience goods spending carried out inside Mid Sussex District by residents of each Zone.

Figure 58. Convenience Goods Market Share by Destination

Source: Appendix C, Table 3

- 5.33 The results show that there are exceptional levels of retention in Zones 1, 2 and 3 (covering Haywards Heath and Burgess Hill), ranging from 97.4% to 91.5%.
- 5.34 Zones 6 and 9 (covering East Grinstead, and Burgess Hill/ Hurstpierpoint/ Hassocks) also show a health level of retention of 83.6% and 67.5%, respectively. However, it should be noted that both zones extend outside of Mid Sussex. As such, the market shares demonstrate the significant draw of the District's convenience retail offering.
- 5.35 There is though a different picture in Zones 4 and 5 (Crawley, Haywards Heath and East Grinstead), where only 36.9% and 28.7% of convenience goods spend is retained within the District, respectively. The results in Table 4 at Appendix C highlight that 63.5% of all convenience goods spend by residents of Zones 4 and 5 are carried out in Crawley.
- 5.36 Overall, the District retains 71.6% of the convenience goods spend of its residents from Zones 1-6 and 9 (equating to £369.1m out of £515.6m per annum).
- 5.37 Turning to individual retail destinations, where national company averages are available for benchmarking purposes, we are able to compare local turnover to the turnover of an average store of that size in order to identify where facilities may be trading over or below expectations. This is summarised at Figure 59.

Figure 59. Convenience Goods Turnover Benchmarking

Destination	Benchmark Turnover (£m)	Survey Turnover (£m)	Trading Position against Benchmark (£m)	Trading Position against Benchmark (%)
Burgess Hill Town Centre	£43.6m	£16.9m	-£26.7m	-61.2%
East Grinstead Town Centre	£36.6m	£21.7m	-£14.9m	-40.7%
Haywards Heath Town Centre	£22.0m	£14.3m	-£7.7m	-35.1%
Other Village Centres	£16.6m	£25.9m	£9.4m	56.5%
<i>Burgess Hill out-of-centre</i>	£86.4m	£129.5m	£43.1m	49.9%
<i>East Grinstead out-of-centre</i>	£61.3m	£98.3m	£37.0m	60.4%
<i>Haywards Heath out-of-centre</i>	£99.7m	£109.5m	£9.8m	9.8%
Mid Sussex District	£369.7m	£419.7m	£50.0m	13.5%

Source: Table 5, Appendix C

- 5.38 The results show a clear trend that, whilst on the whole convenience floorspace in Mid Sussex District is performing well when considered cumulatively (trading at an average of 13.5% above benchmark), there is a distinct split in performance between facilities within the centres and out of centre stores.

Mid Sussex Retail Study

- 5.39 This is largely driven by the very strong performance of the out-of-centre Aldi store in East Grinstead, Tesco in Burgess Hill, and Sainsbury's in Hayward's Heath. These three stores are trading at 317.2%, 41.2% and 58.2% above company average trading levels, respectively.
- 5.40 We also identify stores trading above average across the village centre, notably the Co-op in Crawley Down (436.0%), Budgens in Hassocks (140.9%), and Co-op in Lindfield (73.8%). Whilst the performance of these facilities is potentially indicative of the value of local and village centres to residents across the District, it also demonstrates a general trend toward increased use of local convenience stores since the lockdowns associated with the Covid-19 pandemic.
- 5.41 Nonetheless, given the size of these local stores and their respective turnovers in the context of the much larger turnover of stores in and around the three key centres, the extent of their overtrading pales in comparison to the performance of out-of-centre store on the outskirts of Burgess Hill, East Grinstead and Haywards Heath, as would be expected.
- 5.42 Each of the three key town centres themselves appear to be trading at below average levels.
- 5.43 We summarise below the performance of individual stores in Mid Sussex, with Figure 60 setting out the 'Top 5' best and worst performing stores by monetary value.

Figure 60. Best and Worst Performance Benchmarking

Destination	Benchmark Turnover (£m)	Survey Turnover (£m)	Trading Position against Benchmark (£m)	Trading Position against Benchmark (%)
Best Performing				
<i>Aldi, London Road, East Grinstead</i>	£10.3m	£43.0m	£32.7m	317.2%
<i>Sainsbury's Superstore, Bannister Way, Haywards Heath</i>	£48.8m	£77.2m	£28.4m	58.2%
<i>Tesco Superstore, Hammonds Farm, Burgess Hill</i>	£65.1m	£91.9m	£26.8m	41.2%
Worst Performing				
Waitrose, Market Place Shopping Centre, Burgess Hill	£37.7m	£13.6m	-£24.1m	-64.0%
Waitrose, Perrymount Road, Haywards Heath	£44.7m	£24.8m	-£19.9m	-44.4%
Waitrose, West Street, East Grinstead	£30.4m	£19.6m	-£10.8m	-35.5%

Source: Table 5, Appendix C (*out-of-centre stores in italics*)

Local Market Share Trends – Convenience Goods

- 5.44 Figure 61 sets out a comparison of 2021 market share data against the findings of the 2014 Mid

Sussex Retail Study Update (informed by 2014 survey data, corrected to remove online and other SFT spending).

- 5.45 Overall, we identify a relatively consistent position over the past 7 years (2014-2021). There has been a very slight increase in the 'retention' of Study Area residents' convenience goods spend, from 61.4% in 2014 to 63.1% in 2021. This has been driven by an increase in market share to out-of-centre foodstores, which now have a 51.4% market share, compared to 47.2% in 2014.
- 5.46 By contrast, there has though been a overall reduction on the market share of residents' convenience goods spending in its town and villages centres (11.7% of trade, down from 14.2% in 2014).
- 5.47 The overall picture is therefore mixed. Whilst the District has retained an equivalent proportion of residents' spend as a whole, that spend is increasingly being carried out in out-of-centre locations, to the likely detriment of town centre locations.

Figure 61. Convenience Goods Market Share (2014-2021)

Source: Appendix C & Mid Sussex Retail Study 2014 (Appendix 4, Table 2)

- 5.48 Building on this, Figure 62 examines the market shares attracted to individual centres in 2021, against the comparative assessment in 2014. The results show that there has been a reduction in convenience goods market share over this period in Burgess Hill and East Grinstead Town Centres. In contrast, there has been no significant change in convenience goods market share in Haywards Heath Town Centre.

- 5.49 Looking at the larger foodstores which underpin Burgess Hill Town Centre and East Grinstead Town Centre, it is notable that the Waitrose in The Martlets has experienced a decrease in market share from 2.8% of Study Area spend in 2014, to 2.0% in 2021, whilst the Waitrose at West Street in East Grinstead has experienced a fall from 5.4% of Study Area spend in 2014, to 2.9% in 2021 (when adjusted to account for online spending).
- 5.50 This in contrast to the performance of out-of-centre competitors over the same period. Whilst the Tesco Superstore outside of Burgess Hill has actually seen its market share reduce from 15.5% in 2014, to 13.6% at 2021; the Lidl foodstore at Leyland Road in Burgess Hill (constructed in 2019) has gained 4.3% of market spend from a mix of town centre and out of centre facilities. Equally, on the outskirts of East Grinstead, the market share of the Sainsbury's store has fallen over the last 7 years from 11.5% in 2014, to 7.8% in 2021. Conversely, Aldi's market share has grown from 3.7% in 2014, to 6.4% in 2021. There is therefore evidence to suggest a transfer of market share from in-centre to out-of-centre discounter stores in the Burgess Hill and East Grinstead areas.

Figure 62. Convenience Goods Market Share by Destination (2014-2021)

Source: Appendix C & Mid Sussex Retail Study 2014 (Appendix 4, Table 2)

Convenience Goods Capacity

- 5.51 One of the key aims of this Study is to provide recommendations on the capacity for new retail floorspace over the plan period to 2038. The use of long-term projections should be treated with

caution and reviewed regularly in order to test the accuracy of the forecasts against emerging datasets. External national and international factors can influence the wider performance of the economy, which can have trickle down effects on local shopping patterns. As discussed in Section 2, one such example has been the economic implications of the United Kingdom leaving the European Union and the social distancing and lockdown measures necessitated current Covid-19 pandemic.

5.52 Importantly, we also note that any quantitative retail capacity that we may identify across the Study Area does not necessarily equate to justification for new retail floorspace in itself (especially in out-of-centre locations), and any such development would be required to be assessed in line with NPPF policy in terms of impacts on the vitality and viability of town centres, the potential to prejudice emerging town centre developments, and the 'town centre first' sequential approach to site selection.

5.53 Equally, the converse also applies and a lack of identified capacity should not specifically rule out retail developments, where other material factors support such development.

5.54 Detailed quantitative retail capacity tables are enclosed at **Appendix C**.

5.55 Retail capacity modelling follows a consistent, robust methodology which incorporates a number of datasets and informed assumptions which we describe further below, but broadly speaking:

Available Expenditure (£m) - Turnover of existing & proposed (£m) = Surplus or Deficit (£m)

5.56 Experian MMG3 census software is used to provide localised expenditure per capita per annum for various forms of retail spending. These figures are then projected forwards based on population growth, changes in expenditure over time and Special Forms of Trading (SFT) such as internet shopping.

5.57 The turnover of existing retailers across the Study Area is calculated based on average sales densities, or turnover, per square metre. Various retail planning sources provide average (or benchmark) sales densities for all national multiple retailers.

5.58 The surplus or deficit equates to the difference between the available retail expenditure across the Study Area and the turnover of existing facilities within the Study Area. If the total turnover is greater than the available expenditure, then the model would identify an oversupply of existing retail floorspace, whilst a surplus of expenditure would suggest capacity for additional retail floorspace.

5.59 Once the surplus or deficit of expenditure is calculated, it is then presented in floorspace figures (using average sales density assumptions) in order to demonstrate the findings within a 'real world'

context. Often surplus figures are presented under a number of different scenarios representing various retailers. For example, discount retailers (such as Aldi and Lidl amongst others) continue to operate at a lower sales density than the 'big 4' (Sainsbury's, Tesco, Asda, and Morrisons). Given the same available 'pot of expenditure', a higher sales density would result in a lower floorspace capacity than a lower sales density, which would result in a higher floorspace capacity.

- 5.60 Turning now to our detailed findings for Mid Sussex, as detailed in Figure 57 above, the household survey results show that facilities within the District have a 63.1% convenience goods market share of all spending carried out by residents of this Study Area.
- 5.61 In keeping with standard retail study methodology, when assessing the capacity for new convenience retail floorspace we adopt a constant market share in line with findings of the latest household survey (i.e. that stores within the District will continue to draw 63.1% of all convenience goods spending from the Study Area). We consider maintaining a constant market share a sensible basis for analysis given the relative lack of planned developments across the Study Area. In coming to this view, we have analysed the level of commitments identified through correspondence with Council officers of both Mid Sussex and neighbouring authorities
- 5.62 Based on a constant market share, we then allow for growth in retail expenditure over the period to 2038, as well as utilising data provided within the latest Experian Retail Planner Briefing Note 18, in order to take account of forecast growth in retail efficiencies (for example, through the adoption of new technologies and more efficient use of available floorspace). Floorspace efficiencies are estimated to have a greater impact on comparison retailers than convenience retailers over the plan period as the rise of food discounting and disruptions to logistics continue to subdue projected efficiencies in turnover of existing convenience retail floorspace.
- 5.63 We go on to make a number of statistical assumptions through the quantitative capacity exercise in order to account for the following variables. These are contained at Table 5 of **Appendix C** and can be summarised as:
- Utilising a 'goods based' approach, we strip out expenditure for non-food comparison goods such as clothing, household goods, CDs, DVDs and other media that are now commonly sold at major foodstores so that only the convenience goods floorspace is being considered (i.e. on a like-for-like basis with available convenience expenditure). These deductions are made in line with floorspace figures sourced from publicly available databases or, where data is not available, Nexus' professional judgement based on site visits.

- We also make assumptions as to the gross to net convenience goods sales floorspace of each store, again utilising online planning records where available, national business rates databases or Nexus' professional judgement.
- Finally, we consider whether foodstores are likely to attract any additional 'inflow' from outside of the Study Area. In this instance, all Mid Sussex centres are assumed to draw their convenience goods custom from within the Study Area, a position reflected across the Council's previous retail studies.

5.64 We then go on to calculate the anticipated turnover of all major convenience goods operators based on the published company sales data, referred to as 'benchmark' turnover. 'Benchmark' turnover is calculated from national average 'sales densities' (turnover per square metre). By comparing the turnover estimates derived from the findings of the household survey (total available expenditure distributed on the basis of each destinations market share) to the benchmark turnovers, we are able to establish where stores are trading above (overtrading) or below (under-trading) company averages.

5.65 Based on the household survey, we identify in Tables 3-5 of **Appendix C** that Mid Sussex's convenience retailers within the Study Area turnover an estimated £425.0m of Study Area residents spend at 2021.

5.66 This equates to an initial surplus of £54.3m against benchmark performance (see Table 5, **Appendix C**).

5.67 Figure 63 below sets out the resultant surplus convenience goods expenditure at each assessment date. This increases from £54.3m in 2021, to £73.9m by 2031, and to £90.4m by 2038 (see Table 6a).

Figure 63. Gross Convenience Goods Surplus Expenditure in Mid Sussex

Year	Benchmark Turnover (£m)	Survey Turnover (£m)	Inflow (£m)	Surplus Expenditure (£m)
2021	370.7	425.0	0.0	54.3
2026	373.7	437.7	0.0	64.0
2031	373.7	447.6	0.0	73.9
2036	373.7	459.4	0.0	85.7
2038	373.7	464.1	0.0	90.4

Source: Table 6a, Appendix C

5.68 We then go on to consider committed and extant permissions for new convenience retail floorspace. This includes any developments that have not been built, are currently under construction, or have

opened or would not have been operating at the time of the household survey. We do not take into account proposed allocations for retail floorspace, but consider development proposals for which a formal planning application has either been submitted or approved. A complete list of the commitments considered in our capacity assessment is provided at Table 6c of the statistical tables presented at **Appendix C**.

- 5.69 In total, these committed developments equate to a net convenience floorspace of 1,380 sq m and an estimated turnover of £12.1m.
- 5.70 Taking account of committed turnover, we identify a surplus residual expenditure of £42.2m at 2021, rising to £78.2m by 2038. A significant proportion of this residual expenditure is made up over-performance against benchmark in the District in the earlier years of the assessment, though over time, population and expenditure growth become more of a factor.
- 5.71 Using average sales densities to calculate a minimum floorspace scenario (a large supermarket operator) and a maximum floorspace scenario (a combination of discount foodstores operators), we go on to calculate the net additional convenience goods capacity for Mid Sussex District.

Figure 64. Net quantitative 'capacity' for new convenience goods facilities in Mid Sussex

Year	Surplus Expenditure (£m)	Commitments (£m)	Residual Expenditure (£m)	Minimum Floorspace Capacity (sq m net)	Maximum Floorspace Capacity (sq m net)
2021	54.3	12.1	42.2	3,300	5,400
2026	64.0	12.2	51.8	4,000	6,600
2031	73.9	12.2	61.7	4,700	7,800
2036	85.7	12.2	73.6	5,600	9,300
2038	90.4	12.2	78.2	6,000	9,900

Source: Table 6d, Appendix C

- 5.72 This quantitative capacity is calculated to grow from a positive capacity of between 3,300 and 5,400 sq m in 2021, to between 6,600 and 9,900 sq m by 2038. In purely quantitative terms, this capacity is sufficient to support the provision of extensive new convenience retail floorspace over the plan period.
- 5.73 However, as we have previously identified, there is evidence of reducing market shares in the District's Town Centres, and so there are important qualitative considerations before allocating and/or permitting new foodstore floorspace.
- 5.74 Given current economic uncertainties and, more relevantly, pressures on the retail sector, we would

stress the need to treat long-term forecasts with caution. As highlighted within the PPG¹⁵: *“Given the uncertainty in forecasting long-term retail trends and consumer behaviour, this assessment may need to focus on a limited period (such as the next five years) but will also need to take the lifetime of the plan into account and be regularly reviewed.”* (our emphasis)

- 5.75 Additionally, as referenced above, capacity does not equate to need. Need is more than just a quantitative measure; it should also involve qualitative considerations around issues such as any residents’ dissatisfaction with the current level of provision, and the potential impacts of realising capacities on the ground from our health check work. Fundamentally, capacity modelling should not be seen as an absolute; it is a guide to a Plan-led approach.
- 5.76 Any consideration of allocations for new retail floorspace should take into account an assessment of the performance and vitality and viability of a centre in order to ensure that any identified capacity meets both a quantitative and qualitative need, and does not harm existing businesses.
- 5.77 In this regard, we also note the extensive proportion of vacant retail floorspace identified within each of Mid Sussex’s key town centres, with 2,590 sq m, 3,080 sq m and 5,440 sq m available to support new operators across each of East Grinstead, Haywards Heath and Burgess Hill respectively.
- 5.78 In light of the identified capacity largely having been generated through the strong performance of out-of-centre facilities, which has grown since 2014 in many instances, as well as the relative performance of existing convenience locations within the District’s centres, we consider that the additional spending generated by new and existing residents should be used to bolster existing or proposed stores within existing centres in the retail hierarchy, as well as to support the planned locations of residential and employment allocations in the development strategy in the emerging Local Plan.

Comparison Goods Findings

Market Shares

- 5.79 Turning to consider comparison goods, we examine market shares across the range of categories defined by Experian. These eight categories cover all ranges of bulky and non-bulky items. The full results of our market shares analysis are set out in Tables 9-26 of **Appendix C**.

¹⁵ (Town Centres and Retail) Planning Practice Guidance, Paragraph: 004, Reference ID: 2b-004-20190722

- 5.80 To begin with, we look at the overall comparison goods spend by residents across the Study Area.
- 5.81 The results show that destinations in Mid Sussex District account for 32.6% (£320.9m) of the spending of all Study Area residents in 2021 (£982.8m per annum). The remaining 67.4% (£661.9m) of spending carried out by residents of the Study Area is spent at destinations beyond Mid Sussex District.
- 5.82 Figure 65 specifically examines where residents of the Study Area are carrying out their comparison goods spending. The results show that, in contrast to the convenience goods findings, town centre locations are the most popular destination in Mid Sussex (accounting for 24.6% of the 32.6% market share). Within that grouping, Haywards Heath (11.4% market share) is the most popular comparison goods destination within Mid Sussex District, followed by East Grinstead (8.0%) and Burgess Hill (4.0%).
- 5.83 Outside the District, a number of higher-order centres attract large proportions of comparison goods spend (combined with destinations within the Study Area, but outside of Mid Sussex's administrative boundaries). Crawley leads the way (29.5%), followed by Brighton (15.9%).

Figure 65. Comparison Goods Market Share by Destination

Destination	Total Market Share Comparison (%)	Total Market Share Comparison (£m at 2021)
Burgess Hill Town Centre	4.0%	£39.5m
East Grinstead Town Centre	8.0%	£78.1m
Haywards Heath Town Centre	11.4%	£111.8m
Copthorne Village Centre	0.1%	£0.5m
Crawley Down Village Centre	0.1%	£0.6m
Cuckfield Village Centre	0.2%	£1.7m
Hassocks Village Centre	0.6%	£6.0m
Hurstpierpoint Village Centre	0.2%	£1.8m
Lindfield Village Centre	0.2%	£2.2m
In-centre Sub-total	24.6%	£242.2m
<i>Burgess Hill out-of-centre</i>	3.4%	£33.9m
<i>East Grinstead out-of-centre</i>	1.8%	£17.4m
<i>Haywards Heath out-of-centre</i>	2.0%	£19.5m
<i>Other out-of-centre</i>	0.8%	£7.9m
Mid Sussex District Total	32.6%	£320.9m
Brighton (stores located within the Study Area)	3.1%	£30.8m
Crawley (stores located within the Study Area)	0.3%	£3.0m
Others outside of Mid Sussex in the Study Area	1.9%	£18.2m

Mid Sussex Retail Study

Crawley	29.2%	£287.3m
Brighton	12.8%	£126.1m
Horsham	5.0%	£49.6m
Hove	2.7%	£26.4m
Shoreham-by-Sea	2.0%	£20.1m
Tunbridge Wells	1.5%	£15.1m
Lewes	1.2%	£12.2m
Others outside the Study Area	7.4%	£73.2m
Total	100.0%	£982.8m

Source: Tables 25a & 25b, Appendix C

- 5.84 As with our previous assessment of convenience goods, we are also able to examine the degree of comparison goods spend within each Zone. Figure 66 examines the amount of comparison goods spending carried out inside Mid Sussex District by residents of the zones most aligned with the District itself.

Figure 66. Comparison Goods Market Share by Destination

Source: Appendix C, Table 25b

- 5.85 The survey findings for comparison goods show that, whilst around half of trade across Zones 1, 2, 3 and 6 is retained within the District, residents of Zones 4, 5 and 9 have a noticeably higher proportion of leakage outside of the District.
- 5.86 Overall, residents of the District (defined as Zones 1-6 and 9) carry out 35.8% of their comparison goods spending within the District itself, with 64.2% of spending carried out elsewhere. In terms of the latter, this is reflective of proximity to Crawley, which offers a substantial comparison goods offer (along with Brighton) within relatively easy commuting distances.
- 5.87 In Figure 67, we also analyse the market share of different types of comparison goods, considering which items are purchased from stores and centres inside Mid Sussex District, and what the propensity is to travel further afield for certain items.

Figure 67. Comparison Goods Market Share by Goods Category

Source: Appendix C

- 5.88 The survey results show that there is a considerable variance between spending on different goods categories. The amount of spend retained within the District varies from 71.4% of spending on chemist goods, to just 20.4% of spending on electrical goods.

Local Market Share Trends – Comparison Goods

5.89 In Figure 68 below, we examine the comparison goods spending patterns across 2021 and the findings of the Council's previous study from 2014 (again, corrected to remove online and other SFT spending).

Figure 68. Comparison Goods Market Share (2014-2021)

Source: Appendix C & Mid Sussex Retail Study 2014 (Appendix 5, Table 1)

5.90 The results show that in-centre facilities have experienced a notable reduction in market share, while the draw of out-of-centre destinations have grown, albeit from a much lower starting point. As such, the District has reduced its market share of comparison goods spend from 35.3% in 2014 to 32.6% in 2021.

Figure 69. Comparison Goods Market Share by Town Centres (2014-2021)

Destination	2014 Comparison Market Share (%)	2021 Comparison Market Share (%)
Burgess Hill Town Centre	9.6%	4.0%
East Grinstead Town Centre	8.1%	8.0%
Haywards Heath Town Centre	7.8%	11.4%

Source: Appendix C & Mid Sussex Retail Study 2014 (Appendix 5, Table 1)

5.91 Figure 69 above, demonstrates that whilst East Grinstead has shown relative resilience in retaining comparison goods spend, Burgess Hill has seen a notable drop-off of more than half. This is likely

due to the delays associated with the town centre regeneration scheme, which has likely reduced the attractiveness of the centre for new operators whilst awaiting works to commence. Conversely, Haywards Heath's market share has grown over the same period.

- 5.92 In light of the above, our comparison goods market share analysis shows that the District has, overall, fared reasonably well over the period 2014-2021. The likelihood is that the District has broadly retained its market share, despite the strength of regional competitors in Crawley and Brighton, because of minimal internal competition from out-of-centre destinations within Mid Sussex District. However, the findings clearly show that the centres do not provide significant comparison goods destinations in their own rights and highlights the current importance of a diverse range of convenience and service uses to support the District's centres.

Comparison Goods Capacity

- 5.93 The methodology for calculating capacity for comparison goods floorspace differs from that used to model capacity for convenience goods floorspace. The principal reason for this is that there are no robust, industry standard benchmark sales densities for calculating the turnover of smaller independent retailers that typically make up the majority of the comparison provision of town centres (although it is noted that sales densities are published for national multiple comparison retailers). Moreover, the trading levels of comparison retailers can fluctuate significantly depending on a number of localised variables, most notably the location of the retailer relative to similar providers (as customers are more likely to link multiple comparison goods trips to retailers in close proximity to each other).
- 5.94 As such, we adopt a standard approach that comparison goods retailers across the Study Area are trading 'at equilibrium' at 2021, meaning that we adopt the survey derived turnover of each facility, and examine capacity by measuring the growth in available expenditure to 2038. For the purposes of our assessment, we have assumed that the District's attraction to Study Area residents will remain constant at 32.6% of all spending proportionate to population growth (Table 26a). Based on the limited scale of planned comparison goods led developments inside and around the District, we consider this a robust basis for analysis.
- 5.95 Figure 70 sets out the resultant gross comparison goods capacity forecasts over time. The early years forecast shows negative capacity. This is because Experian forecasts show that the near-term sales efficiency of existing retailers will actually grow faster than the forecast growth in spending, meaning

that the limited expenditure generated by the growth in local population will be consumed by existing retailers, rather than being made available to support new floorspace. Only by 2031 does a positive surplus expenditure arise.

Figure 70. Gross Comparison Goods Surplus Expenditure in Mid Sussex

Year	Benchmark Turnover (£m)	Survey Turnover (£m)	Inflow (£m)	Surplus Expenditure (£m)
2026	377.4	372.5	0.0	-4.9
2031	430.8	431.1	0.0	0.3
2036	489.8	503.1	0.0	13.3
2038	515.6	535.9	0.0	20.4

Source: Table 26a, Appendix C

- 5.96 We then consider committed and extant planning permissions for new comparison retail floorspace across the Study Area that are likely to come forward over the plan period, again informed by our discussions with Council officers. This includes any developments that are currently under construction, or would not have been operating at the time of the household survey. In the same way as we viewed convenience goods, we do not take into account proposed allocations for retail floorspace from the current Local Plan that are not likely to come forward over the emerging plan period.
- 5.97 In total, these committed developments are minor and equate to a net 580 sq m of comparison goods floorspace and an estimated turnover of £3.1m (see Table 26c at Appendix C). The commitments are then projected forwards and deducted from the surplus expenditure. Once accounted for, we are able to calculate the net comparison goods capacity.

Figure 71. Net quantitative 'capacity' for new comparison goods facilities in Mid Sussex

Year	Surplus Expenditure (£m)	Commitments (£m)	Residual Expenditure (£m)	Minimum Floorspace Capacity (sq m net)	Maximum Floorspace Capacity (sq m net)
2026	-4.9	3.7	-8.6	-1,100	-1,500
2031	0.3	4.2	-3.9	-400	-600
2036	13.3	4.8	8.5	800	1,100
2038	20.4	5.0	15.3	1,400	1,900

Source: Table 26d, Appendix C

- 5.98 Taking account of committed turnover, we identify an initial negative residual expenditure of -£8.6m at 2026, rising to £15.3m by 2038. However, this equates to a very small floorspace equivalent of between 1,400-1,900 sq m net over the full plan period.

5.99 In terms of future planning, it is evident that macro-economic conditions in general, and retail trends towards online shopping, have re-shaped the viability of the sector. As a result, our forecasts show negative floorspace capacity up to 2031, showing only minimal growth from that point onwards. On this basis, we do not recommend that the Council seeks to allocate any floorspace for additional comparison goods over the short-medium term, and instead formulates a policy base on which to preserve and enhance existing floorspace in its town centres.

Leisure Goods Findings

5.100 The results of the NEMS Household Telephone offer an indication of locations/facilities where residents of the Study Area satisfy their leisure and cultural needs. As such, the survey enables us to analyse patterns of travel and potential deficiencies (those that are qualitative in nature) within the District.

5.101 The modelling of future commercial leisure needs cannot necessarily be based upon the same quantitative model used to estimate retail need. This is because leisure spending is not undertaken regularly and is often influenced by cultural shifts and technological advances. Nevertheless, we appraise the existing provision of leisure facilities across the District, and compare this against recognised sector 'standards' or 'benchmarks'. The completion of this 'benchmarking exercise' allows us to establish deficits and where gaps in the provision of existing facilities may be.

Existing Market Shares

5.102 The NEMS Household Survey asked respondents to describe their leisure and cultural activities and habits. The responses to these questions (Questions 33-43) inform our understanding of leisure trends and needs. The breakdown of the answers to these questions is set out in full within Appendix D and we extrapolate the key results here.

5.103 It is important to acknowledge that residents outside the District may visit facilities within the District for leisure, recreation and cultural activities, as well as vice-versa. However, whilst we are cognisant of inflows and outflows of residents, the purpose of this section is to review the leisure patterns of District residents in order to assist the Council in planning for residents' requirements over the plan period. Therefore, whilst we focus our review of the results of the household survey across the full Study Area, we undertake our benchmark analysis on the basis of the population across District derived from Experian MMG3.

5.104 In the first instance, it is important to have an understanding of the participation rates and general

popularity of leisure activities across the Study Area. In Question 42 of the Household Survey NEMS asked respondents to identify all of the leisure activities in which they participated (respondents were allowed to identify as many options as they wished). We summarise the results in Figure 72.

Figure 72. Participation in Leisure Activities (%)

Activity	Study Area Participation (%)
Indoor sports or health and fitness activity	30.8%
Cinema	58.3%
Restaurant	81.3%
Pub / bars / nightclubs	58.1%
Ten pin bowling	25.4%
Bingo	3.9%
Theatres / concert halls / museums / art galleries and other cultural facilities	54.2%
(None mentioned)	11.0%

Source: Q42, Appendix D

5.105 The most popular leisure activity across the Study Area is to go to a restaurant, which 81.3% of respondents indicated they do on at least an occasional basis. The second most popular activity is a cinema trip (58.3%), closely followed by going to pubs/bars/nightclubs (58.3%), and visits to cultural facilities such as theatres'/museums/art galleries (54.2%). Playing bingo (3.9%), is the least popular activity. Generally speaking, these visitation rates are similar to those we have experienced in most parts of the UK.

5.106 NEMS also asked a series of questions to understand where residents of each zone usually undertake their chosen leisure activity.

Figure 73. Most Popular Leisure Destinations (%)

Activity	1 st choice	2 nd choice	3 rd choice
Indoor health & fitness	Triangle Leisure Centre, Burgess Hill (14.5%)	The Dolphin Leisure Centre, Haywards Heath (14.2%)	PureGym, Burgess Hill (7.5%)
Cinema	<i>Cineworld, Crawley Leisure Park (40.9%)</i>	Scott Cinemas, East Grinstead (15.6%)	Orion Cinema, Burgess Hill (19.5%)
Restaurant	Haywards Heath Town Centre (13.6%)	<i>Brighton City Centre (9.3%)</i>	East Grinstead Town Centre (8.9%)
Pub / bars / nightclubs	Burgess Hill Town Centre (11.5%)	Haywards Heath Town Centre (10.6%)	East Grinstead Town Centre (10.5%)
Ten pin bowling	<i>Hollywood Bowl, Crawley Leisure Park (71.6%)</i>	<i>Hollywood Bowl, Brighton (22.7%)</i>	<i>The Rec, Horsham (1.4%)</i>
Bingo	<i>Buzz Bingo, Crawley (38.5%)</i>	<i>Buzz Bingo, Brighton (32.0%)</i>	<i>Central London (8.4%)</i>
Cultural facilities	<i>Central London (45.6%)</i>	<i>Brighton City Centre (25.1%)</i>	East Grinstead Town Centre (5.3%)

Note: Facilities outside of the District in grey *italics*; facilities in the District in green

Source: Q34-40, Appendix C

5.107 We examine the most popular destinations for Study Area residents in Figure 73, which generally highlights that Study Area residents will typically travel outside of the District for their leisure and cultural trips, with the exception of indoor health & fitness, restaurants and pubs / bars / nightclubs that benefit from being closer to home.

5.108 Beyond Mid Sussex, facilities in Crawley (cinema, bowling and bingo) take the top spots in the majority of categories, whilst Brighton is also well represented.

Need for Additional Leisure Facilities

5.109 Questions 50 and 52 of the household survey found that over half of respondents across the Study Area (58.9%) did not identify any leisure facilities which they wished to see more, and over two thirds (67.2%) did not have any suggestions for additional cultural facilities. This suggests that residents are generally happy with the provision of facilities, though this does not necessarily suggest that residents would not support additional leisure facilities, just that there is no pressing need. Such a response is typical of our surveys across the UK.

5.110 In Figures 74 and 75, we isolate the responses in order to identify the main requests for new facilities, and whether there are any easily identifiable gaps in provision. More than one suggestion was allowed.

Figure 74. Leisure Facilities residents wish to see more of (%)

Facilities	Study Area Desires (%)
None/Don't know	58.9%
Cinema	8.4%
Bowling alley (ten-pin bowling)	6.3%
Leisure facilities / activities for young children	5.4%
Ice rink	4.8%
Leisure facilities / activities for teenagers	4.3%
Theatres	4.1%
Indoor swimming pool	3.6%
Restaurants	3.5%
Better shopping facilities	3.5%

Source: Q50, Appendix C

Figure 75. Cultural Facilities residents wish to see more of (%)

Facilities	Study Area Desires (%)
None/Don't know	67.2%
Cultural centres	15.5%
Tourist attractions	13.7%
Hotels	5.7%
Conference venue	5.5%

Source: Q52, Appendix C

- 5.111 There are no particularly popular request for any of the leisure facilities listed, with the 8.4% of respondents requesting a local cinema and 6.3% for a bowling alley. This may be reflective of the proposals for such facilities as part of The Martlets redevelopment, which has raised the expectation of new cinema and bowling destinations.
- 5.112 Whilst there was also a higher proportion of responses for new cultural facilities (with 15.5% and 13.7% requesting a cultural centre and tourist attractions, respectively). Whilst we may not identify any specific need for allocations for such facilities, there may be opportunities for such applications to come forward as standalone applications or proposals over the plan period.
- 5.113 Overall, the range of responses points towards a general satisfaction with local provision and that there is no significant latent demand for new leisure or cultural facilities. This does not mean that qualitative or quantitative improvements would not be welcome, or required over time due to a growing population, and we examine below the capacity which might arise to the end of the plan period at 2038.

Capacity for Additional Leisure Facilities

- 5.114 Having identified existing market shares and examined the demand for new facilities from the District's residents, we consider here the potential supply-side issues for the provision of new leisure facilities. The purpose of this assessment is to examine the realism and viability of actually providing for new facilities through the Local Development Plan process in particular.
- 5.115 The findings of the NEMS household survey allow us to assess market shares within the District for a variety of leisure sectors. As such, we have undertaken a 'benchmarking' exercise by referencing the estimated increases in the District population. The results of the 'benchmarking' exercise have been used to inform our conclusions with regards to the prospective future need for additional commercial leisure facilities.

Health and Fitness Capacity

- 5.116 The Leisure Database Company¹⁶ (May 2019) identify that the level of health and fitness clubs in the UK is higher than it has ever been before, with more clubs and more members. In terms of membership rates across the whole of the UK, the Leisure Data Base Company outlines that 15.6% of the UK's population are registered members at private health and fitness clubs meaning that 1 in

¹⁶ State of the UK Fitness Industry 2019, Leisure Database Company, May 2019

every 7 people is a member of a gym. In 2019, there were in the region of 7,239 health and fitness clubs operating across the UK (up from 7,038 in 2018). The biggest area of growth has come from low-cost gyms, which account for over 35% of memberships in the private sector.

5.117 In 2016, Statista reported that the average size of mainstream gym, health-club and leisure centre membership in the UK was approximately 5,250 members per club. Building on this, our household survey results showed that approximately 30.8% of Study Area residents participate in health and fitness activities (Q42). Of those, the survey results suggest that around 63.6% of residents currently carry out their health & fitness activities within the District itself (Q43). We term this the 'District attraction rate', and use it as a benchmark (assumed to be constant) to underpin our assessment of the number of additional facilities that can be supported in the District over time.

5.118 Experian identifies that Mid Sussex has an identified estimated population of 155,660 at 2021, increasing to 172,877 by 2038. Based on the current participation rates, attraction rates, and average club size membership identified above, we calculate in Figure 76 below that the District's residents could support 5 to 6 health and fitness centres over the plan period.

Figure 76. Health and fitness centre capacity

Year	District Population	Regular Participants @ 30.8%	District Attraction Rate @ 63.6%	Average Membership	No. of Clubs Supported
2021	155,660	47,943	30,492	5250	5.8
2026	161,901	49,866	31,714	5250	6.0
2031	166,961	51,424	32,706	5250	6.2
2036	171,299	52,760	33,555	5250	6.4
2038	172,877	53,246	33,865	5250	6.5

Source: Typical population to support a health and fitness club derived from the Leisure Database Company Research (2019)

5.119 Comparing capacity to supply, we consider that there is only likely to be limited opportunities to expand supply over the plan period. Our survey results showed there to be four large publicly owned leisure centres within the District at Haywards Heath (The Dolphin), Burgess Hill (The Triangle) and East Grinstead (Kings Centre), as well as Hassocks Sports Centre. There are also a number of commercial gymnasiums and health clubs at Burgess Hill (PureGym), East Grinstead (Puregym, as well as the Chartham Park Country Club) and Crawley Down (Nuffield). Beyond that, provision is made up of a number of smaller facilities across the District that attract market share from the resident population (e.g. village halls, hotels, sports clubs etc.).

5.120 Moreover, the qualitative results of our survey (Figure 74) did not point to any significant degree of concern over a perceived lack of health and fitness facilities in Mid Sussex. Only 3.7% combined

responses flagged health and fitness clubs or leisure centres as a request. We therefore recommend that the Council remains welcoming of commercial competition in general, not least because of the health and well-being benefits for residents, but that there is unlikely to be a requirement to allocate any specific site for this purpose.

Cinema Capacity

5.121 The District has two mainstream cinemas, providing a total of 5 screens (624 seats), at an average of 125 seats per screen:

- Orion Cinema, Burgess Hill – 2 screens (239 seats)
- Scott Cinemas, East Grinstead – 3 screens (385 seats)

5.122 Notably, The Martlets permission includes a 10 screen cinema (alongside a 16 lane bowling alley), which have yet to be constructed, and so are not reflected in the current market share considerations.

5.123 The NEMS Household Survey outlines that existing cinemas across Mid Sussex attract 27.8% of all cinema trips made by Study Area residents (Q44).

5.124 In 2019, the UK Cinema Association identified that total UK cinema admissions were 176.1 million, equating to 2.7 trips per person. They also identified 840 cinema facilities with 4,564 screens in the UK, equating to 937,161 cinema seats in the UK. Based on this data, the UK yearly average was 38,585 cinema trips per screen.

5.125 As shown in Figure 77, in order to gauge the number of cinema screens that can be supported in the District over the plan period, we have calculated the anticipated cinema attendance (based on the national average of 2.7 trips per person). We also account for the District's current cinema trip attraction rate and assume that this will persist over the plan period (29.8% of all cinema trips).

Figure 77. Cinema screen capacity

Year	District Population	No. of Cinema Visits Per Person	Total Cinema Attendance	District Attraction Rate @ 29.8%	Trips per Screen	Cinema Screens Supported
2021	155,660	2.7	420,282	116,838	38,585	3.0
2026	161,901	2.7	437,133	121,523	38,585	3.1
2031	166,961	2.7	450,795	125,321	38,585	3.2
2036	171,299	2.7	462,507	128,577	38,585	3.3
2038	172,877	2.7	466,768	129,761	38,585	3.4

Source: Nexus analysis

5.126 Our benchmarking exercise suggests that the current provision of 5 screens is adequate to serve the

needs of the resident population to the end of the plan period, on the basis of the current attraction rate.

5.127 We are mindful though that current cinemas in the District are smaller than the UK average size in terms of seat numbers – 125 seats in Mid Sussex, as opposed to 205 across the UK¹⁷. Taking this into account, in addition to the plans for The Martlets redevelopment, we would not recommend the Council actively seek a further cinema in the District.

Restaurants, Pubs, Bars and Café Capacity

5.128 We have undertaken an assessment of the potential capacity for additional food and beverage floorspace across the District, utilising current market shares as identified through the household survey, population and spending growth rates and benchmarking against current levels of provision.

5.129 This exercise identifies the future spending available to support additional food and beverage floorspace (in the form of restaurants, pubs, bars, café etc.) over the plan period to 2038. This approach is not prescriptive, but instead provides an indication of the scope for future development to be supported, in addition to the findings of the assessments of the key centres.

5.130 Experian provides localised data on spending on restaurants and cafés per capita, which includes spending on alcoholic drinks (away from home) and take-away meals. This spending was shown to be £1,603 per annum for residents in the District (2019 prices).

5.131 Taking into account the population growth, and anticipated leisure spending growth rates (Experian Retail Planner 18, Figure 1a¹⁸), we calculate in Figure 78 a total spend across the District of £254.5m at 2021, increasing to £334.8m by 2038.

5.132 This spending is then attributed to the restaurant, café and bar facilities across the District. The household survey results (Q45 and Q46) showed that restaurants, cafés etc. in Mid Sussex attracted 49.2% of total food spending, whilst the District's pubs and bars attracted 53.7% of beverage spending. Accordingly, it is reasonable to assume that around 50% of all food and beverage spending by residents is currently spent in the District itself.

5.133 Growing the 'benchmark' turnover of facilities from current levels on the basis of 1% per annum¹⁹ to account for growth through extensions and trading efficiencies over the plan period, we find the

¹⁷ Approximately 205 as per UK Cinema Association Findings, 2019

¹⁸ Note that this accounts for a substantial short-term decline in leisure spending as a result of the Covid pandemic

¹⁹ We are not aware of any published data for restaurant, pub, bar and café sales efficiency growth and so have assumed a figure of 1%.

anticipated spending surplus (or deficit) as follows:

Figure 78. Restaurants, Pubs, Bars and Café Spending

Year	District Population	Spend Per Capita	Total Spend (£m)	Retention Rate @ 50%	Growth in Spending (£m)	Benchmark Turnover (£m)	Benchmark Growth (£m)	Residual Spending (£m)
2021	155,660	£1,635	£254.5	£127.27	-	-	-	-
2026	161,901	£1,719	£278.2	£139.12	£11.9	£133.8	£6.5	£5.4
2031	166,961	£1,806	£301.6	£150.79	£23.5	£140.6	£13.3	£10.2
2036	171,299	£1,898	£325.2	£162.60	£35.3	£147.8	£20.5	£14.8
2038	172,877	£1,937	£334.8	£167.40	£40.1	£150.7	£23.5	£16.7

Source: Nexus analysis

5.134 We find a total food and beverage spending surplus across Mid Sussex District of £16.7m by 2038.

Figure 79. Restaurants, Pubs, Bars and Café Capacity

Year	Residual Spending	Sales Density	Floorspace (sq m)
2021	-	-	-
2026	£5.4	£5,255	1,000
2031	£10.2	£5,523	1,800
2036	£14.8	£5,805	2,600
2038	£16.7	£5,922	2,800

Source: Nexus analysis

5.135 Adopting an average sales density of £5,000 per sq m at 2021 (again, projected to grow in line with a 1% sales efficiency) we calculate the typical restaurant, pub and café floorspace that could be supported by the identified surplus expenditure. This is shown as being up to 2,800 sq m by 2038. This should be treated only as a rough guide.

5.136 We are also highly cognisant of the fact that the recent pandemic will have resulted in the closure of a large amount of restaurant, bar and café floorspace across the District. Whilst our figures show that there is likely to be a substantial pent-up consumer demand for additional spending this area, this does not mean that all of that demand should be met through new floorspace. The potential re-occupation of vacant floorspace should be accounted for in the first instance.

5.137 The food and beverage sector has been hard-hit by the pandemic and there have been a number of vacancies created as national multiple chains have been forced to close. Our observation is that Mid Sussex has not seen the brunt of this, as much of its food and beverage offer is independent.

5.138 Notwithstanding, our expectation is that there will be a quantum of vacant café, restaurant and bar floorspace that can be used to accommodate new start-ups, given the national 'town centre first' policy. The development of main town centre uses such as cafes and restaurants are unlikely to be supported in out of centre locations, and we would expect any applications for such developments

to include a proportionate assessment of impact, as well as a sequential search of existing suitable and available locations within the relevant town or village centre.

5.139 Taking this into account, the relatively small quantum of floorspace capacity we have identified does not, in our view, warrant any specific allocations in the emerging Plan.

6 Policy Approaches

Introduction

6.1 In this section of the report, and based on our findings in the preceding sections, we provide commentary that responds to the following topics:

- Current and potential place in **sub-regional hierarchy** of the three main towns;
- District wide **town centre hierarchy**;
- Identification of **town centre boundaries** and primary shopping areas;
- Consideration of a lower threshold **for Retail Impact Assessments**;

6.2 Where relevant we provide **policy recommendations** for each, specifically in the context of adopted policies DP2 (Town Centre development) and DP3 (Village and Neighbourhood Development).

6.3 We also go on to provide non-policy, **wider recommendations** for tools the Council may be able to utilise to help enhance the vitality and viability of the District's centres.

Sub-Regional Hierarchy

6.4 The brief asked us to commentary about the current potential place within the sub-regional hierarchy of the three main towns. We have therefore undertaken a benchmarking exercise.

6.5 In order to undertake this exercise we have examined a range of key indicators at Figure 80, including the following:

- Centre classification | Centre classification used to understand each centre's role in the overall retail hierarchy. Classifications have been taken from the relevant local authority designation.
- Number of retail outlets | Utilised to understand the extent of the retail offer in each centre. Data gathered from a combination of Experian Goad, and the most recent retail study in each case.
- Proportion of comparison units | The proportion of comparison good retailers in each centre is analysed to understand the type of retail on offer and the prominence of traditional comparison goods shopping in each centre. Data gathered from a combination of Experian Goad, and the most recent retail study in each case. Where only historical data is available (in

the case of Brighton and Horsham, these figures are likely to be have reduced over time in line with wider retail trends, and should be considered a broad guide only).

- Visitors | Where we have been able to find comparable estimates for the annual number of visitors to the town centres, these have been provided. These figures provide allow us to compare the popularity of the centres.

6.6 Figure 80 provides the full suite of data. We have selected a range of centres from within the immediate region. There is a recent retail study and therefore health check in each case, with the exception of Horsham and Brighton, which allows us to pull comparable data for each of the indicators. In particular, the recent health checks have in most cases included town centre composition information that categorises the outlets by Goad category.

Figure 80. Benchmarking Exercise for Sub-Regional Hierarchy Commentary

Centre	Centre Class	Units (#)	Comparison (%)	Estimated Annual Visitors
Burgess Hill	Main Town Centre	198	25.8	857,101
East Grinstead	Main Town Centre	229	27.1	1,296,544
Haywards Heath	Main Town Centre	223	37.7	1,181,497
Royal Tunbridge Wells	Primary Regional Centre	670	34.6	4,700,000
Crawley	Town Centre	399	32.1	-
Horsham	Town Centre	361	41.2	-
Brighton	Regional Town Centre	1,205	48.0	9,500,000
Uckfield	District Centre	193	32.6	-

Sources: Tunbridge Wells Retail and Leisure Study Update, Nexus Planning 2020

Crawley Retail Study, Nexus Planning 2019

Horsham Retail Needs Study, GVA Grimley 2010 & 2017

Brighton Retail Study Update, CBRE 2011

Wealden Town Centre Study, Nexus Planning (yet to be published)

6.7 The benchmarking exercise confirms that Brighton Regional Town Centre has by far the largest town centre offer with 1,205 units, and also the largest proportion of comparison units. While this proportion is likely to have reduced since the Retail Study update was completed in 2011, with all likelihood the revised proportion will still be relatively high. The estimated annual visitors is also head and shoulders above the rest.

- 6.8 Royal Tunbridge Wells also has an offer that exceeds the remaining centres by some distance, including 670 units, a 34.6% proportion of comparison goods retailers, and 4.7m estimated annual visitors. Meanwhile, Crawley and Horsham each have between 350 and 400 retail units within their town centres, with Horsham having a greater proportion of comparison goods retailers. Annual visitor data is not available at the current time for either.
- 6.9 All three Mid Sussex centres are directly comparable to Uckfield in Wealden District in terms of overall quantum of units. Of the three, East Grinstead has the highest number of units and the highest number of annual visitors. Haywards Heath has the largest comparison goods offer, even higher than that of Royal Tunbridge Wells. With time and regeneration, the District's centres may be able to compete with the likes of Crawley and Horsham, but are unlikely to ever compete with Royal Tunbridge Wells or Brighton.

Town Centre Hierarchy

Discussion

- 6.10 The brief asks that we identify the town centre hierarchy within the District. The PPG sets out that for planning purposes, town centres comprise a location where main town centre uses are concentrated, including city and town centres, district centres and local centres.
- 6.11 Annexe 2 of the NPPF defines a 'town centre' as an:
- Area defined on the local authority's policies map, including the primary shopping area and areas predominantly occupied by main town centre uses within or adjacent to the primary shopping area. References to town centres or centres apply to city centres, town centres, district centres and local centres but exclude small parades of shops of purely neighbourhood significance. Unless they are identified as centres in the development plan, existing out-of-centre developments, comprising or including main town centre uses, do not constitute town centres.*
- 6.12 The adopted Mid Sussex District Plan does not provide a retail or town centres hierarchy, but does set out a settlement hierarchy for the towns and villages within the District. The Settlement Hierarchy, included at Policy DP6 of the District Plan, includes five tiers, or settlements types, as set out below at Figure 81.
- 6.13 As set out in Chapter 5, we have undertaken health checks assessments for all centres in Category 1 and Category 2 as outlined below. The process of preparing the health checks provides a good base of data to be able to consider an appropriate town centres hierarchy.

Figure 81. Mid Sussex Adopted Settlement Hierarchy

Category	Settlement characteristics and function	Settlements
Category 1	Settlement with a comprehensive range of employment, retail, health, education leisure services and facilities. These settlements will also benefit from good public transport provision and will act as a main service centre for the smaller settlements.	Burgess Hill, East Grinstead, Haywards Heath
Category 2	Larger villages acting as Local Service Centres providing key services in the rural area of Mid Sussex. These settlements serve the wider hinterland and benefit from a good range of services and facilities, including employment opportunities and access to public transport.	Copthorne, Crawley Down, Cuckfield, Hassocks and Keymer, Hurstpierpoint and Lindfield
Category 3	Medium sized villages providing essential services for the needs of their own residents and immediate surrounding communities. Whilst more limited, these can include key services such as primary schools, shops, recreation and community facilities, often shared with neighbouring settlements.	Albourne, Ardingly, Ashurst Wood, Balcombe, Bolney, Handcross, Horsted Keynes, Pease Pottage, Sayers Common, Scaynes Hill, Sharpthorne, Turners Hill and West Hoathly
Category 4	Small villages with limited services often only serving the settlement itself.	Ansty, Staplefield, Slaugham, Twineham and Warninglid
Category 5	These small settlements have very limited or no services.	Hamlets such as Birch Grove, Brook Street, Hickstead, Highbrook and Walstead.

6.14 Figure 82 provides a breakdown of key indicators including the number of retail units within each centre, footfall data provided through the Visitor Insights Baseline Report, instructed by Mid Sussex District Council in 2021, and broad market share figures distilled through the capacity assessment. The indicators allow us to compare and contrast the performance of each centre, and form recommendations for a town centre hierarchy.

Figure 82. Centres Comparison Table

Centre	Units (#) ¹	Visitors ²	Market Share
Burgess Hill	198	857,101	4.0%
East Grinstead	229	1,296,544	8.0%
Haywards Heath	223	1,181,497	11.4%
Copthorne	12	N/A	0.1%
Crawley Down	10	157,846	0.1%
Cuckfield	33	300,238	0.2%
Hassocks	55	392,970	0.6%
Hurstpierpoint	52	251,865	0.2%
Lindfield	40	451,216	0.2%

¹ As established through the health check composition surveys

² Annual Footfall September 2020-September 2021, Visitor Insights Baseline Report 2021

- 6.15 As expected, the three main town centres of Burgess Hill, East Grinstead and Haywards Heath sit head and shoulders above the rest in terms of number of units, annual visitors and market share.
- 6.16 Each of these centres contains between 190-230 retail units and receive between 800,000 and 1.3m visitors per year. These centres would clearly form Tier 1 of any future hierarchy.
- 6.17 The next clear grouping of centres comprises Cuckfield, Hassocks, Hurstpierpoint and Lindfield, all of which comprise between 30-60 retail units, and between 200,000 and 500,000 visitors each year. These centres currently fulfil their role as large village centres, providing a broad offer of retail options and services, and comfortable fit into Tier 2 of any future hierarchy.
- 6.18 The remaining centres of Copthorne and Crawley Down are less clear cut.
- 6.19 Starting with Copthorne, while our composition surveys have recorded 12 retail units, the offer is disjointed, across three clusters that have limited connection to each other. The main central 'hub' is located at the junction of Copthorne Bank and Brookhill Road, and is comprised of six units between the public house on the corner and the beauty salon to the east. Copthorne's offer and function has been assessed as being more akin to a neighbourhood parade than a village centre, and therefore Copthorne has not been included in the recommended Town Centres Hierarchy illustrated at Figure 83.
- 6.20 Crawley Down Village Centre is comprised of 10 retail units in a clear hub at the junctions of Station Road, Old Station Close and Burleigh Way. Despite having only 10 units, the offer is broadly what would be expected from a local centre, providing a range of shops and services. While the centre does not have the same level of provision as Cuckfield, Hassocks, Hurstpierpoint and Lindfield Village Centres, it does clearly perform an important localised role in the wider hierarchy. With further enhancement of the existing offer, and particularly the regeneration of the vacant public house, the centre may have the potential to serve a function similar to the large village centres. To retain consistency with the adopted settlement hierarchy, our recommendation is to include Crawley Down as a 'Local Centre', but within Tier 2.

Policy Guidance

- 6.21 We recommend that a town centres hierarchy is included within the future District Plan Review, including a description of the role of each tier, similar to that included at Figure 81.

Figure 83. Recommended Town Centres Hierarchy

Tier	Description	Centres
Tier 1 – Main Town Centres	Provides a significant range of shops, services, businesses, community facilities, employment opportunities, serving a broad area including smaller neighbouring towns.	Burgess Hill, East Grinstead and Haywards Heath
Tier 2 – Large Village and Local Centres	Provides, or has the potential to provide, a range of shops, services, businesses and community facilities, to serve the immediate local area.	Cuckfield, Hassocks, Hurstpierpoint and Lindfield Crawley Down

6.22 Furthermore, we recommend that wording is included in any future policy that appropriately ensures that future development within each of the centres is proportionate to the status of that centre within the hierarchy. Both adopted policies DP2 and DP3 go some way to doing this already, where text is included that states:

- DP2 – *'...development, including mixed use and tourism related development, will be permitted providing it: is appropriate in scale and function to its location including the character and amenities of the surrounding area...'*
- DP3 – *'...development, including for mixed uses, will be permitted providing it: helps maintain and develop the range of shops and services to enable the village centre to meet local needs; and is appropriate in scale and function to its location including the character and amenities of the surrounding area...'*

Town Centre Boundaries

Discussion

6.23 The brief asks us to provide advice to assist the Council in identifying the extent of town centre boundaries and primary shopping areas for the main town centres in the district. Our recommendations are contained at Appendix E.

6.24 As described above, the NPPF defines town centres as the *'Area defined on the local authority's policies map, including the primary shopping area and areas predominantly occupied by main town centre uses within or adjacent to the primary shopping area'*.

- 6.25 The NPPF defines a primary shopping area as a '*defined area where retail development is concentrated*'. The primary shopping area is also relevant in establishing what constitutes 'edge-of-centre', and 'out-of-centre', as the 300 metre measurement is calculated from the edge of the primary shopping area.
- 6.26 Using the definitions of a 'primary shopping area' (PSA) and 'town centre', we have provided recommendations for defining the extent of town centre boundaries and primary shopping areas for each of the District's main town centres. We have then made recommendations for village centre boundaries for the remaining centres. The village centre boundary is intended to be attributed the same policy recognition as a PSA. A description of our town centre boundary and PSA recommendations for each town and village centre is included in the table below.

Figure 84. Town Centre Boundary and Primary Shopping Area Recommendations

Town Centre	Adopted	Description
Burgess Hill	Y	<p>The proposed Burgess Hill Town Centre boundaries remain similar to those adopted in the Mid Sussex District Plan 2014-2031, with key justified contractions, including:</p> <ul style="list-style-type: none"> • The existing protrusion along Lower Church Road, which functions more as a small parade of shops, and is isolated from the remainder of the centre; • The residential building at the corner of Crescent Road and Crescent Way; • The triangular protrusion to the east, including Mill Road, Middle Way and Cyprus Road, which is predominantly residential in form and function; • The residential building at Wolstonbury Way; • The parade at Junction Road which functions more as a small parade of shops, and is relatively isolated from the remainder of the centre. <p>The new boundaries would focus on the areas of the town centre that contribute to its function as one of the main town centres of the district.</p> <p>A PSA is also proposed that encompasses the town centre's core shopping areas including the retail units fronting Church Walk</p>

Town Centre	Adopted	Description
		and Church Road, and the shopping centres to the south. The proposed PSA is similar to the adopted primary retail frontages.
East Grinstead	Y	<p>Minor amendments are proposed to the adopted East Grinstead Town Centre boundary to more accurately reflect the areas that make a positive contribution to the function of the town centre. Minor contractions are proposed to exclude clearly residential areas including:</p> <ul style="list-style-type: none"> • Cantelupe Road between Institute Walk and High Street, which contains a mix of residential and employment uses; • Residential units north of Christopher Road; • Residential development north of Railway Approach to the west of The Railway Pub; • Residential development at the corner of Railway Approach and Glen Vue; <p>A PSA is also proposed which encompasses the majority of the units fronting the London Road, as well as the retail provision along the western portion of High Street. The PSA will promote and enhance the provision of a more traditional retail offer.</p>
Haywards Heath	Y	<p>Only one minor change is proposed to the adopted Haywards Heath Town Centre boundary, which is to exclude the residential strip and small car park between South Road Service Road and Gower Road. The strip typically comprised two storey detached dwellings. There is also a small existing car park which is included as a development site in the Haywards Heath Masterplan, with a proposal for residential development.</p> <p>A PSA is proposed that encompasses the offer of units with frontage to South Road, including the development site highlighted in the Masterplan at the corner of South Road and Sussex Road. It also incorporates The Orchards, an important contributor to the vitality and viability of the centre.</p>

Town Centre	Adopted	Description
Crawley Down	Y	A village centre boundary for Crawley Down Village Centre is included on the adopted policies map. Our recommendation contracts that boundaries slightly to remove the village green and the care home at the south side of Burleigh Way.
Cuckfield	N	Our recommendation for the village centre boundary for Cuckfield Village Centre is that it would incorporate the retail offer fronting High Street, between its junctions with South Street and Church Street in the south, and its junction with Broad Street in the north. It would also incorporate the Broad Street car park and the retail and leisure uses along the northern side of Broad Street.
Hassocks	N	Hassocks Village Centre is clearly delineated by the existing offer of shops and services with frontage to Keymer Road. Our recommended boundary incorporates the area between Woodland Road in the west and Orion Parade in the east.
Hurstpierpoint	N	Hurstpierpoint Village Centre provides a linear string of shops and services in three clusters. Our recommendation is to include all three clusters within a future village centre boundary, as each contributes to the overall Hurstpierpoint Village Centre offer. The recommended boundary incorporates the majority of units with frontage to Hassocks Road, between Brighton Road in the west and South Avenue in the east, with the exception of some sections where the predominant form of development is detached residential houses.
Lindfield	Y	The main retail offer provided by Lindfield Village Centre is located along the High Street between Alma Road in the north, and Slake cafe in the south. Our recommendations for Lindfield Village Centre boundaries propose contractions to the previously adopted boundaries included in the Policies Map. Where the adopted boundaries included all properties with frontage to High Street up to Brushed Lane, our recommendation proposes to stop

Town Centre	Adopted	Description
		the boundary at Alma Road. The justification for this amendment is that the majority of properties north of Alma Road are residential, with the exception of four units including a clothing shop, The Bent Arms public house, and Italian restaurant and a barber.

Policy Guidance

- 6.27 Both Policy DP2 and Policy DP3 contain wording that sets out the uses that are considered to be appropriate within the town or village centre. Policy DP2 also provides guidance specific to each of the primary and secondary frontages. As national policy has moved away from adopting primary and secondary frontages within town centres, we have recommended that a primary shopping area is adopted in each of the three main Town Centres. Similarly, where boundaries are adopted for the lower tier centres, these should be treated as the equivalent to a PSA. Any future policy should therefore provide direction for the uses that are considered appropriate in the town centre and the PSA.
- 6.28 In this regard, we recommend the following in relation to the policy position for town centres and primary shopping areas:
- Within the defined PSA:
 - Class E should be the predominant use in the PSA. Where a change of use is proposed, support for main town centre uses that would sustain and enhance the vitality and viability of the centre and would not result in adverse impact of the amenity of nearby occupiers;
 - Only support the loss of Class E uses to alternative uses that are not town centre uses where evidence can be provided that the alternative use would enhance the vitality and viability of the centre, not result in adverse amenity impacts, and it can be demonstrated that a Class E use is no longer viable, through evidence of long term vacancy (to be defined) and/or proactive marketing;

- Encourage uses that would provide an active frontage at ground floor level. This is unlikely to include residential uses, which should be resisted at ground floor level, but supported on upper storeys;
- Ensure development proposals do not result in a concentration of uses that harms the vitality and viability of the centre;
- Within the defined town centre boundaries:
 - Main town centre uses, as defined by the NPPF, should be supported;
- Outside of defined town centre boundaries:
 - Small neighbourhood centres and parades of five or more²⁰ main town centre uses should be protected to meet the needs of their own communities and countryside areas, except where the existing use is no longer viable, and the proposed use is appropriate in scale and function, will not result in adverse amenity impacts, or is in accordance with a relevant Neighbourhood Plan;

6.29 In tandem with the policy guidance above, a range of other policy tools could be used to strengthen the town and village centre offer, including the following:

- Restrictive conditions:
 - For new retail, food and beverage, and associated services uses (Use Class E(a), (b), (c)) within the PSA, restrict change of use across Use Class E through the implementation of conditions and/or planning obligations;
 - Similarly, a policy suggesting that non-retail development (Use Class E(b-g)) should be restricted from change of use to retail (Use Class E(a)), in locations outside of the town centre;
- Amalgamations/subdivision
 - Introduce policy support for amalgamation or subdivision of units within town centres where the changes would result in high quality premises and allowing for a proportionate net loss in floorspace, subject to consideration of heritage impacts;

²⁰ DCLG publication 'Parades to be Proud of' defines local neighbourhood parades as: 'Typically located in the heart of a residential community, urban and rural, often with around 5-10 units, providing walk in convenience shopping and limited local services.' 146

- Meanwhile uses:
 - Proposals for appropriate temporary 'meanwhile uses' should be supported where they deliver community benefits, do not harm amenity and do not compromise the future redevelopment of the site;
- Delivery lockers:
 - Delivery lockers should be permitted within town centres where it can be demonstrated that their installation would enhance the vitality and viability of the centre, and would not restrict accessibility.

Retail Impact Assessment

Discussion

- 6.30 In accordance with the NPPF, retail, office and leisure developments greater than 2,500 sq m proposed in edge-of-centre and out-of-centre locations will be subject to the assessment of the impact criteria set out by Paragraph 90.
- 6.31 Where appropriate, Local Authorities are entitled to identify local thresholds in accordance with the following considerations identified within the PPG ('Town centres and retail', Paragraph 15):
- scale of proposals relative to town centres;
 - the existing viability and vitality of town centres;
 - cumulative effects of recent developments;
 - whether local town centres are vulnerable;
 - likely effects of development on any town centre strategy; and
 - impact on any other planned investment.
- 6.32 The adopted policy position for retail impact assessments is set out at Policy DP2. The policy requires that *'planning applications proposing the construction of 500m² or more gross floorspace for the sale of convenience or comparison goods outside a town centre must be accompanied by a Retail Impact Assessment in order to demonstrate that they would not have a significant adverse impact on a town centre, either on their own or cumulatively in the area'*.

- 6.33 The Council's 2014 Study (Mid Sussex District Council Retail Study Update) recommends the locally set threshold of 500 sq m (gross) for new retail developments outside of the District's town centre boundaries. This is primarily based on the scale of small format retail stores operated by the national multiple convenience retailers, though consideration is also given to modern town centre comparison goods formats.
- 6.34 In addition to the guidance within the PPG, in order to robustly test and justify local thresholds, we have considered the overall scale and draw of the centre, the scale of out-of-centre overtrading and market patterns to establish what scale of proposal would be likely to impact upon the vitality and viability of the centre.
- 6.35 Where Experian Goad data is available, we have calculated the average size of occupied town centre units across the relevant centres. The average unit size within Mid-Sussex's centres (where Goad data is available) is 165 sq m, almost identical to the average vacant unit at 167 sq m. This broadly suggests that vacant units across the District are not specifically related to their size, particularly when considered against the scale of the out of centre stores that are shown to be overtrading.
- 6.36 Ultimately, we do not identify any changes in the wider context that would alter our recommendations for setting a local impact threshold, requiring the submission of a proportionate Retail Impact Assessment for developments greater than 500 sq m (gross) for proposals outside of designated primary shopping areas (for retail proposals) and town centre boundaries for other main town centre uses.
- 6.37 We would stress that whilst a locally set threshold would require the submission of an impact assessment for all edge-of-centre and out-of-centre developments exceeding the recommended thresholds, national guidance dictates that the impact test should be undertaken in a proportionate and locally appropriate way, commensurate to the scale of development proposed.
- 6.38 The level of detail would typically be agreed with Council officers during the pre-application process in order to avoid overly onerous requirements that may otherwise restrict and delay development opportunities from coming forward.

Wider Recommendations

- 6.39 In addition to the recommendations provided for retail and town centres policies, we have identified some further longer term recommendations that the Council may wish to consider as resources become available:

Mid Sussex Retail Study

- Retail Liaison / Town Centre Manager role – this is something that the Council may wish to consider, whose role may include:
 - Supporting local businesses in the development of BIDs;
 - Liaison with retailers and community/business groups, to create a forum for cross District discussions;
 - Approaching / liaising with potential future occupiers to assist in filling key vacancies within the authorities main town centres;
 - Facilitating a consistent strategy for events;
- Preparation of an up to date shopfront strategy – this could be implemented for each individual centre, providing guidance to owners and occupiers for consistent colours and styles for upgrades. The document could also set out funding options and an implementation strategy;
- Preparation of an opening hours strategy – an open hours strategy for each town would assist in recommending a blanket approach to opening hours, allowing for provision of 'late night shopping' days, or extended opening hours at key times of year (e.g. in the build up to Christmas, or for sales period e.g. Black Friday/Boxing Day).

Monitoring

- 6.40 Nexus carried out town centre health checks across Mid Sussex in November 2021. These exercises were completed following the resumption of trading retail stores following successive 'lockdowns' across 2020 and 2021 and social distancing measures associated with the Covid-19 pandemic.
- 6.41 Notwithstanding our up-to-date empirical evidence, the global and UK economy is undergoing a significant change at the time of writing, on the back of the Covid-19 pandemic, and the impact of Brexit, which is not yet fully known. Due to the changing circumstances affecting both retail and leisure markets during the course of 2020 and 2021, we recommend that the Council seeks to monitor the overall situation regarding its retail centres carefully. The Council may seek to put in place a further 'light touch' review of both the health of its centres, and the prevailing economic data available, to support the emerging Local Plan ahead of an Examination in Public.
- 6.42 Finally, we note the few retail commitments identified demonstrate a relative lack of market interest in utilising Permitted Development rights for the conversion of retail floorspace to residential

accommodation at this time. Nonetheless, the Council may also wish to include this search criteria within future town centre monitoring exercises.

Glossary of Terms

Bulky goods:	<p>Goods of a large physical nature (for example DIY, furniture, carpets) that sometimes require large areas for storage or display.</p> <p><i>Source: Planning Portal</i></p>
Capacity:	<p>Forecast resident spending within the catchment area, with which to support existing and additional retail floorspace.</p> <p><i>Source: Planning Portal</i></p>
Comparison Goods:	<p>Retail items not bought on a frequent basis, for example televisions and white goods (fridges, dishwashers etc.)</p> <p><i>Source: Planning Portal</i></p>
Convenience Goods:	<p>Everyday essential items, such as food.</p> <p><i>Source: Planning Portal</i></p>
Edge-of-Centre:	<p>For retail purposes, a location that is well connected to, and up to 300 metres from, the primary shopping area. For all other main town centre uses, a location within 300 metres of a town centre boundary. For office development, this includes locations outside the town centre but within 500 metres of a public transport interchange. In determining whether a site falls within the definition of edge of centre, account should be taken of local circumstances.</p> <p><i>Source: NPPF</i></p>
Expenditure per Capita:	<p>The amount of money spent on retail goods per person in each Zone across the Study Area.</p>
Expenditure:	<p>Average annual expenditure levels for various forms of goods, multiplied by the population within the defined Study Area.</p>
Experian Goad:	<p>Experian Goad is a retail property intelligence system that helps retail developers, property investors, planning professionals, and commercial agents to identify profitable locations for retail property development and investment projects. It offers comprehensive retail location plans and easy to use reports covering over 3,000 shopping areas in the UK and Ireland.</p>
Experian (MMG3):	<p>A population, expenditure and socio-demographic dataset that utilises the 2011 Census release, projected forward by using growth rates derived from Office for National Statistics projections and current age and gender estimates.</p>
Financial & Business Services:	<p>An Experian Goad category comprising the likes of banks, building societies, employment agencies, legal services, estate agents and business services.</p> <p><i>Source: Experian Goad</i></p>

Floorplate:	Defined as the physical rentable area over a single floor; sometimes called the footprint.
Goad Plans:	<p>A plan showing a bird's eye view of a retail centre including the exact location of all retail outlets and vacant premises, fascia name, retail category, and floor space. Key location factors such as pedestrian zones, road crossings, bus stops and car parks are also featured, allowing you to instantly assess the site quality of existing or prospective store locations.</p> <p><i>Source: Experian</i></p>
Independent Retailers:	<p>Retailers with less than ten outlets/ stores.</p> <p><i>Source: Experian</i></p>
Leisure Services:	<p>An Experian Goad category for town centre leisure units which includes bars, cafes, cinemas, nightclubs, takeaways, hotels, public houses and restaurants. For clarity, it does not include facilities for leisure pursuits e.g. sports centres, swimming pools or health & fitness clubs.</p> <p><i>Source: Experian Goad</i></p>
Main Town Centre Uses:	<p>Retail development (including warehouse clubs and factory outlet centres); leisure, entertainment and more intensive sport and recreation uses (including cinemas, restaurants, drive-through restaurants, bars and pubs, nightclubs, casinos, health and fitness centres, indoor bowling centres and bingo halls); offices; and arts, culture and tourism development (including theatres, museums, galleries and concert halls, hotels and conference facilities).</p> <p><i>Source: NPPF</i></p>
Market Share:	The proportion of residents that visit a particular retail destination, derived from household survey results.
National Multiple:	<p>Defined as retailers with ten or more outlets/ stores.</p> <p><i>Source: Experian</i></p>
Prime Unit:	<p>'Prime' is a widely used term within real estate investment circles to describe building and location quality. There are no universally agreed definition, however, and no consistency in the distinctions applied to prime or non-prime property.</p> <p><i>Source: Colliers</i></p>
Primary shopping area:	<p>Defined area where retail development is concentrated.</p> <p><i>Source: NPPF</i></p>
Retail Floorspace:	<p>Total floor area of the property that is associated with all retail uses in square metres. May be expressed as a net figure (the sales area) or in gross (including storage, preparation and staff areas).</p> <p><i>Source: Planning Portal</i></p>

Retail Impact:	<p>The potential effects of proposed retail development upon existing shops.</p> <p><i>Source: Planning Portal</i></p>
Retail Services:	<p>An Experian Goad category comprising the likes of dry cleaners, health & beauty, opticians, photo processing, post offices and travel agents.</p> <p><i>Source: Experian Goad</i></p>
Sequential Approach:	<p>A planning principle that seeks to identify, allocate or develop certain types or locations of land before others. For example, brownfield housing sites before greenfield sites, or town centre retail sites before out-of-centre sites.</p> <p><i>Source: Planning Portal</i></p>
Sales Density:	<p>Turnover, per square metre. Various retail planning sources such as GlobalData UK Food & Grocery Company Briefing Reports and Mintel Retail Rankings provide average (or 'benchmark') sales densities for national multiple convenience retailers.</p>
Special Forms of Trading:	<p>Special forms of trading (SFT) are defined as sales via the internet, mail order, stalls and markets, vending machines, door-to-door and telephone sales, including online sales by supermarkets, department stores and catalogue companies.</p> <p><i>Source: Experian</i></p>
Study Area:	<p>The geographical area where the household survey is carried out, based on postal sectors that make up the defined Zones that cover Mid Sussex District and its surrounding hinterland.</p>
Trade draw:	<p>The proportion of trade that a development is likely to receive from customers within and outside its catchment area. It is likely that trade draw will relate to a certain geographic area (i.e. the distance people are likely to travel) and for a particular market segment (e.g. convenience retail). The best way of assessing trade draw where new development is proposed is to look at existing proxies of that type of development in other areas.</p> <p><i>Source: PPG Paragraph: 018 Reference ID: 2b-018-20190722</i></p>
Turnover:	<p>Amount of sales per unit area of retail floorspace</p> <p><i>Source: Planning Portal</i></p>
Town Centre:	<p>Area defined on the local authority's proposal map, including the primary shopping area and areas predominantly occupied by main town centre uses within or adjacent to the primary shopping area. References to town centres or centres apply to city centres, town centres, district centres and local centres but exclude small parades of shops of purely neighbourhood significance. Unless they are identified as centres in Local Plans, existing out-of-centre developments, comprising or including main town centre uses, do not constitute town centres.</p> <p><i>Source: NPPF</i></p>

Introduction

1.1 Research Background & Objectives

To conduct a survey amongst residents in and around the Mid Sussex District Council area to assess shopping habits for main food and grocery, top-up food, non-food shopping and leisure activities.

1.2 Research Methodology

A total of 1001 interviews were conducted between Friday 15th and Wednesday 27th October 2021. Interviews were conducted using NEMS in-house CATI (Computer Assisted Telephone Interviewing) Unit and Face to Face interviewing to ensure the sample is as representative as possible. Respondents were contacted during the day and in the evening. All respondents were the main shopper in the household, determined using a preliminary filter question.

1.3 Sampling

1.3.1 Survey Area

The survey area was segmented into 6 zones defined by postcode sector. The zone details were:

Zone	Postcode Sectors	Number of Interviews
1	RH16 1, RH16 2, RH16 3, RH16 4	101
2	RH15 8, RH15 9, RH15 0	100
3	RH17 5	100
4	RH17 6, RH110 5, RH11 9	100
5	RH10 3, RH10 4, RH10 7	100
6	RH18 5, RH19 1, RH19 2, RH19 3, RH19 4, RH7 6	100
7	BN8 4, RH17 7, TN22 3	100
8	BN6 8	101
9	BN5 9, BN6 9,	100
10	BN1 5, BN1 8, BN1 9, BN45 7	100
Total		1002

1.3.2 Telephone Numbers

The landline numbers are generated through a process known as Random Digit Dialling (RDD), whereby we start with known 'seed' numbers and then generate all possible number combinations around these. Known business numbers are removed and the remaining numbers are randomly sorted to give each number the same and equal chance of being selected.

The benefit of using RDD numbers (as opposed to those generated from pre-existing lists such as telephone directories and Electoral Register entries) is that ex-directory numbers are also included in the survey sample. In practice, this means that the sample provided is in no way preselected, and that consumers who had opted-out of providing their telephone contact details to directory operators had the opportunity to take part in the research, thereby removing potential bias in the sample.

Mobile numbers were also included in the survey sample to further increase the inclusivity of the survey, given the increase in the number of mobile-only households amongst certain demographic groups (especially younger people and lower income households). These numbers are generated from a variety of commercial sources, where permission has been given to use such contact information for research and marketing purposes.

We don't screen against the TPS (Telephone Preference Service) database, again because the demographic profile of TPS registered numbers is slightly different to the rest of the population. In addition, there is no legal requirement to screen against TPS registered numbers; market research is not classified as unsolicited sales and marketing.

1.3.3 Time of Interviewing

Approximately two-thirds of all calls are made outside normal working hours.

1.3.4 Sample Profile

It should be noted that as per the survey's requirements, the profile of respondents is that of the main shopper / person responsible for most of the food shopping in the household. As such it will always differ from the demographic profile of all adults within the survey area. With any survey among the main shopper / person responsible for most of the food shopping in the household the profile is typically biased more towards females and older people. The age of the main shopper / person responsible for most of the food shopping in the household is becoming older due to the financial constraints on young people setting up home.

A number of measures are put in place to ensure the sample is representative of the profile of the person responsible for most of the food / shopping in the household.

First of all, interviewing is normally spread over a relatively long period of time, certainly longer than the theoretical minimum time it would take. This allows us time to call back people who weren't in when we made the first phone call. If we only interview people who are at home the first time we call, we over-represent people who stay at home the most; these people tend to be older / less economically active.

We also control the age profile of respondents; this is a two-stage process. First of all, we look at the age profile of the survey area according to the latest Census figures. Using a by-product from additional data we collect from a weekly telephone survey of a representative sample of all adults across the country we know the age profile of the main shopper in any given area. This information is from data based on in excess of 100,000 interviews and is regularly updated and is therefore probably the most accurate and up to date information of its kind.

Stratified random sampling helps ensure that the sample is as representative as possible. While the system dials the next randomly selected number for interviewers, all calls are made by interviewers; no automated call handling systems are used.

1.3.5 Monitoring of Calls

At least 5% of telephone interviews are randomly and remotely monitored by Team Leaders to ensure the interviewing is conducted to the requisite standard. Both the dialogue and on-screen entries are monitored and evaluated. Interviewers are offered re-training should these standards not be met.

1.4 Weightings

To correct the small differences between the sample profile and population profile, the data was weighted. The population is of the main shopper in the household. Weightings have been applied to age bands based on an estimated age profile of main shoppers (see section 1.3.3 for details). The weighted totals differ occasionally from the adjusted population due to rounding error. Details of the age weightings are given in the table below:

Age	Main Shopper Profile (%)	Interviews Achieved	Age Weightings
18-34	20.4%	65	3.1448
35-44	18.7%	92	2.0358
45-54	18.7%	220	0.8494
55-64	18.3%	199	0.9195
65+	24.0%	426	0.5642
Total		1002	

Further weightings were then applied to the zone data, to adjust zone samples to be representative by population. Details of those weightings are given in the table below:

Zone	Population *	Interviews Achieved	Interviews Achieved (Weighted by Age)	Zone Weightings
1	33,550	101	131	1.0612
2	31,545	100	123	0.8863
3	6,813	100	27	0.3103
4	26,081	100	101	1.0159
5	36,829	100	143	1.2733
6	47,154	100	183	1.8035
7	17,172	100	67	0.7396
8	8,684	101	34	0.4246
9	15,822	100	62	0.7054
10	33,853	100	132	1.5746
Total	257,503	1002	1002	

* Source: 2011 Census

1.5 Statistical Accuracy

As with any data collection where a sample is being drawn to represent a population, there is potentially a difference between the response from the sample and the true situation in the population as a whole. Many steps have been taken to help minimise this difference (e.g. random sample selection, questionnaire construction etc) but there is always potentially a difference between the sample and population – this is known as the standard error.

The standard error can be estimated using statistical calculations based on the sample size, the population size and the level of response measured (as you would expect you can potentially get a larger error in a 50% response than say a 10% response simply because of the magnitude of the numbers).

To help understand the significance of this error, it is normally expressed as a confidence interval for the results. Clearly to have 100% accuracy of the results would require you to sample the entire population. The usual confidence interval used is 95% - this means that you can be confident that in 19 out of 20 instances the actual population behaviour will be within the confidence interval range.

For example, if 50% of a sample of 1002 answers “Yes” to a question, we can be 95% sure that between 47.9% and 53.1% of the population holds the same opinion (i.e., +/- 3.1%). The following is a guide showing confidence intervals attached to various sample sizes from the study:

%ge Response	95% confidence interval
10%	±1.9%
20%	±2.5%
30%	±2.8%
40%	±3.0%
50%	±3.1%

1.6 Data Tables

Tables are presented in question order with the question number analysed shown at the top of the table. Those questions where the respondent is prompted with a list of possible answers are indicated in the question text with a suffix of [PR].

The sample size for each question and corresponding column criteria is shown at the base of each table. A description of the criteria determining to whom the question applies is shown in italics directly below the question text; if there is no such text evident then the question base is the full study sample. If the tabulated data is weighted (indicated in the header of the tabulations), in addition to the sample base, the weighted base is also shown at the bottom of each table.

Unless indicated otherwise in the footer of the tabulations, all percentages are calculated down the column. Arithmetic rounding to whole numbers may mean that columns of percentages do not sum to exactly 100%. Zero per cent denotes a percentage of less than 0.05%.

Percentages are calculated on the number of respondents and not the number of responses. This means that where more than one answer can be given to a question the sum of percentages may exceed 100%. All such multi-response questions are indicated in the tabulated by a suffix of [MR] on the question text.

Where appropriate to the question, means are shown at the bottom of response tables. These are calculated in one of two ways: if the data is captured to a coded response a weighted mean is calculated and the code weightings are shown as a prefix above the question text; if actual specific values were captured from respondents these individual numbers are used to calculate the mean.

Q14 Thinking more generally, how much does your household spend on average on 'top up' food and grocery shopping in a week? Once again, top up grocery shopping includes 'basket shops' in foodstores, purchases from speciality retailers such as bakers, butchers and greengrocers, and snacks bought from shops.

Appendix 3:

Sample Questionnaire

Job No: 121021

Mid Sussex District Council Retail Study

Good morning / afternoon / evening, I am from NEMS market research, an independent market research company, and we are conducting a short survey in your area on behalf of Mid Sussex Council about shopping and leisure habits. Do you have time to answer some questions please? It will take about 6-7 minutes.

QA Are you the person responsible for the main food shopping in your household?

Yes
No

IF 'YES' – CONTINUE INTERVIEW.

IF 'NO' – ASK, COULD I SPEAK TO THE PERSON WHO IS RESPONSIBLE FOR MOST OF THE FOOD SHOPPING, IF NOT AVAILABLE THANK AND CLOSE INTERVIEW

Preface for the Convenience questions

READ OUT: We now have a few questions about where you go Food shopping. In answering these questions the location may be a store, a centre, a specific road or area or the internet.

Q01 Where do you usually undertake your main food and grocery shopping?

DO NOT READ OUT. ONE ANSWER ONLY. IF THEY SAY VARIES ASK IF THERE'S SOMEWHERE THEY USE MORE OFTEN, EVEN IF SLIGHTLY. IF THEY STILL SAY VARIES - ASK THEM TO NAME ONE OF THE PLACES THEY USE OFTEN FOR MAIN FOOD SHOPPING.

#Conv Convenience List
502 Internet / delivery
505 (Don't know / varies)
506 (Don't do this type of shopping)

CLOSE

ASKED TO THOSE WHO SAID "INTERNET / DELIVERY" AT Q01

Q02 Which retailer do you purchase your main food internet / home delivery shopping from?

DO NOT READ OUT. ONE ANSWER ONLY.

1 Abel & Cole
2 Amazon
3 Asda
4 Co-op
5 Gousto
6 HelloFresh
7 Iceland
8 Morrisons
9 Ocado
A Poundland
B Riverford
C Sainsbury's
D Tesco
E Waitrose
F Other (PLEASE WRITE IN)
G (Don't know / varies)

Q03 What is the main reason you choose (STORE MENTIONED AT Q01) for your main food and grocery shopping?

DO NOT READ OUT. ONE ANSWER ONLY

001 Choice of food goods available
002 Quality of food goods available
003 Choice of shops selling food goods
004 Quality of shops selling food goods
005 Choice of shops nearby selling non-food goods
006 Can get everything I need there
007 Cleanliness
008 Delivery service
009 Easy to get to by car
010 Easy to get to by public transport
011 Familiar / know where everything is
012 Feels safe (during the day)
013 Feels safe (during the evening / night time)
014 Good choice of leisure facilities nearby
015 Good choice of services nearby, such as banks and other financial services
016 Good disability access
017 Good entertainment / events
018 Good layout / easy to get around
019 Good offers
020 Good opening hours
021 Good public information, signposts and public facilities
022 Good service / friendly staff
023 Habit / always use it
024 Has a cafe
025 Has a petrol station
026 Large store
027 Like to support local business
028 Lower prices
029 Loyalty card / points scheme
030 Near to family / friends
031 Near to home
032 Near to work
033 Nice shopping environment
034 Online shopping is convenient
035 Only one in the area / no other choice
036 Parking is free
037 Parking prices are low
038 Parking provision is good / easy to park
039 Preference for retailer
040 Small / quiet store
041 Staff discount / work there
042 Started online shopping due to the pandemic and kept using it
043 Use online shopping due to the pandemic / because it's covid safe
044 Use store / location because it has good covid safety measures
045 Value for money
500 Other (PLEASE WRITE IN)
505 (Don't know / varies)
509 (No reason in particular)

Q04 What, if anything, is the one thing you most dislike about (STORE MENTIONED AT Q01)?
DO NOT READ OUT. ONE ANSWER ONLY

- 001 Poor choice of food goods available
- 002 Poor quality of food goods available
- 003 Poor choice of shops selling food goods
- 004 Poor quality of shops selling food goods
- 005 Poor choice of shops nearby selling non-food goods
- 006 Change layout too often
- 007 Difficult to get to by car
- 008 Difficult to park / lack of parking
- 009 Expensive prices
- 010 Expensive parking
- 011 Feels unsafe (during the day)
- 012 Feels unsafe (during the evening / night time)
- 013 Lack of cycle parking
- 014 Lack of public transport
- 015 No cafe
- 016 No petrol station
- 017 Online - missing items / getting swaps
- 018 Online - short use-by dates on items
- 019 Online - you can't choose the goods yourself
- 020 Poor choice of leisure facilities nearby
- 021 Poor choice of services nearby, such as banks and other financial services
- 022 Poor disability access
- 023 Poor layout / hard to get around
- 024 Poor opening hours
- 025 Staff rude / unhelpful
- 026 Too busy
- 027 Too far away
- 028 Too small
- 029 Traffic congestion
- 030 Unattractive shopping environment
- 031 Unclean

ASKED TO THOSE WHO DO TOP UP SHOPPING AT Q11

Q12 Where do you usually undertake your 'top up' shopping?
DO NOT READ OUT. ONE ANSWER ONLY.

#Conv	Convenience List	GO TO Q13
505	(Don't know / varies)	GO TO Q14

ASKED TO THOSE WHO DO TOP UP SHOPPING AT Q11 EXCLUDING THOSE WHO SAID 'DON'T KNOW / VARIES' AT Q12

Q13 How often do you make 'top up' shopping trips to (STORE MENTIONED AT Q12)?
DO NOT READ OUT. ONE ANSWER ONLY.

- | | |
|---|---------------------------|
| 1 | Daily |
| 2 | At least two times a week |
| 3 | At least once a week |
| 4 | At least once a fortnight |
| 5 | At least once a month |
| 6 | At least every two months |
| 7 | Less often |
| 8 | Have only visited once |
| 9 | (Don't know / varies) |

ASKED TO THOSE WHO DO TOP UP SHOPPING AT Q11

Q14 Thinking more generally, how much does your household spend on average on 'top up' food and grocery shopping in a week?
Once again, top up grocery shopping includes 'basket shops' in foodstores, purchases from speciality retailers such as bakers, butchers and greengrocers, and snacks bought from shops.
DO NOT READ OUT. ONE ANSWER ONLY.

- | | |
|---|-------------------------------------|
| X | To the nearest £: (PLEASE WRITE IN) |
| Y | (Don't know / varies) |
| Z | (Refused) |

READ OUT: Now thinking about online grocery shopping before, during and after the Covid lockdowns.

LOCK1 BEFORE the first Covid lockdown how often were you shopping online for groceries?
DO NOT PROMPT. ONE ANSWER ONLY.

- 1 Daily
- 2 4-6 days a week
- 3 2-3 days a week
- 4 One day a week
- 5 Every two weeks
- 6 Every three weeks
- 7 Monthly
- 8 Once every two months
- 9 Three-four times a year
- A Twice a year
- B Once a year
- C Less often
- D Never
- E (Don't know)
- F (Varies)

LOCK2 DURING the Covid lockdowns how often did you shop online for groceries?
DO NOT PROMPT. ONE ANSWER ONLY.

- 1 Daily
- 2 4-6 days a week
- 3 2-3 days a week
- 4 One day a week
- 5 Every two weeks
- 6 Every three weeks
- 7 Monthly
- 8 Once every two months
- 9 Three-four times a year
- A Twice a year
- B Once a year
- C Less often
- D Never
- E (Don't know)
- F (Varies)

QA Using the data from LOCK2 compared to LOCK1 we will be able to create the question below:
Online grocery shopping DURING lockdowns compared to BEFORE lockdowns:

- 1 More
- 2 Same
- 3 Less
- 4 (Don't know /varies)

LOCK3 NOW THAT the lockdowns are lifted, how often do you think you will be shopping online for groceries?
DO NOT PROMPT. ONE ANSWER ONLY.

- 1 Daily
- 2 4-6 days a week
- 3 2-3 days a week
- 4 One day a week
- 5 Every two weeks
- 6 Every three weeks
- 7 Monthly
- 8 Once every two months
- 9 Three-four times a year
- A Twice a year
- B Once a year
- C Less often
- D Never
- E (Don't know)
- F (Varies)

QB Using the data from LOCK3 compared to LOCK2 we will be able to create the question below:
Online grocery shopping AFTER lockdowns compared to DURING lockdowns:

- 1 More
- 2 Same
- 3 Less
- 4 (Don't know /varies)

QC Using the data from LOCK3 compared to LOCK1 we will be able to create the question below:
Online grocery shopping AFTER lockdowns compared to BEFORE lockdowns:

- 1 More
- 2 Same
- 3 Less
- 4 (Don't know /varies)

Preface for Comparison questions

READ OUT: We now have a few questions about where you go for non-food shopping. In answering these questions, the location may be a town centre, a retail park, a free-standing store, or it could be facilities such as the internet, TV shopping or catalogue. Please answer how you usually shop when unaffected by lockdowns.

Q15 Where do you usually buy clothing or footwear goods?

DO NOT PROMPT. ONE ANSWER ONLY. IF IN STORE IN A SUPERMARKET WRITE IN NAME OF SUPERMARKET AND TOWN.

READ OUT: Now thinking about non-food shopping online before, during and after the Covid lockdowns.

New questions to see how internet shopping has changed and may change post Covid

LOCK4 BEFORE the first Covid lockdown how often were you doing non-food shopping online?
DO NOT PROMPT. ONE ANSWER ONLY.

- 1 Daily
- 2 4-6 days a week
- 3 2-3 days a week
- 4 One day a week
- 5 Every two weeks
- 6 Every three weeks
- 7 Monthly
- 8 Once every two months
- 9 Three-four times a year
- A Twice a year
- B Once a year
- C Less often
- D Never
- E (Don't know)
- F (Varies)

LOCK5 DURING the Covid lockdowns how often were you doing non-food shopping online?
DO NOT PROMPT. ONE ANSWER ONLY.

- 1 Daily
- 2 4-6 days a week
- 3 2-3 days a week
- 4 One day a week
- 5 Every two weeks
- 6 Every three weeks
- 7 Monthly
- 8 Once every two months
- 9 Three-four times a year
- A Twice a year
- B Once a year
- C Less often
- D Never
- E (Don't know)
- F (Varies)

Using the data from LOCK5 compared to LOCK4 we will be able to create the question below:
QD Non-food shopping online DURING lockdowns compared to BEFORE lockdowns:

- 1 More
- 2 Same
- 3 Less
- 4 (Don't know /varies)

LOCK6 NOW THAT the lockdowns are lifted, how often do you think you will be doing non-food shopping online?
DO NOT PROMPT. ONE ANSWER ONLY.

- 1 Daily
- 2 4-6 days a week
- 3 2-3 days a week
- 4 One day a week
- 5 Every two weeks
- 6 Every three weeks
- 7 Monthly
- 8 Once every two months
- 9 Three-four times a year
- A Twice a year
- B Once a year
- C Less often
- D Never
- E (Don't know)
- F (Varies)

Using the data from LOCK6 compared to LOCK5 we will be able to create the question below:
QE Non-food shopping online AFTER lockdowns compared to DURING lockdowns:

- 1 More
- 2 Same
- 3 Less
- 4 (Don't know /varies)

Using the data from LOCK6 compared to LOCK4 we will be able to create the question below:
QF Non-food shopping online AFTER lockdowns compared to BEFORE lockdowns:

- 1 More
- 2 Same
- 3 Less
- 4 (Don't know /varies)

Q26 Which of the following forms of shopping do you carry out?

Table 6a: Estimated 'capacity' for new convenience goods facilities in Mid Sussex District

Year	Benchmark Turnover (£m) ¹	Survey Turnover (£m) ²	Inflow (£m)	Surplus Expenditure (£m)
2021	370.7	425.0	0.0	54.3
2026	373.7	437.7	0.0	64.0
2031	373.7	447.6	0.0	73.9
2036	373.7	459.4	0.0	85.7
2038	373.7	464.1	0.0	90.4
Market Share of Study Area (%)		63.1		

Notes:
a. Allows for increased turnover efficiency as set out in Table 4a Experian Retail Planner 18 (October 2020)
b. Assumes constant market share claimed by Mid Sussex District facilities at 63.1% from the Study Area

2019 Prices

Table 6b: Estimated 'capacity' for new convenience goods facilities in Mid Sussex District

Year	Surplus Expenditure (£m)	Floorspace Capacity (sq m net)	
		Min ¹	Max ²
2021	54.3	4,200	6,900
2026	64.0	4,900	8,100
2031	73.9	5,700	9,400
2036	85.7	6,600	10,900
2038	90.4	6,900	11,500

Notes:
a. Average sales density assumed to be £12,954 per sq m (at 2021), based on the average sales density of supermarket foodstore operators
b. Average sales density assumed to be £7,816 per sq m (at 2021), based on the average sales density of Aldi, Lidl and other discount retail operators
c. Allows for increased turnover efficiency as set out in Table 4a Experian Retail Planner 18 (October 2020)

2019 Prices

Destination	Reference	Settlement	Net Convenience Floorspace (sq m)	Estimated Sales Density (£ per sq m)	Estimated Convenience Turnover (£m)	Proposal
The Martlets Shopping Centre, Burgess Hill	DM/19/3331	Burgess Hill	143	8,000	1.1	Demolition of multi-storey car park, public library and offices. The conversion of existing buildings and erection of new buildings to provide, additional retail floor space (Classes A1 and A3), residential units (Class C3) with undercroft car parking, a multi-screen cinema (Class D2), bowling alley (Class D2), gymnasium (Class D2), a hotel (Class C1), the reconfiguration and expansion of existing public car park, amendments to the site access, public realm improvements including landscaping, and other associated works
Homebase, 219 - 223, London Road, East Grinstead	DM/20/2826	East Grinstead	1,238	8,841	10.9	External alterations to the existing retail unit, removal of entrance canopy and installation of full height glazing to shopfront and a replacement roof with solar panels; construction of new delivery bay; and reconfiguration of customer car park to provide trolley storage, covered cycle parking and car parking for disabled and parents to allow occupation of the store for Class A1 foodstore retailing convenience and comparison goods (Lidl).
Total			1,380		12.1	

Notes:
a. Sales density assumed to be £8,000 based on Nexus Planning judgement where the format or occupier has not been referenced within the application.
b. Convenience floorspace is assumed to be 1/3 net sales area based on Nexus Planning judgement where the occupier has not been referenced within the application
c. Assessed commitments limited to development proposals greater than 100 sq m

2019 Prices

Table 6d: Net quantitative 'capacity' for new convenience goods facilities in Mid Sussex

Year	Surplus Expenditure (£m)	Commitments (£m)	Residual Expenditure (£m)	Floorspace Capacity (sq m net)	
				Min ¹	Max ²
2021	54.3	12.1	42.2	3,300	5,400
2026	64.0	12.2	51.8	4,000	6,600
2031	73.9	12.2	61.7	4,700	7,800
2036	85.7	12.2	73.6	5,600	9,300
2038	90.4	12.2	78.2	6,000	9,900

Notes:
a. Average sales density assumed to be £12,954 per sq m (at 2021), based on the average sales density of supermarket foodstore operators
b. Average sales density assumed to be £7,816 per sq m (at 2021), based on the average sales density of Aldi, Lidl and other discount retail operators
c. Residual calculated by subtracting turnover of commitments (sourced from Table 6c) from surplus expenditure (sourced from Table 6a)
d. Allows for increased turnover efficiency as set out in Table 4a Experian Retail Planner 18 (October 2020)

Notes:

a. Zones based on the postal sectors shown on the plan at Appendix A

b. Per capita expenditure derived from Experian MMG3 data (2020 report)

c. Population distribution derived from Experian MMG3 data (2020 report)

d. Projections to 2038 have been projected by Nexus Planning by using the Experian MMG3 (2020 report) population trends.

e. Per capita expenditure projected forward using 'adjusted SFT' forecast growth rates taken from Table 6 of Experian Retail Planner Briefing Note 18

f. Expenditure excludes Special Forms of Trading in line with 'adjusted' allowance derived from Figure 5 of Appendix 3 to Experian Retail Planner Briefing Note 18

2019 Prices

c. Figures may not total due to rounding
2019 Prices

Table 26a: Estimated 'capacity' for new comparison goods facilities in Mid Sussex District

Year	Benchmark Turnover (£m) ¹	Survey Turnover (£m) ²	Inflow (£m)	Surplus Expenditure (£m)
2026	377.4	372.5	0.0	-4.9
2031	430.8	431.1	0.0	0.3
2036	489.8	503.1	0.0	13.3
2038	515.6	535.9	0.0	20.4
Market Share of Study Area (%)		32.6%	-	-

- Notes:
- a. Allows for increased turnover efficiency as set out in Table 4b Experian Retail Planner 18 (October 2020)
 - b. Assumes constant market share claimed by Mid Sussex District facilities at 32.6% from the Study Area

2019 Prices

Table 26b: Estimated 'capacity' for new comparison goods facilities in Mid Sussex District

Year	Surplus Expenditure (£m)	Floorspace Capacity (sq m net)	
		Min ¹	Max ²
2026	-4.9	-600	-800
2031	0.3	0	0
2036	13.3	1,300	1,800
2038	20.4	1,800	2,600

- Notes:
- a. Average sales density assumed to be £7,000 per sq m, which Nexus Planning considers to be towards the higher end of what would be achieved in Mid Sussex District
 - b. Average sales density assumed to be £5,000 per sq m, which Nexus Planning considers to be towards the lower end of what would be achieved in Mid Sussex District
 - c. Allows for increased turnover efficiency as set out in Table 4b Experian Retail Planner 18 (October 2020)

2019 Prices

Destination	Reference	Settlement	Net Comparison Floorspace (sq m)	Estimated Sales Density (£ per sq m)	Estimated Comparison Turnover (£m)	Proposal
The Martlets Shopping Centre, Burgess Hill	DM/19/3332	Burgess Hill	271	6,000	1.6	Demolition of multi-storey car park, public library and offices. The conversion of existing buildings and erection of new buildings to provide, additional retail floor space (Classes A1 and A3), residential units (Class C3) with undercroft car parking, a multi-screen cinema (Class D2), bowling alley (Class D2), gymnasium (Class D2), a hotel (Class C1), the reconfiguration and expansion of existing public car park, amendments to the site access, public realm improvements including landscaping, and other associated works
Homebase, 219 - 223, London Road, East Grinstead	DM/20/2827	East Grinstead	309	4,888	1.5	External alterations to the existing retail unit, removal of entrance canopy and installation of full height glazing to shopfront and a replacement roof with solar panels; construction of new delivery bay; and reconfiguration of customer car park to provide trolley storage, covered cycle parking and car parking for disabled and parents to allow occupation of the store for Class A1 foodstore retailing convenience and comparison goods (Lidl).
Total	-	-	580	-	3.1	

Notes:

a. Sales density assumed to be £6,000 based on Nexus Planning judgement where the occupier has not been referenced within the application

b. Comparison floorspace is assumed to be 2/3 net sales area based on Nexus Planning judgement where the occupier has not been referenced within the application

c. Assessed commitments limited to development proposals greater than 100 sq m

2019 Prices

Table 26d: Net quantitative 'capacity' for new comparison goods facilities in Mid Sussex District

Year	Surplus Expenditure (£m)	Commitments (£m)	Residual Expenditure (£m)	Floorspace Capacity (sq m net)	
				Min ¹	Max ²
2026	-4.9	3.7	-8.6	-1,100	-1,500
2031	0.3	4.2	-3.9	-400	-600
2036	13.3	4.8	8.5	800	1,100
2038	20.4	5.0	15.3	1,400	1,900

Notes:

a. Average sales density assumed to be £7,000 per sq m, which Nexus Planning considers to be towards the higher end of what would be achieved in Mid Sussex District

b. Average sales density assumed to be £5,000 per sq m, which Nexus Planning considers to be towards the lower end of what would be achieved in Mid Sussex District

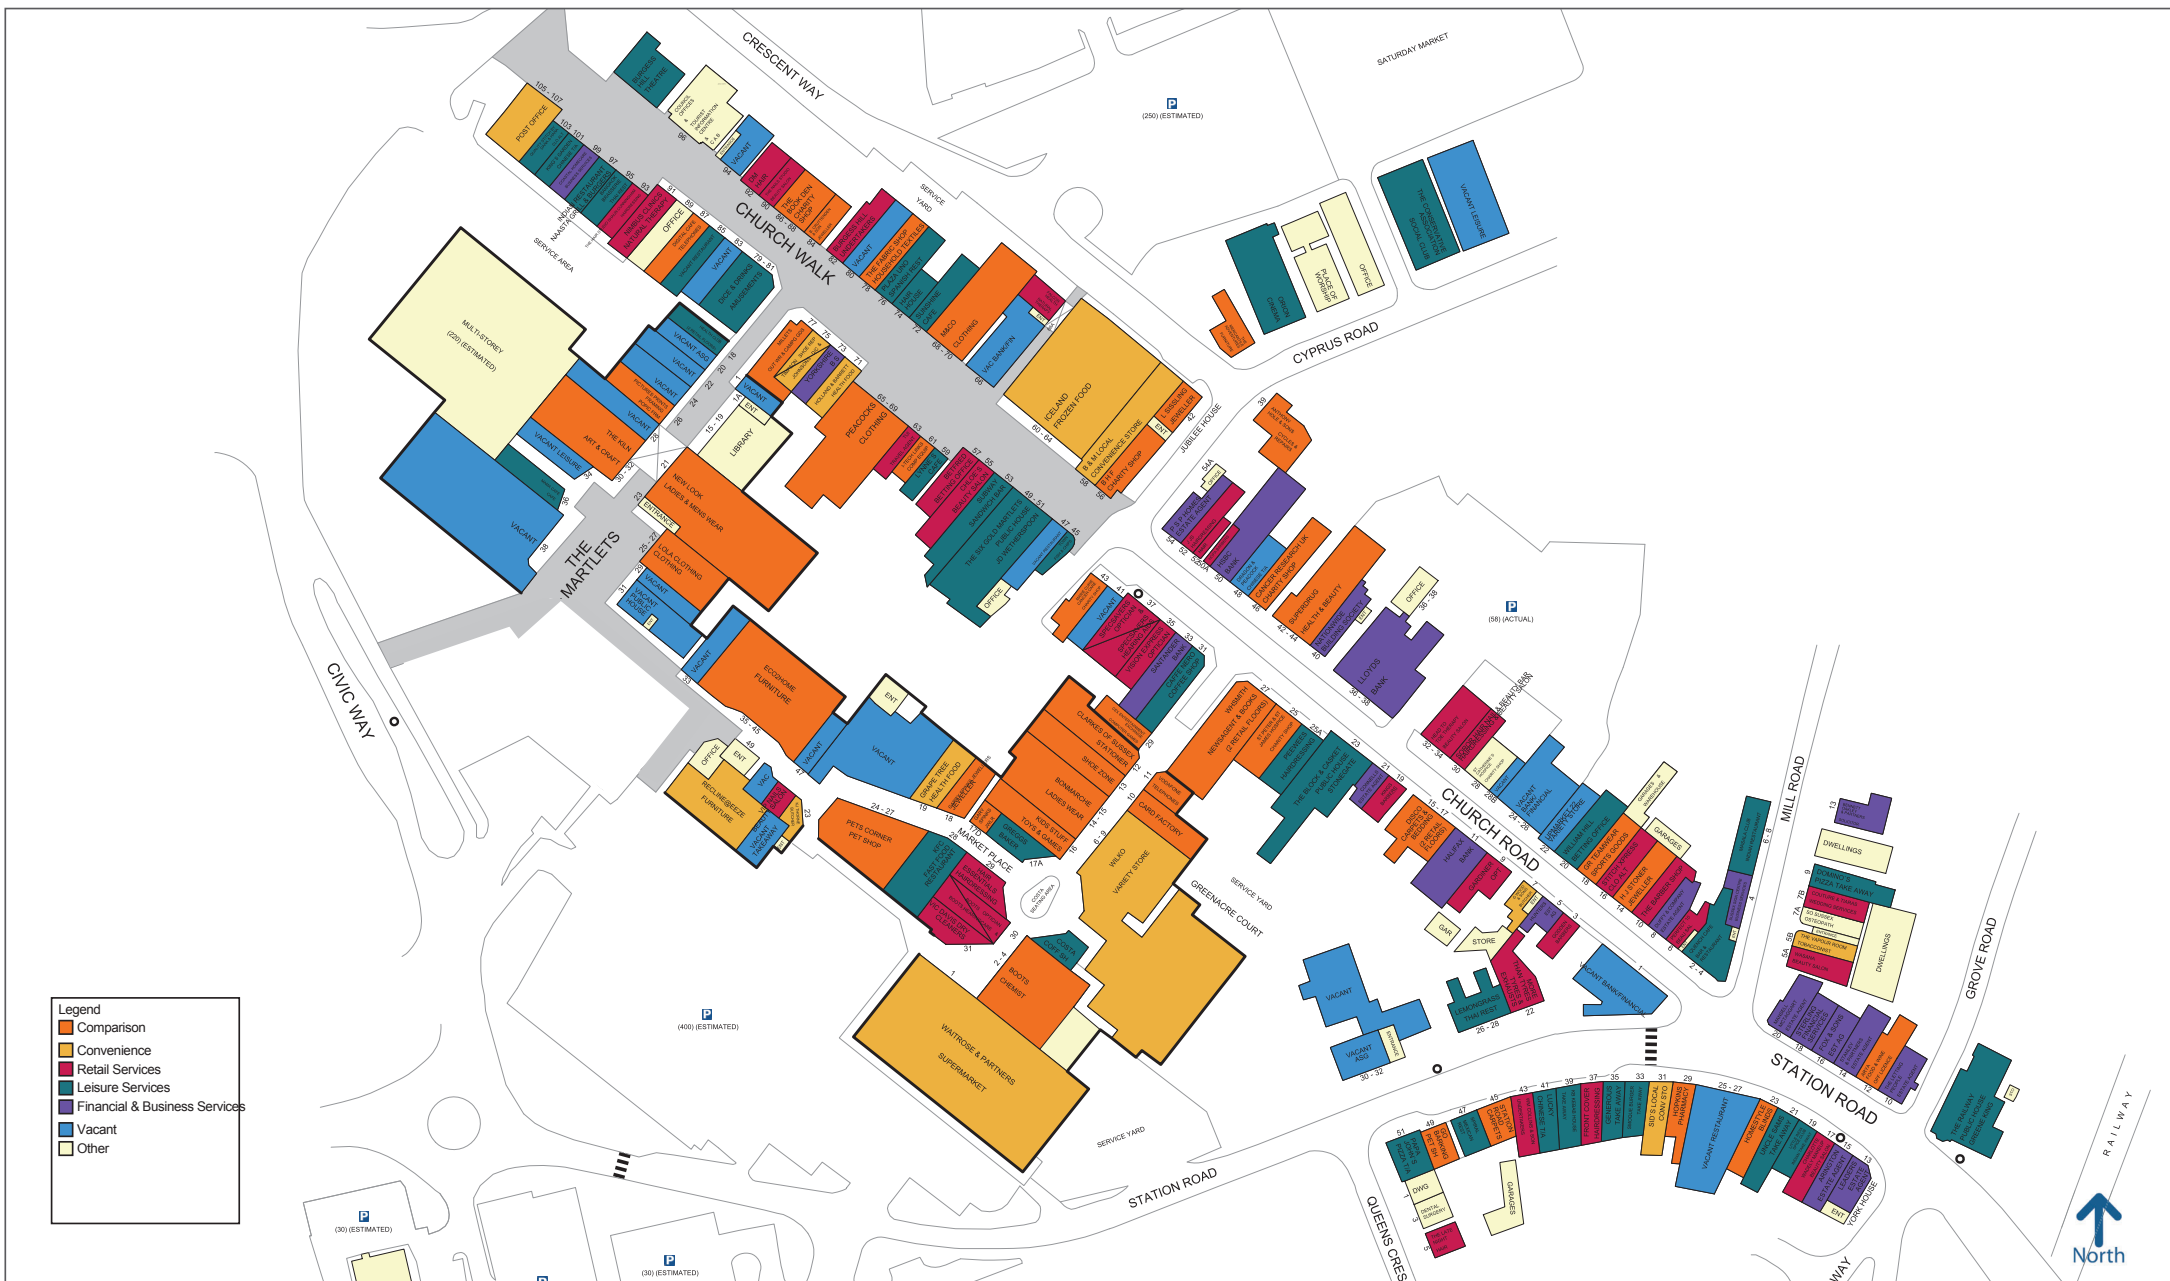

c. Residual calculated by subtracting turnover of commitments (sourced from Table 26c) from surplus expenditure (sourced from Table 26a)

d. Allows for increased turnover efficiency as set out in Table 4b Experian Retail Planner 18 (October 2020)
