Dear Ms Glancy

As a representative of Crawley District Scout Council, I shall be grateful if we can reserve two places at the hearing on Wednesday 2nd November from 2pm to coincide with the session covering Pease Field.

I note that others have diligently gone into extensive detail on a range of relevant topics. As an adjoining location, many of their points cover our items of interest thoroughly. However, there are one or two more aspects that are unique and require special consideration, that the Development Plan may not adequately cover. These are briefly summarised below-

Crawley District Scout Council

- Maintains an existing community asset which benefits the young people in the area including MSDC residents' children and grandchildren by offering a natural outdoor environment developing life skills away from the distractions of modern technology.
- Provides a privately managed safe space at Stanford Campsite Pease Pottage to young people following the Scout Association's policy for safeguarding and exacting standards of adult supervision.

Building another significant housing development on the southern boundary of the Stanford Campsite without any provision or support to enhance the security needed to offset the risk that increased population and access brings to such a local facility. This warrants further discussion how to minimise the increased risk to local young people.

Whilst I am happy to present the above verbally, I recognise that submitting it for reading is more time effective.

I look forward to hearing from you.

Kind Regards
Eddy Hills
Trustee.
